Q.1 Answer the following in brief:
   a) Can management be treated as a process? Give reasons.
   b) Differentiate between Management and Administration.
   c) Explain any four roles of manager.
   d) Explain the three levels of a management.
   e) “Staffing is a part of human resource management.” Comment on the given statement.
   f) Explain ‘span of control’.
   g) Explain ‘Job Analysis’.
   h) Explain ‘Team spirit’.
   i) Discuss in brief the various steps in organizing process.
   j) Enlist any five qualities of a successful leader.  

   **PART-A**

   Q.2 What is the significance of decision making? Discuss the various types of decisions. What procedures should be followed in arriving at correct decision?  

   Q.3 a) Differentiate between the following:
       i) Training and development.
       ii) Formal organization and informal organization.
   b) Explain in detail, the importance of planning in the present Indian business environment.  

   Q.4 a) Define social responsibility. Why should it be the responsibility of business to look after the interest of the community?
   b) What is departmentation? Describe the various bases for departmentation.  

   **PART-B**

   Q.5 Write short notes on (any four) of the following:
   a) PERT.
   b) CPM.
   c) Gantt Chart.
   d) Entrepreneurship.
   e) Team Building.  

   Q.6 a) Explain ‘Maslow’s need hierarchy theory’. How does it differ from ERG theory?
   b) What is computer based MIS? Discuss the various advantages and disadvantages of MIS.
Q.7 a) Discuss the importance of ‘Time’. Describe the various techniques used for time management. 

b) Write short notes on:
   i) Performance appraisal.
   ii) Leadership.  

End Semester Examination, Dec. 2017
BCA – Third Semester
PRINCIPLES OF MANAGEMENT (BCA-001 (CB))

Time: 3 hrs. 
Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following in brief:
   a) Can management be treated as a process? Give reasons.
   b) Differentiate between Management and Administration.
   c) Explain any four roles of manager.
   d) Explain the three levels of a management.
   e) “Staffing is a part of human resource management.” Comment on the given statement.
   f) Explain ‘span of control’.
   g) Explain ‘Job Analysis’.
   h) Explain ‘Team spirit’.
   i) Discuss in brief the various steps in organizing process.
   j) Enlist any five qualities of a successful leader.  2×10

PART-A

Q.2 What is the significance of decision making? Discuss the various types of decisions. What procedures should be followed in arriving at correct decision?  20

Q.3 a) Differentiate between the following:
   i) Training and development.
   ii) Formal organization and informal organization.  10
   b) Explain in detail, the importance of planning in the present Indian business environment.  10

Q.4 a) Define social responsibility. Why should it be the responsibility of business to look after the interest of the community?  10
   b) What is departmentation? Describe the various bases for departmentation.  10

PART-B

Q.5 Write short notes on (any four) of the following:
   a) PERT.
   b) CPM.
   c) Gantt Chart.
   d) Entrepreneurship.
   e) Team Building.  5×4
Q.6  a) Explain ‘Maslow’s need hierarchy theory’. How does it differ from ERG theory?  
   b) What is computer based MIS? Discuss the various advantages and disadvantages of MIS.  

Q.7  a) Discuss the importance of ‘Time’. Describe the various techniques used for time management.  
   b) Write short notes on:  
      i) Performance appraisal.  
      ii) Leadership.  

End Semester Examination, Dec. 2017  
BCA – Third Semester  
LEADERSHIP AND ORGANISATIONAL BEHAVIOUR (BCA-002(CB))

Q.1  Choose the correct answer:  
   a) Leaders are:  
      i) individual people, while leadership is a process.  
      ii) the first step in the leadership process.  
      iii) individual people who study the leadership process.  
      iv) the final step in the leadership process.  
   b) Trait theory helps explain why:  
      i) some people are leaders.  
      ii) some people are not leaders.  
      iii) successful leaders are effective.  
      iv) leadership involves extraversion.  
   c) Which leadership style tends to centralize authority and make unilateral decisions?  
      i) cultural style.  
      ii) autocratic style.  
      iii) democratic style.  
      iv) laissez-faire.  
   d) Jared’s boss encourages employees to participate in the decision-making process but does not give them complete freedom to do as they like. She has this of leadership style.  
      i) monarchial.  
      ii) autocratic.  
      iii) laissez-faire.  
      iv) democratic.  
   e) The theory states a manager’s choice of organizational structures and control systems depends on characteristics of the external environment:  
      i) mechanistic.  
      ii) management science.  
      iii) organic.  
      iv) contingency.  
   f) Scientific management, administrative management, and bureaucratic management belong to the management viewpoint known as the:  
      i) classical perspective.  
      ii) behavioral perspective.  
      iii) quantitative perspective.
iv) systems perspective.

2

g) Which of the following is the 'odd one out'?  
i) management science.  
ii) management accounting.  
iii) operations management.  
iv) systems management.  

2

h) The _______ leadership style is an expression of the leader's trust in the abilities of his subordinates:  
i) participative.  
ii) delegative.  
iii) authoritarian.  
iv) all of the above.  

2

i) Feature(s) of Maslow's need hierarchy theory is (are):  
i) theory of human motives.  
ii) classifies basic human needs in a hierarchy.  
iii) theory of human motivation.  
iv) all of the above.  

2

j) The philosophy that guides an organization's policies towards its employees and customers is an important part of  
i) management strategy.  
ii) organization behavior.  
iii) organizational culture.  
iv) organization development.  

2

PART-A

Q.2  
a) Define ‘Leadership’. How can leadership be developed?  

10

b) What are the five basis of power of leadership?  

10

Q.3  
a) Differentiate Management from Leadership.  

10

b) Elaborate your leadership style. What are the basic traits a leader should have?  

10

Q.4  
a) Mention various trait and behavioral theories of leadership.  

10

b) Write short notes on any two of the following:  
   i) Situational and contingency theories of leadership.  
   ii) Functional Leadership theory.  
   iii) Information processing Leadership theory.  
   iv) Self leadership theory.  
   v) Transactional and Transformational theory of leadership.  

5×2

PART-B

Q.5  
a) What are the major functions of the manager in an organization?  

10

b) Discuss the challenges and opportunities for organizational behavior.  

10

Q.6  
a) What are Forces for and Resistances to change in an organization?  

10

b) Mention the various types of change in an organization.  

10

Q.7  
a) State Maslow's hierarchy of needs in an organization and its limitations.  

10

b) State Herzberg Two-Factor Theory of Motivation.  

10
End Semester Examination, Dec. 2017  
BCA – Fifth Semester  
E-COMMERCE (BCA-004(CB))

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Multiple choice questions:

a) Which is the most realistic relationship between e-commerce and e-business?
   i) E-business is a subset of e-commerce.  
   ii) E-commerce has no overlap with e-business.  
   iii) E-commerce is a different name for e-business.  
   iv) E-commerce is a subset of e-business  
   v) None of the above.

b) A computer system that permits multiple users to run programs at same time.
   i) Real time system.  
   ii) Multi programming system.  
   iii) Time sharing system.  
   iv) Multi-tasking system.

c) In which category of website the Amazon site belongs?
   i) Brand-building website.  
   ii) Relationship-building website.  
   iii) Media or publisher site.  
   iv) Transactional website.  
   v) All of the above.

d) Digital Signature is:
   i) Scanned Signature on Computer.  
   ii) Code number of the sender.  
   iii) Public Key Encryption.  
   iv) Software to recognize signature.

e) An e-business that allows consumer to name their own price for products and services is following which e-business model?
   i) B2B  
   ii) B2G  
   iii) C2C  
   iv) C2B

g) The method(s) of payment for online consumers is/are:
   i) Electronic cash.  
   ii) Credit/debit.  
   iii) Electronic check.  
   iv) All of the above.

g) In the e-commerce security environment, which of the following constitutes the inner-most layer?
   i) People.  
   ii) Data.  
   iii) Technology solutions.  
   iv) The digital product delivery.  
   v) Internet business model.

h) Which of the following is a cost efficiency driver for e-business?
i) Increasing speed with which goods can be despatched.
ii) Reduced sales and marketing costs.
iii) Reduced operating costs.
iv) Increasing speed with which supplies can be obtained.
v) All of the above.

i) An example of a cost-savings benefit from creating an e-commerce website is:
   i) Tracking of number of customers using different parts of site.
   ii) The ability to reach overseas markets without a sales presence.
   iii) Lower paper costs needed for marketing and fewer staff needed in contact centre.
   iv) More rapid response to customer enquiries.
   v) All of the above.

j) A collection of web services which facilitate certain behaviours online such as community participation and user generated content, rating and tagging is commonly known as:
   i) Facebook.
   iii) Web 2.0 concept.
   iv) Customer journey

**PART-A**

Q.2  a) What do you understand by the term E-Commerce? Explain the different drivers of E-Commerce.  
     b) Elaborate on the 4 C’s of E-commerce (Convergence, Collaborative Computing, Content Management and Call Center).  

Q.3  a) What are the different ways for E-Payment systems?  
     b) Why EFT has become so common these days? Explain by giving its benefits.  

**PART-B**

Q.5  a) Draw the block diagram of the components of B2B.  
     b) Mention the potential gains and risks in B2B exchanges  

Q.6  a) Where do we find the real usage of Knowledge engineering and data warehouse?  
     b) Elaborate ERP features and its capabilities.  

Q.7  a) Discuss various issues in Digital Economy and Success Factors in E commerce economically.  
     b) How can E-commerce be used effectively in small companies and virtual communities?
Q.1 Answer the following:
   a) CRT is a form of:
      i) Keyboard 
      ii) Mouse 
      iii) Monitor 
      iv) Mother board.
   b) Which of the following does not store data permanently?
      i) ROM  
      ii) RAM 
      iii) Floppy Disk 
      iv) Hard Disk.
   c) Which of the following is the smallest storage?
      i) Megabyte 
      ii) Gigabyte 
      iv) Terabyte 
      v) None of these.
   d) Discuss the advantages of first generation of computer.
   e) Write short note on compiler.
   f) CPU stands for ________.
   g) Laser is a type of ________.
   h) Give two examples of system software.
   i) Name the symbols of flowchart.
   j) Write short note on linkers.

   2x10

PART-A

Q.2 Define computer. Explain the characteristics and components of computer and also discuss the various generations of computers with its merits and demerits.  

   20

Q.3 Explain the following:
   a) Magnetic Disk.
   b) Types of ROM.
   c) Non Impact Printers.
   d) Flash Memory.  

   5x4

Q.4 a) Solve the following:
   i) $\frac{1AC}{16} = ?_{10}$
ii) \(\left(11001\right)_2 = ?_{10}\)

iii) \(\left(101110\right)_2 = ?_8\)

iv) \(\left(562\right)_8 = ?_{16}\)

v) \(\left(ABC\right)_{16} = ?_2\)

3x5

b) Discuss the classification of computer.

5

PART-B

Q.5

a) What is system software? Differentiate between compiler, assembler and interpreter.

b) What is an error? Discuss various types of errors.

Q.6

What is a flowchart? Describe all the symbols of flow chart and prepare an algorithm and draw the flow-chart of greatest of three numbers.

Q.7

Explain the following:

a) Pseudocode.
b) Decision Table.
c) Structured Programming.
d) Debugging.

5x4
End Semester Examination, Dec. 2017  
BCA — First Semester  
COMPUTER FUNDAMENTALS AND PROGRAMING IN ‘C’ (BCA-101)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 2  
Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. 
Q.1 is compulsory. Marks are indicated against each question.

Q.1 Answer the following: 
   a) List the components of computer hardware. 
   b) List same areas where computers are used. 
   c) What is a device driver? 
   d) Name an application where computer vision is used. 
   e) Name same applications when you can use a touch screen. 
   f) Name three kinds of control structures. 
   g) What is the difference between syntax error and semantic error? 
   h) What is the difference between primary and secondary memory? 
   i) What is the use of ? operator? 
   j) What is the difference between '=' and '=='? 

1½x10

UNIT-I

Q.2 Give differences between the following: 
   a) Input Unit and Output Unit. 
   b) Impact Printers and Non-Impact Printers. 
   c) Physical Mouse and Optical Mouse. 

5x3

Q.3 Explain briefly the use of computers in the following areas: 
   a) Education. 
   b) Advertising. 
   c) Government. 

5x3
UNIT-II
Q.4 Explain briefly the working of the magnetic tape. What is the significance of track and frame in a Magnetic Tape? 15

Q.5 a) What is the meaning of volatile memory? Also, give an example of volatile memory.
   b) List the features of DRAM Memory Chip.
   c) How are these different PROM, EPROM and EEPROM? 5x3

UNIT-III
Q.6 Create an infinite for loop. Check each value of for loop. If the value is odd, display it, otherwise continue with iterations. Print even numbers from 1 to 100. Use break statement to terminate the program. 15

Q.7 What is a loop? Why it is necessary in the program? How do you choose between while and for loop? Explain with the help of suitable example. 15

UNIT-IV
Q.8 What is the relation between an array name and an element number? How elements are referred, using base address? Also, explain multi-dimensional array? 15

Q.9 Write a program to enter five numbers using array and rearrange the array in the reverse order. For example - number enters are 1 2 8 4 7 and after arranging array elements must be 7 4 8 2 1. 15
End Semester Examination, Dec. 2017  
BCA - First Semester  
ELEMENTS OF MATHEMATICS (BCA-102 (CB))

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1  
a) Find AB if \[ A = \begin{bmatrix} 1 & 3 \\ 2 & 1 \end{bmatrix}, \quad B = \begin{bmatrix} 4 \\ -1 \end{bmatrix}. \]

b) Construct 2x2 matrix \( A = [a_{ij}] \) whose elements are given by \( a_{ij} = i + j \).

\[ A = \begin{bmatrix} a+3 & 2b-8 \\ c+1 & 4d-6 \end{bmatrix} = \begin{bmatrix} 0 & 6 \\ -3 & 4d \end{bmatrix}. \]

c) Find the value of a, b, c, d from the matrix \( A = \begin{bmatrix} a+3 & 2b-8 \\ c+1 & 4d-6 \end{bmatrix} \).

d) Evaluate: \( P(18, 2) \)

e) Evaluate: \( \log \sqrt{8} / \log 8 \)

f) Evaluate: \( \sin 50 \cos 10 + \cos 50 \sin 10 \)

g) Differentiate w.r.t. \( X : -5x^3 + 8x^2 - 7x + 10 \).

\[ \lim_{x \to 2} \frac{x^2 + 3x + 5}{x + 2}. \]
i) Find the value of $10^{150} \div 10^{146}$.

j) Find $x$ if $17^{3.5} \times 17^x = 17^8$.

2×10

PART-A

Q.2 a) Show that $A = \begin{bmatrix} 5 & 3 \\ -1 & -2 \end{bmatrix}$ satisfies the equation $x^2 - 3x - 7 = 0$ and hence find $A^{-1}$.

b) Using Cramer’s rule solves the following system of equations:

\begin{align*}
6x + y - 3z &= 5 \\
x + 3y - 2z &= 5 \\
2x + y + 4z &= -8
\end{align*}

10×2

Q.3 a) If $3^{x-y} = 27$ and $3^{x+y} = 243$, then find the value of $x$ and $y$.

b) If $x$ is positive number and equal to $\sqrt[6]{6 + \sqrt[6]{6 + \sqrt[6]{6 + \ldots}}}$, where the given expression extends to an infinite number of roots, then what is the value of $X$?

10

Q.4 a) How many 3 digits odd numbers can be formed from the digit 1, 2, 3, 4, 5, 6 when?

i) Repetition of digits is not allowed.

ii) Repetition of digits is allowed.

b) Find the coefficients of $x^4$ in $(x^4 + \frac{1}{x^{10}})^{15}$.

10

PART-B

Q.5 a) Prove that: $\sin A(1 + \tan A) + \cos A(1 + \cot A) = \sec A + \csc A$.

b) Prove that $\cos 20\cos 40\cos 60\cos 80 = \frac{1}{16}$.

10

Q.6 a) If $y = x + \sqrt{x - 1}$ prove that $(y - x) \frac{dy}{dx} - y = 0$.

b) For what value of $k$ is the following function continuous at $x = 2$.

\begin{align*}
f(x) &= \begin{cases} 
    x^2 - 4 &; x \neq 2 \\
    x - 2 &; x = 2
\end{cases}
\end{align*}

10

Q.7 Expand $\sin x$ and $\cos x$ in power of $x$ and hence find $\cos 18^\circ$ up to four decimal places.

20
End Semester Examination, Dec. 2017
BCA – First Semester
ELEMENTS OF MATHEMATICS (BCA-102)

Time: 3 hrs.  
Max Marks: 75
No. of pages: 2

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.
Q.1 is compulsory. All questions carry equal marks.

Q.1  
a) Define ‘infinite set’.
b) Write down all subsets of \{1, 3, 5\}.

c) Write first two terms of the sequences whose \(n^{th}\) terms are \(\frac{n^2}{3^n}\).
d) \(\sin(A + B) = \) __________
e) Write down the derivative of \(x^{10}\).
f) Integrate \(w.r.t.\) \(x\) : \(x^2\).
g) Evaluate \( \lim_{x \to -2} \frac{x^2 - 4}{x - 2} \).

h) Define ‘inverse element’.

i) Define ‘cartesian product of sets with an example’.

j) Define ‘ring’.

UNIT-I

Q.2 a) The third term of an A.P. is 25 and the tenth term is -3. Find the first term.

b) Let \( X = \{1,2,3,4,5\} \) and \( Y = \{1,2,5,6,7,9,10,11,12,13,14\} \).

Find the function defined by \( f(x) = 2x + 3 \). Find domain and range.

Q.3 a) Verify \( (A \cap B)' = A' \cup B' \) where:

\( A = \{2,3,4,5,6\} \) and

\( B = \{3,6,7,8\} \) are subsets of \( \cup = \{1,2,3,4,5,6,7,8\} \).

b) If \( A = \{1,2,4\} \) and \( B = \{2,3\} \), what are \( A \cap B \) and \( A \cup B \)?

UNIT-II

Q.4 a) Prove that: \( \sqrt{\sec^2 \theta + \cos ec^2 \theta} = \tan \theta + \cot \theta \)

b) Prove that: \( \sin A(1 + \tan A) + \cos A(1 + \cot A) = \sec A + \cos ec A \).

Q.5 a) Evaluate: \( \cos 70^\circ \cos 10^\circ + \sin 70^\circ \sin 10^\circ \)

b) Prove that: \( 2 \tan^{-1} \frac{1}{3} + \tan^{-1} \frac{1}{7} = \frac{\pi}{4} \)

UNIT-III

Q.6 a) Differentiate \( w.r.t. x: (2x + 3)^5 (3 - x)^4 \)

b) If \( y = (x^2 + 1)^2 \sqrt{2x - 5} \), find \( \frac{dy}{dx} \).

Q.7 a) Find second derivatives of:

\( ax^3 + bx^2 + cx + d \)

b) If \( x = 4z^2 + 5, y = 6z^2 + 7z + 3 \)

Find \( \frac{d^2 y}{dx^2} \).

UNIT-IV

Q.8 a) Evaluate: \( \int \frac{x^4 + 1}{x^2 + 1} \, dx \)

b) Solve the following differential equation:

\( ydx - xdy = xy \, dx \)

Q.9 Define: Fields and vector spaces with simple examples.
Q.1 Answer the following:
   a) MBR stands for ____________.
   b) DPI stands for ____________.
   c) BIOS stands for ____________.
   d) AGP stands for ____________.
e) PCI stands for _______________.  
f) BRD stands for _______________.  
g) UART stands for ______________.  
h) CMOS stands for ___________.  
i) POST stands for _____________.  
j) Laserjet is a type of_________ printer.  

**PART-A**

Q.2 Name 10 hardware component of a modern day PC. Also, define the working of each hardware component.  

Q.3  
a) Write the 10 unique features of Intel i9 processor.  
b) Compare Intel Pentium IV and Celeron processor.  

Q.4  
a) Explain the organization of hard-disk. Also, explain the working of each component.  
b) What do you mean by super controller?  

**PART-B**

Q.5  
a) What is bootstrap loader? Write the complete booting sequence.  
b) Explain the concept of north and south bridge.  

Q.6  
a) What are plug-and-play devices? Why these devices are preferred over other types of devices?  
b) Name five types of security threats to computer data.  
c) List 5 ways by which the security of data can be enhanced.  

Q.7  
a) How SMPS helps in protecting the hardware devices?  
b) Explain the USB architecture.  

**End Semester Examination, Dec. 2017**  
BCA - First Semester  
FUNDAMENTALS OF C PROGRAMMING (BCA-104 (CB))

Time: 3 hrs  
Max Marks: 100  
No. of pages: 1

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory**. Attempt any **TWO** questions from **Part-A** and **TWO** questions from **Part-B**. Each question carries equal marks.

Q.1  
a) `# include` is called ________ directive.  
i) Preprocessor  ii) Inclusion  iii) None of these.  
b) Set of consecutive memory locations is called as ___________.  
i) Function  ii) Loop  iii) Array  iv) None of these.  
c) A variable declared outside a function is called ________.
d) Which operators are used to compare the values of operands to produce logical values in C language?
e) Which symbol is used as a statement terminator in C language?
f) The case keyword is followed by integer and _______ values.
g) Name the loop that executives atleast once.
h) What value strcmp ( ) function returns when two strings are same?
i) _______ header file is required when using general utility functions.
j) Define ‘variable’.

**PART-A**

Q.2 a) Write C assignment statements to evaluate the following:

i) Energy=mass

\[
\text{acceleration} \times \text{height} + \frac{(\text{velocity})^2}{2}
\]

\[
= \sqrt{\frac{1}{L} - \frac{R^2}{4C^2}}
\]

ii) Frequency

\[
= \frac{-b + \sqrt{b^2 - 4ac}}{2a}
\]

iii) root 1

b) Discuss and explain the C program structure and define the ‘keywords’.

Q.3 a) Write a program in C to find factorial on \( n \) numbers.

b) Discuss the format and purpose of the following with examples:
- nested-if statement
- While loop

Q.4 a) Define ‘array’. Discuss and explain how two-dimensional arrays are declared and initialized in C with examples.

b) Write and explain any two string handling functions in brief.

**PART-B**

Q.5 a) What is significance of * and & operator? Explain with a suitable example.

b) Differentiate between the following:
- static and dynamic memory.
- calloc ( ) and malloc( )

Q.6 a) Write a short note on ‘recursion’.

b) Write a short note on ‘structure and union’.

Q.7 a) Write a short note on ‘storage classes’.

b) Explain the following with their syntax, purpose and examples of each:
- fprintf ( )
- rewind( )
Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.
Q.1 Fill in the blanks:
   a) Each 8-bit binary group is called a _________.
   b) Binary codes are classified as ________ codes and ________ codes.
   c) ________ code can, not only detect errors but also correct them.
   d) The De Morgan’s theorem states that ________.
   e) (11001)₂ – (01101)₂ = ________.
   f) An n variable k-map can have ________ cell or square.
   g) The ________ gate is a basic comparator.
   h) A decimal-to-BCD encoder is a ________ line to ________ line encoder.
   i) Flip-Flop can store ________.
   j) A set of flip-flops used to simply store binary data is called ________.2×10

PART-A

Q.2 a) Convert the following:
   i) (163.875)₁₀ = (           )₂
   ii) (2056)₈ = (           )₁₀
   iii) (3956)₁₀ = (           )₈
   iv) (1011011011)₂ = (           )₁₆
   v) (2EB7)₁₆ = (           )₁₀ 2×5
   b) The message 0011011 is coded in the 7-bit Hamming code is transmitted through a noisy channel. Decode the message, assuming that at most, a single error occurred in code word. 10

Q.3 a) Simplify the following Boolean expressions to a minimum number of literals:
   i) \[ \overline{A} + C \overline{C} \overline{A} + B \overline{CD} \]
   ii) \[ ABCD + A + AB \overline{D} \overline{D} \overline{AB} \overline{C} \]
   b) Draw the logic diagram, using only two input NAND gates to implement the following expression:
   \[ F = \overline{AB} + \overline{A} \overline{B} \overline{C} \overline{D} + CD \] 5×2

Q.4 Perform the following using K-map and draw the circuit diagram.
   a) \[ \sum m \{5,6,7,9,10,11,13,14,15\} \]
   b) \[ \sum m \{1,3,5,6,7\} \] 10×2

PART-B

Q.5 a) With the help of a logic diagram and a truth table, explain a BCD-to-decimal decoder. 10
   b) Design an Even Parity Bit Generator for a 4-bit input. 10

Q.6 a) Draw a 4-bit parallel-in, serial-out, shift register. 10
   b) Differentiate between ‘synchronous’ and ‘asynchronous counter’. 10

Q.7 Write short notes on:
   a) Virtual Memory and Cache Memory. 10×2
   b) Volatile and Non-Volatile Memory.
End Semester Examination, Dec. 2017
BCA — Second Semester
DATA STRUCTURE (BCA-201)

Time: 3 hrs.  
Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. Q.1 is compulsory. Marks are indicated against each question.
Q.1 State whether the following statements are **TRUE** or **FALSE**:

a) Primitive and non-primitive are the two categories of data structure.

b) There is no beginning and ending of circular queue.

c) Insertion operation in stack is known as pop function.

d) We cannot delete an element from the beginning in a link list.

e) Binary search use divide and conquer policy.

f) A disadvantage of linear probing is the tendency for clustering.

g) Selection sort is better than quick sort in terms of complexity.

h) In array memory is allocated at run time.

i) We get the value in ascending order while we find the preorder traversal of a BST.

j) The number of interchange required to sort 5 numbers in bubble sort is 10.

1½×10

**UNIT-I**

Q.2 Explain following terms:

i) Time and space complexity.

ii) Address calculation in an array.

iii) Stack.

5×3

Q.3 Write a program to implement linear queue using array.

15

**UNIT-II**

Q.4 What do you understand by link list? Explain different application of stack.

15

Q.5 Differentiate following:

a) Inorder and preorder traversal.

b) Left threaded and Right threaded tree.

c) Binary tree and binary search tree.

5×3

**UNIT-III**

Q.6 Write an algorithm to implement merge sort.

15

Q.7 Sort the following numbers using selection sort:

(11, 30, 46, 35, 15, 19, 82, 25, 41)

15

**UNIT-IV**

Q.8 What do you understand by file organization? Explain basic file operations.

15

Q.9 Explain different type of collision handling technique.

15

---

End Semester Examination, Dec. 2017

BCA - Second Semester

MATHEMATICAL FOUNDATION OF COMPUTER SCIENCE (BCA-202)

Time: 3 hrs  
Max Marks: 75

No. of pages: 2
Note: Attempt **FIVE** questions in all; **taking at least ONE question** from each Unit.  
**Q.1 is compulsory.** All questions carry equal marks.

**Q.1** Answer the following:
- a) State and prove commutative law in Set theory.
- b) What are the steps to draw a Hasse Diagram?
- c) What is LHRRWCCs? Give example.
- d) Define the following:
  - i) Directed graph.
  - ii) Degree of a vertex.
  - iii) An edge.
- e) Write the following set in tabular form:
  $$ A = \{ x : x^2 = 9, x \text{ is even} \} $$

**UNIT-I**

**Q.2**
- a) Prove \(1 + 3 + 5 + \ldots + (2n-1) = n^2\) by mathematical induction \((n \geq 1)\).
- b) In a class of 25 students, 12 students have taken Economics; 8 have taken Economics but not Maths. Find:
  - i) The number of students who have taken Economics and Maths.
  - ii) Those who have taken Maths but not Economics.

**Q.3**
- a) Let \(P\) and \(Q\) be the relations on \(A = \{1, 2, 3, 4\}\) defined by
  $$ P = \{(1, 2), (2, 2), (2, 3), (2, 4), (3, 2), (4, 2), (4, 3), (4, 4)\} $$
  $$ Q = \{(2, 2), (2, 3), (2, 4), (3, 3), (3, 4), (4, 1), (4, 2), (4, 3)\} $$
  Find:
  - i) \(POP\)
  - ii) \(POQ\)
  - iii) \(POPOQ\)
- b) Find the GCD of 258 and 12 and find the value of \((a)\) and \((b)\) in the following expression:
  $$ \text{GCD}(258, 12) = 258a + 12b $$

**UNIT-II**

**Q.4**
- a) Draw the Hasse Diagram of Lattice ‘\(D_{30}\)’. Also, find all Boolean sub-algebra of ‘\(D_{30}\)’ having atleast four element.
- b) Determine the disjunctive normal form of the following expression:
  $$ x \lor (y \land z) $$

**Q.5**
- a) Discuss various types of Lattices alongwith suitable examples.
- b) If \(f(x, y, z) = (x \lor y) \land (x \lor \bar{y}) \land (\bar{x} \lor z)\) be a given Boolean function, determine its DN form.

**UNIT-III**

**Q.6**
- a) Solve the difference equation:
  $$ 9a_r - 6a_{r-1} + a_{r-2} = 0 $$
  satisfying the conditions \(a_0 = 0\) and \(a_1 = 2\).
- b) Find the equation of the line passing through \((0, -1)\) and perpendicular to the line joining the points \((0, 1)\) and \((3, 5)\).
Q.7  a) Solve the difference equation: 
\[ 9a_r - 6a_{r-1} + a_{r-2} = 0 \]
and find particular solution such that \( a_0 = 0 \) and \( a_1 = 2 \). 

b) Find the equation of the straight line passing through (3, -5) and parallel to the line joining the points (1, 2) and (-3, 4).

7

UNIT-IV

Q.8  a) Solve the difference equation 
\[ 2a_r - 5a_{r-1} + 2a_{r-2} = 0 \]
and find particular solution such that \( a_0 = 0 \) and \( a_1 = 1 \).

b) Find the equation of line through (3, 4) and having slope 5.

7

Q.9  a) Define the following:
   i) Path length.
   ii) Multigraph.
   iii) Weighted graph.
   iv) Adjacent vertices.
   v) Odd vertex.

b) Draw all the spanning trees of the graph (G):

2x5

Q.10  Find the shortest path between a and z in the graph:

5
End Semester Examination, Dec. 2017
BCA – Second Semester
DATA STRUCTURES USING ‘C’ (BCA-203 (CB))

Time: 3 hrs. Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Fill in the blanks:
a) Two non-primitive data types are ________ and ________. 2
b) Information is defined as ________. 2
c) Two examples of non-linear data structures are ________ and ________. 2
d) Two applications of stack are ________ and ________. 2
e) Priority queue is defined as ________. 2
f) Explain the term graph. 2
g) BFS stands for ________. 2
h) Draw a complete binary tree. 3
i) Give an example of directed graph. 3

PART-A

Q.2 a) Explain the representation of array in memory. 10
b) Explain the linear search algorithm with the help of an example. 10

Q.3 a) What is queue? Explain all the operations on queue using suitable examples. 10
b) Sort the following array A using quick sort algorithm.
   A = {44, 33, 11, 55, 77, 90, 40, 60, 99, 22, 88, 66} 10

Q.4 a) Write a program in ‘C’ to insert and delete an element at the end of the linked list. 10
b) Convert the following infix expression into its equivalent postfix expression, using stacks:
   A+\left[ B*\left( C-D/E \right) \right] F*G*H 10

PART-B

Q.5 a) Explain the term Tree and its representation in memory. 10
b) Explain with the help of an example how an element can be deleted in a Binary Search Tree. 10

Q.6 Explain the following terms:
a) Edge in a graph. 5×4
b) Out-degree of a node in a graph.
c) In-degree of a node in a graph.
d) Loop in a graph.

Q.7 Apply and explain each and every step of Bubble Sort algorithm on the following array A:
End Semester Examination, Dec. 2017
BCA - Second Semester
PROGRAMMING IN VISUAL BASIC (BCA-203)

Time: 3 hrs. Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.
Q.1 is compulsory. All questions carry equal marks.

Q.1 Fill in the blanks:
   a) IDE stands for ________.
   b) Two disadvantages of using VB are __________.
   c) A project in VB is saved with the extension ________.
   d) Two loop statements available in VB are ________ and ________.
   e) Continue statement is used to ________.
   f) Two examples of string functions are ________ and ________.
   g) Two important properties of list box are ________ and ________.
   h) DAO stands for ________.

UNIT-I

Q.2 Explain the following terms:
   a) Tool box.
   b) Tool bar.
   c) Properties window.

Q.3 Explain all the components of VB IDE (Integrated development environment) in detail.

UNIT-II

Q.4 Differentiate between:
   a) Do statement and for statement
   b) Local variable and global variable.
   c) If statement and if else If statement.

Q.5 Explain five string functions and five mathematical functions available in VB with the help of some examples.

UNIT-III

Q.6 Write short notes on the following:
   a) Combobox.
   b) Array.
   c) Frame control.

Q.7 Explain in detail the method of creating control array of list boxes.

UNIT-IV
Q.8 Explain in detail the properties required to be set for DAO to connect a textbox on a VB form to an attribute in a table in MS Access database.

Q.9 Explain all the features of Crystal Report in VB.

**End Semester Examination, Dec. 2017**

BCA – Second Semester

DATABASE MANAGEMENT SYSTEM (BCA-204 (CB))

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 1

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt any **TWO** questions from **PART-A** and **TWO** questions from **PART-B.** Each question carries equal marks.

Q.1  
a) Write the name two types of Data Dictionaries.  
b) What is full form of SQL?  
c) DML stands for ________.  
d) Give an example of derived attribute.  
e) Define ‘data independence’.  
f) What is multivalued attribute?  
g) Define ‘transitive dependency’.  
h) Differentiate between ‘schema’ and ‘subschema’.  
i) Write a query to retrieve the records from table.  
j) What is deadlock?  

**PART-A**

Q.2  
a) Write the following queries using following schema.  
Student (student-Id, student-Name, Address, Gender, Course, Percentage)  
i) Insert five records in student table.  
ii) List all the students who are enrolled in course “BCA”?  
iii) Update the record of student whose roll no is 3 from BCA to MCA.  
iv) Add column “Age” to table.  
v) List the order of students from higher percentage to lower percentage.  

b) Explain three architecture of DBMS.  

Q.3  

b) Differentiate network, Hierarchical and E-R data model.  

Q.4  
Write short notes on:  
a) Primary key.  
b) Foreign key.  
c) Union.  
d) Minus.  
e) Intersect.  

**PART-B**

Q.5  
What is normalization? Explain 1st, 2nd and 3rd normal forms with suitables.

Q.6  
Write short notes on:  
a) Deadlock detection.
Q.7 What is distributed database? What are the advantages and disadvantages of using distributed databases? Explain the architecture of distributed databases with suitable diagram. 20
Q.7 Write short notes on:
  a) Memory hierarchy.
  b) Subroutines.  

UNIT-IV

Q.8 Differentiate between:
  a) I/O and memory bus.
  b) Isolated input output and memory mapped input output.  

Q.9 What are asynchronous based data transfer? Explain handshaking based data transfer.  

End Semester Examination, Dec. 2017
BCA – Second Semester
INTERNET TECHNOLOGIES (BCA-205 (CB))

Time: 3 hrs.  Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Fill in the blanks:
  a) To join the internet, the computer has to be connected to a _________.
  b) A domain name ending with .org is _________.
  c) The name given to a temporary storage area that a web browser uses to store pages and graphics that it has recently used are _________.
  d) DNS is _________.
  e) The equipment needed to allow home computers to connect to the internet is called a _________.
  f) The first network that planted the seeds of internet was _________.
  g) ________ programs are automatically loaded and operate as a part of browser.
  h) Key logger is a _________.
  i) The altering of data so that it is not usable unless the changes are undone is _________.
  j) An attempt to make a computer resource unavailable to its intended users is called _________.  

Write short notes on:
  k) HTTP.
  l) Harking.
  m) Copyright Laws.
  n) Hierarchical Routing.  

PART-A

Q.2 What are web browsers? Explain the features of a web browser taking example of any browser of your choice.  

Q.3 a) Write down the different steps required to create an email account.  
   b) Are Meta search engines better than traditional search engines? Justify your answer with suitable examples.  

Q.4 a) Explain the working of DNS.  
   b) Explain the DHCP protocol.
**PART-B**

Q.5 What do you understand by the word “Netiquette”? Explain the common ethical rules which need to be followed on the internet.  

Q.6 What is Harking? Explain the various passive and active scanning techniques.  

Q.7 a) What are cyber laws? How can they administer cyber security?  
   b) What are the secure browser settings through which we can protect ourselves from the unauthorized access?  

---

**End Semester Examination, Dec. 2017**  
**BCA - Second Semester**  
**WORKSHOP IN EVS (BCA-206)**  

Time: 3 hrs  
Max Marks: 50  
No. of pages: 2  

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory**. Attempt any **TWO** questions from **Part-A** and **TWO** questions from **Part-B**. Each question carries equal marks.

Q.1 **Choose the correct option:**

a) Ozone depletion in the stratosphere will cause:
   i) Forest fires  
   ii) Increased incidence of skin cancer  
   iii) Global warming  
   iv) None of these

b) **The ozone hole appears in Antarctica during:**
   i) Late winter  
   ii) Peak summer  
   iii) Early winter  
   iv) Autumn

c) **The number of babies produced per thousand individuals is called:**
   i) Natality  
   ii) Mortality  
   iii) Immigration  
   iv) Emigration

d) World Environment Day is celebrated on:
   i) June 01  
   ii) May 11  
   iii) June 05  
   iv) July 11

e) IPCC stands for:
   i) Indian Panel on Climate Change.  
   ii) Intergovernmental Panel on Climate Change.  
   iii) International Panel on Climate Change.  
   iv) None of these.

f) A population is a group of:
   i) Individuals in a species.  
   ii) Species in a community.  
   iii) Communities in an ecosystem.  
   iv) Individuals in a family.

g) Gas leaked in Bhopal gas tragedy:
   i) Potassium isothiocyanate.  
   ii) Sodium isothiocyanate.  
   iii) Ethyl isocynate.  
   iv) Methyl isocynate.

h) The carrying capacity of a population is determined by:
   i) Population growth rate.  
   ii) natality  
   iii) Mortality  
   iv) Limiting resources.

i) Human population growth curve is:
   i) Sharped curve.  
   ii) Parabola curve.
iii) J shaped curve. iv) Zig zag curve.

j) Lichens are an indicator of:
   i) Air pollution      ii) Water pollution
   iii) Soil pollution   iv) Noise pollution.

1x10

**PART-A**

Q.2 Write short note on (any two) of the following:
   a) Deforestation.
   b) Food chain and food web.
   c) Biodiversity and megadiversity zones

Q.3 a) Write in detail the soil pollution control methods.
    b) Give an example of a food chain in an aquatic ecosystem (eg. Of pond or river)

Q.4 Define ‘endangered species’. What kind of threats to the biodiversity may lead to its loss?

**PART-B**

Q.5 Define ‘biodiversity’. Explain the threats and causes of loss of biodiversity.

Q.6 Give accounts of (any two) of the following:
   a) In-situ and ex-situ conservation.
   b) Biodiversity at the national and local level.
   c) Biogeographical classification of India.

Q.7 Explain the types of disaster with its effects and control measures of:
   a) Landslides.
   b) Floods.
End Semester Examination, Dec. 2017  
BCA - Third Semester  
NUMERICAL ANALYSIS AND STATISTICAL TECHNIQUES (BCA-301(CB))

Time: 3 hrs  
Max Marks: 100  
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
  a) Obtain the value of Median from the following data of the monthly income of 10 employees of a company in Rs:
     14391; 15384; 25591; 15407; 16672; 26522; 16777; 26753; 27850; 37490.
  b) Find Mode in terms of Median and Mean.
  c) Define correlation.
  d) The Mean of binomial in 20 and standard deviation is 4. Calculate P and Q.
  e) Construct the backward difference table of the following:
     \[\begin{array}{c|c|c|c|c|}
     X & 0 & 1 & 2 & 3 \\
     Y & 1 & 2 & 1 & 10 \\
     \end{array}\]
  f) Find absolute error if 1.414 is used as an approximation to \[\sqrt{2}\].
  g) What do you mean by random sampling?
  h) In R.K method of 4\textsuperscript{th} order
     \[K_3=\quad\text{and } K_4=\quad\text{.}\]
  i) What is probability?
  j) The root of equation \[x^3-2x-5\] lies between ____________.

2x10

PART-A

Q.2 a) Use Newton Raphson Method to evaluate \[\sqrt{2}\] correct to 2 decimal places.  
  b) Using suitable formula, find \(f'(0.5)\) and \(f'(2.5)\) if:
     \[\begin{array}{c|c|c|c|c|}
     X & 0 & 1 & 2 & 3 \\
     f(x) & 1 & 2 & 1 & 10 \\
     \end{array}\]

Q.3 a) Find the missing value of the following table:
b) Using Euler's Method to solve \( \frac{dy}{dx} = x + y; \ y(0) = 0 \), choosing \( n = 0.2 \), find \( y(1.0) \).

Q.4  

a) Fit a straight line if:

<table>
<thead>
<tr>
<th>X</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>3</td>
<td>4</td>
<td>6</td>
<td>9</td>
<td>12</td>
</tr>
</tbody>
</table>

\[ \frac{1}{2} \int_0^1 \frac{1}{1+x} \, dx \ dy \]

b) Evaluate by:

i) Trapezoidal Rule.

ii) Simpson's \( \frac{1}{3} \) Rule.

Q.5  

Calculate the Karl Pearson's coefficient of correlation from the following data and interpret its value:

<table>
<thead>
<tr>
<th>Roll No. of student:</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marks in Accountancy:</td>
<td>48</td>
<td>35</td>
<td>17</td>
<td>23</td>
<td>47</td>
</tr>
<tr>
<td>Marks in statistics:</td>
<td>45</td>
<td>20</td>
<td>40</td>
<td>25</td>
<td>45</td>
</tr>
</tbody>
</table>

Q.6  

a) The incidence of a certain disease is such that on the average 20% of workers suffer from it. If 10 workers at random suffer from, find the probability that:

i) Exactly two workers suffer from the diseases.

ii) Not more than two workers suffer from the diseases.

b) Find the Binomial distribution to which mean is 4 and variance is 3.

Q.7  

Explain the following:

a) Quota Sampling.

b) Stratified Sampling.

10x2
End Semester Examination, Dec. 2017  
BCA – Third Semester  
MATHEMATICS-II (BCA-301)

Time: 3 hrs.  
Max Marks: 75

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.  
Q.1 is compulsory. All questions carry equal marks.

Q.1 Answer the following:

a) Define a Non-singular Matrix.

b) Solve: $^{25}C_{10}$.

c) Give an example of a Diagonal Matrix.

d) What is a Real Sequence?

e) Explain G.L.B.

f) Write Maclaurin’s Series.

g) If “$C_3 = C_7$”, find $n$.

h) Find the value of $\frac{11}{18}$.

i) Expand $(2b+3a)^3$.

j) Find $\begin{pmatrix} 90 & 13 \\ -10 & 11 \end{pmatrix}$.

UNIT-I
Q.2  

a) If 
\[
A = \begin{bmatrix} 2 & 3 \\ 3 & 2 \\ 1 & 4 \end{bmatrix} \quad \text{and} \quad B = \begin{bmatrix} 3 & 1 \\ 0 & 5 \\ -1 & 2 \end{bmatrix}
\]
then find the matrix \(x\) for which \(A + B - X = 0\).

b) Evaluate:
\[
\begin{bmatrix} 2 & 0 & 1 \\ 3 & 2 & 1 \end{bmatrix} \begin{bmatrix} 6 \\ 4 \\ 2 \end{bmatrix}.
\]

Q.3  

a) Solve the following equations using Cramer’s Rule:
\begin{align*}
5x + 2y &= 3 \\
3x + 2y &= 5
\end{align*}

b) In how many ways can four different books, one each in Chemistry, Physics, Biology, and Mathematics be arranged in a shelf?

**UNIT-II**

Q.4  

a) Prove that every subset of a countable set is countable.

b) Prove that the set of all rational numbers is countable.

Q.5  

a) Prove that least upper bound of a set if it exists is unique.

b) Give an example of a bounded set which contains its g.l.b. but it does not contain the l.u.b.

**UNIT-III**

Q.6  

a) Prove that every convergent sequence is bounded but not conversely.

b) By definition, show that the sequence \(\left\{ \frac{1}{2^n} \right\}\) converges to \(0\).

Q.7  

a) State and prove ‘Monotone Convergence Theorem’.

b) Show the series \(\sum_{n=1}^{\infty} (-1)^n\) oscillates.

**UNIT-IV**

Q.8  

a) Evaluate \(\lim_{x \to 0} \frac{x - \tan x}{x^3}\) by L’Hospital’s Rule.

b) Expand \(\log(1 + x)\) in powers of \(x\) by Maclaurin’s theorem.

Q.9  

a) Show that \(\lim_{x \to 0} \frac{e^x + \log\left(\frac{1-x}{e^2}\right)}{\tan x - x} = \frac{-1}{2}\).

b) If \(f(x) = x^3 + 2x^2 - 5x + 11\), find the value of \(f\left[\frac{9}{10}\right]\) with the help of Taylor’s Series.
Q.1 Multiple choice questions:

a) Which of the following is not a type of constructor?
   i) Copy constructor
   ii) Friend constructor
   iii) Default constructor
   iv) Parameterized constructor

b) Which of the following statements is correct?
   i) Base class pointer cannot point to derived class.
   ii) Derived class pointer cannot point to base class.
   iii) Pointer to derived class cannot be created.
   iv) Pointer to base class cannot be created.

c) One can use C++ as a procedural, as well as an object-oriented, language.
   i) True
   ii) False
   iii) May be
   iv) None of above

d) Which of the following type of class allows only one object of it to be created?
   i) Virtual class
   ii) Abstract class
   iii) Singleton class
e) Which of the following is not the member of class?
   i) Static function
   ii) Friend function
   iii) Const function
   iv) Virtual function

f) Which of the following term is used for a function defined inside a class?
   i) Member Variable
   ii) Member function
   iii) Class function
   iv) Classic function

h) How many instances of an abstract class can be created?
   i) 1
   ii) 5
   iii) 13
   iv) 0

i) Which of the following cannot be friend?
   i) Function
   ii) Class
   iv) Object
   iv) Operation function

j) Cout is a/an ________.
   i) Operator
   ii) Function
   iii) Object
   iv) Macro

\[ 1\frac{1}{2} \times 10 \]

**UNIT-I**

Q.2  
   a) Explain all the features of OOPs in detail.  \[ 10 \]
   b) What is procedural programming? Compare between procedural and object oriented programming.  \[ 5 \]

Q.3 Write short notes on:
   a) Dynamic Binding  \[ 5 \]
   b) Static Binding  \[ 5 \]
   c) calloc( ) and malloc ( )  \[ 5 \]

**UNIT-II**

Q.4  
   a) Write a program in C++ for sorting one dimensional array.  \[ 10 \]
   b) What is inline function?  \[ 5 \]

Q.5  
   a) Write different access specifiers such as public, private and protected with the help of a program.  \[ 10 \]
   b) Write a program in C++ to reverse string.  \[ 5 \]

**UNIT-III**

Q.6  
   a) What does the “this” pointer points to?  \[ 5 \]
   b) What is virtual function and why it is so called. Give an example.  \[ 5 \]
   c) What are virtual destructors?  \[ 5 \]

Q.7 Write a program for binary operator overloading.  \[ 15 \]

**UNIT-IV**

Q.8  
   What are different forms of inheritance? Explain with an example.  \[ 15 \]

Q.9  
   Write an example to explain the concept of exception handling. Explain the complete exception handling mechanism with an example.  \[ 15 \]
End Semester Examination, Dec. 2017  
BCA — Third Semester  
OBJECT ORIENTED PROGRAMMING USING C++ (BCA-302CB)

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 State whether the statement are TRUE/FALSE. Support your answer with a suitable reason.
   a) Declaration of variable can be done anywhere in the program in C++.
   b) For loop and while loop are pre-test loops.
   c) It is possible to overload constructors.
   d) Function overriding is possible only in inheritance.
   e) If both derived and base class are having constructors, base class constructor is executed first.
   f) The Try block immediately follows the Catch block.
   g) A function must have at least one argument.
   h) Main ( ) is a user defined function.
   i) An array is used to refer to multiple memory locations having the same name.
   j) A pointer is a variable.  

\[2 \times 10\]

PART-A

Q.2 Explain in detail all the major features of C++ language.  

20
Q.3  
a) Define a function. What is the need for functions?  
b) Differentiate between call-by-value and call-by-reference, using suitable examples.

Q.4  
a) What are static data members? Why are they needed?  
b) Explain how friend functions are a threat to data hiding.

**PART-B**

Q.5  
Why a constructor is called a special member function? Give suitable examples in support of your answer.

Q.6  
Explain the concept of unary operator overloading, using suitable examples.

Q.7  
Explain the following:  
a) Exception.  
b) Formatted I/O operations.  
c) Function overloading.  
d) Pure virtual function.

---

**End Semester Examination, Dec. 2017**

**BCA – Third Semester**

**INTRODUCTION TO OPERATING SYSTEM (BCA-303 (CB))**

**Time:** 3 hrs.  
**Max Marks:** 100  
**No. of pages:** 1

**Note:** Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt any **TWO** questions from **PART-A** and **TWO** questions from **PART-B.** Each question carries equal marks.

**Q.1**  
Answer the following:  
a) An operating system manages _______.  
b) Real time systems are _______.  
c) A shell is _______.  
d) _______ is an interface between process and operating system.  
e) The number of processes completed per unit time is called _______.  
f) A major problem with priority scheduling is _______.  
g) A critical section is _______.  
h) The value of semaphore is initialized to _______.  
i) Four necessary conditions for deadlocks are _______.  
j) Paging is _______.  

**PART-A**

**Q.2**  
Define operating system. Elaborate the various functions performed by an operating system.
Q.3  a) Differentiate between process and program. Explain the various components of Process Control Block (PCB).  
   b) Describe, with example, all the necessary conditions for a deadlock to occur.  

Q.4  Let us consider four processes with following information:  

<table>
<thead>
<tr>
<th>Process</th>
<th>CPU Time</th>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>P1</td>
<td>12</td>
<td>4</td>
</tr>
<tr>
<td>P2</td>
<td>10</td>
<td>2</td>
</tr>
<tr>
<td>P3</td>
<td>5</td>
<td>3</td>
</tr>
<tr>
<td>P4</td>
<td>2</td>
<td>1</td>
</tr>
</tbody>
</table>

Assume arrival time for each process as zero. Calculate average wait time and turnaround time for FCFS, SJF, Priority and Round Robin (TQ = 4).  

**PART-B**  

Q.5  a) Explain the steps that need to be taken when a page fault occurs in virtual memory system with the help of a neat diagram.  
   b) Explain different fitting techniques to fit the process of 100k, 250k, 150k, 300k and 120k into the memory chunks of 200k, 300k, 100k, 90k and 180k (in order). Calculate internal and external fragmentation in each case.  

Q.6  Define page replacement. Consider the following reference string: 5, 1, 2, 3, 4, 2, 1, 3, 4, 5, 3, 1. How many page fault would occur for the following page replacement algorithm, assuming three frames. All frames are initially empty:  
   a) LRU  
   b) FIFO  
   c) OPTIMAL  

Q.7  Define Disk Scheduling. Explain any two Disk Scheduling algorithms, with suitable example and neat diagrams.
Q.1 Answer the following questions:
   a) Define data independence.
   b) Write the syntax of ‘SQL SECECT’ statement.
   c) What is surrogate key?
   d) A database has data and relationships.  
      (True/False)
   e) Microsoft Access is an enterprise-class database product.  
      (True/False)
   f) In a relational model, relations are termed as:
      i) Tuples
      ii) Attributes
      iii) Tables
      iv) Rows
   g) Count function in SQL returns the number of ________.
   h) It is possible to define a schema completely using DDL and DML.  
      (True/False)
   i) The statement in SQL which allows to change the definition of a table is 
      ________.
   j) The full form of DDL is _________.  
      \[1\frac{1}{2} \times 10\]
UNIT-I
Q.2 Write short notes on the following:
   a) Three level architecture of DBMS.  
   b) E-R Diagrams. 
   c) Applications of DBMS. 5×3
Q.3 a) Explain in detail about database management system advantages over file management system. 10
   b) Discuss, in detail, the concept of data independence. 5

UNIT-II
Q.4 Explain the following:
   a) Key constraints. 
   b) Integrity constraints. 7½×2
Q.5 a) Differentiate between where clause and group by clause, with examples. 10
   b) Explain the different data types in SQL. 5

UNIT-III
Q.6 Explain, in detail, 3NF, 4NF and BCNF with suitable examples. 15
Q.7 What is functional dependency? How it is different from fully functional dependency? Explain all types of functional dependencies with their properties. 15

UNIT-IV
Q.8 Differentiate between the following:
   a) Distributed database and Relational database. 
   b) Query processing and Optimization. 
   c) Database security and its recovery. 5×3
Q.9 Explain the timestamp based protocol for concurrency control in DBMS. 15
Q.1 Answer the following:
   a) HTML is what type of language:
      i) Scripting language.      ii) Markup language.
      iii) Programming language. iv) Network protocol.
   b) Who is known as father of www:
      i) Robert Cailliau       ii) Tim Thompson
      iii) Charles Darwin     iv) Tim Berners-Lee
   c) What should be the first tag of HTML:
      i) <head>             ii) <title>
      iii) <html>           iv) <document>
   d) How can you make bulleted list with numbers:
      i) <dl>               ii) <OL>
      iii) <list>           iv) <ul>
   e) Which of the following is not a browser:
      i) Microsofts Bing    ii) Nescape Navigator
iii) Mozilla Firefox  iv) Opera
f) Which HTML tag produces the biggest heading:
   i) <h7>  ii) <h9>
   iii) <h4>  iv) <h1>
g) What does CSS stand for:
   i) Creative style sheets.  ii) Colourful style sheets.
   iii) Cascading style sheets.  iv) Computer style sheets.
h) HTML uses:
   i) User defined tags.  ii) Pre-specified tags.
   iii) Fixed tags defined by language.  iv) Tags only for linking.
i) Which of the following is correct JavaScript syntax to write “Hello World”:
   i) system.out.println (“Hello World”).
   ii) println (“Hello World”)
   iii) document.write (“Hello World”).
   iv) response.write (“Hello World”).
j) Which tag is used to display picture in HTML page:
   i) picture  ii) image
   iii) img  iv) src

PART-A

Q.2 Write short notes on:
   a) www  2×10
   b) SMTP  10×2

Q.3  a) Differentiate between external and internal linking with proper examples.  5
   b) What are different list tags available in HTML? Explain each.  5
   c) What is the structure of HTML? Explain the concept of frames in HTML
      with proper examples.  10

Q.4  a) What are different types of networks available? Differentiate, using valid
      examples.  10
   b) Design railway reservation table, using all attributes of table in HTML.  10

PART-B

Q.5 Create Registration form in HTML, using check box, radio buttons, list box,
      selection box, email, submit and reset button. Describe the functionality
      and usage of the forms.  20

Q.6 What are cascading style sheets? Explain different types of CSS with suitable
      examples.  20

Q.7  a) What are different types of data types in JavaScript?  10
    b) Write a program to swap two images, using mouseover event.  10
End Semester Examination, Dec. 2017
BCA — Third Semester
SHELL PROGRAMMING (BCA-306 (CB))

Time: 3 hrs. 
Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 a) **Write the commands for the following statements:**
   i) Search all lines in a file which end with a semicolon.
   ii) Merge and sort the contents of files a, b and c and display the sorted output on the screen.
   iii) Command to display current date and time.
   iv) Display first 20 lines of a large file.
   v) Move the file S2 and f2 to the dir MBA. 

b) **Write the output of the following commands:**
   i) Cloud $u+w, g-w$, abc
   ii) $ls$ $a$
   iii) $ls$ [b–dku–z]
iv) Who am i
v) Cut –C 12-15  file 1  

**PART-A**

Q.2  a) What are the different states in which a process can be implemented? Explain with suitable examples.  
  c) Draw and explain the detailed architecture of UNIX operating system.

Q.3  a) How overwriting and appending can be performed in LINUX? Using suitable example, explain how standard error can be redirected?  
  b) Explain the various shells available in UNIX operating system with their features.

Q.4  a) Explain the file attributes listed using `ls -l` command in brief.  
  b) Explain the concept of absolute and relative path name with a suitable example.

**PART-B**

Q.5  a) Explain the mechanism of process creation and role of system call in detail.  
  b) Explain the shell features of ‘while’ and ‘for’ with syntax.

Q.6  a) Write a shell script which accepts a number from user and prints the reverse of a number.  
  b) Write a shell script which accepts a number from user and print the factorial of the number.

Q.7  a) Explain the following environmental variables with examples:  
  i) PATH  ii) LOGNAME  iii) SHELL  iv) HOME  
  b) Explain how numeric and string comparison is done by using `test`.

---

**End Semester Examination, Dec. 2017**

**MATHEMATICAL FOUNDATION OF COMPUTER SCIENCE**

(BCA-401 (CB))

Time: 3 hrs.  Max Marks: 100

Note: Attempt **FIVE** questions in all; **Q.1** is compulsory. Attempt any **TWO** questions from **PART-A** and **TWO** questions from **PART-B**. Each question carries equal marks.

Q.1 Answer the following:
 a) Write the tabular form of set  
   \[ A = \{x; \text{xEN, x is a multiple of 3}\} \]
 b) State Distributive Law.
 c) What is an Equivalence Relation?
 d) Find GCD of (30, 90).
 e) Give distance formula.
f) Write one-point form of equation of straight line.
g) Draw a directed graph.
h) DNF stands for __________.
i) Define a tree.
j) Give an example of one-one function.

**PART-A**

**Q.2**

a) In a recent survey of 5000 people, it was found that 2800 read “Indian Express” and 2300 read “The Times of India”, while 400 read both the papers. How many read neither “Indian Express” nor “The Times of India”?

b) Let \( P = \{2, 3, 4, 5\} \). Consider the relation \( R \) and \( S \) on \( P \) defined by

\[
R = \{(2, 2), (2, 3), (2, 4), (2, 5), (3, 4), (3, 5), (4, 5), (5, 3)\}
\]

\[
S = \{(2, 3), (2, 5), (3, 4), (3, 5), (4, 2), (4, 3), (4, 5), (5, 2), (5, 5)\}
\]

Find:

i) \( M_R \)

ii) \( M_S \)

iii) Check \( M_{ROS} = M_R \times M_S \)

**Q.3**

a) Prove that

\[ 1 + 3 + 5 + \ldots + (2n - 1) = n^2 \]

by the Principle of Mathematical Induction.

b) How many people must you have to guarantee that at least \( (9) \) of them will have birthdays in the same day of the week.

**Q.4**

a) Explain the steps to draw a Hasse diagram of a Lattice. Also, draw Hasse diagram of “\( D_{70} \)”.

b) Determine the disjunctive normal form of the Boolean expression:

\[ x \land (y \lor z) \]

**PART-B**

**Q.5**

a) What do you mean by Linear Homogeneous recurrence relations with constant coefficients?

b) Solve the recurrence equation:

\[ 2a_n - 5a_{n-1} + 2a_{n-2} = 0 \]

satisfying the conditions

\[ a_0 = 0 \quad \text{and} \quad a_1 = 1 \]

**Q.6**

a) Show that the line segment joining points \( A(1, 2), B(3, 6) \) and \( C(-2, 4), D(6, 4) \) bisect each other.

b) Find the equation of straight line passing through \( (3, -5) \) and parallel to the line joining the points \( A(1, 2) \) and \( B(-3, 4) \).

**Q.7**

a) Define the following:

i) A closed path.

ii) Odd vertex.

iii) An edge.

iv) Incident edge.

v) Spanning tree.

b) Determine the minimum spanning tree of the weighted graph shown below:
End Semester Examination, Dec. 2017  
BCA – Fourth Semester  
PROGRAMMING IN JAVA (BCA-403(CB))

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Which keyword is used to make a class?
      i) Class    ii) Struct    iii) Int    iv) None of these
   b) Which statement is incorrect?
      i) Every class must contain main() method.  
      ii) main () method must be made public.  
      iii) None of the above.
   c) Which keyword can be used to prevent method overriding?
i) Static  
ii) Final  
iii) Protected

d) Which of these class is superclass of string and string buffer?
   i) java.util  
   ii) java.lang  
   iii) None of these

e) Define ‘Applet’.
f) Define ‘Exception’.
g) Define ‘Data types’.
h) Give any one type of inheritance.

**State whether the following statements are TRUE or FALSE:**
i) Java is object-oriented language.
j) Java package stores all standard java classes.

**PART-A**

Q.2  

a) What are constants? Discuss various types of constant in Java. Give example of each.  
b) Describe the structure of java program with its features. Give example.

Q.3  

a) Compare in terms of their functions, the following pairs of statements:
   i) While and do-while
   ii) While and for.  
   b) Write a program in Java to find the factorial of n number.

Q.4  

a) What are classes? How classes are declared in Java? Give example.  
b) Define ‘Array’. How arrays are handled in Java? Illustrate the answer.

**PART-B**

Q.5  

a) Write and explain any three string handling functions.  
b) Discuss various exceptions and exception handling mechanism in Java with suitable example.

Q.6  

a) Compare Local and Remote Applet.  
   b) Discuss: i) Passing parameters to applet.  
      ii) Getting input from user.  
   c) Discuss any two methods of life cycle.

Q.7  

Write short notes on:  
   a) AWT controls.  
   b) Elementary concepts of Event Handling.
Q.1 State whether the following statements are TRUE or FALSE:

a) LCD stands for liquid crystal display.
b) A mouse is an output device.
c) The extraction of a portion from an image is known as clipping.
d) Beam penetration is a method to generate n number of colors.
e) There is a standard matrix for each type of transformation.
f) There is no difference between zooming and panning.
g) Orthographic projection is a type of parallel projection.
h) NDCS stands for normalized device co-ordinate system.
A wireless mouse works on infrared rays.

Graphics tablet works on the same principle as light pen.

**Write short notes on following:**

k) Window to viewport mapping.
l) Frame by frame animation.

**PART-A**

**Q.2**
a) Explain the working of CRT in detail.  
   b) Explain graphic standard in detail.

**Q.3**
a) Write down the steps to draw a line using Bresenhem’s line drawing algorithm.  
   b) Write short notes on following:
      i) Gravity field.
      ii) Rubber band method.
      iii) Dragging.
      iv) Pointing device.

**PART-B**

**Q.4**
a) Perform a 90° rotation on a given \( V \) where the triangle is \( A (1, 1) \), \( B (7, 3) \) and \( C (9, 6) \).  
   b) What do you mean by composite transformation? Explain through some examples.

**Q.5**
a) Explain 3D transformation in detail.  
   b) Explain different type of projections.

**Q.6**
a) Explain the following terms:
   i) Window.
   ii) Viewport.
   iii) WCS.
   iv) VCS.  
   b) Explain midpoint line clipping algorithm through an example.

**Q.7**
a) What do you mean by animation? Explain its procedure in detail.  
   b) What is the importance of animation in television industry? Share your experience through real life examples.
Q.1 Answer the following:
   a) The objective of testing is:
      i) Debugging.
      ii) To uncover errors.
      iii) To gain modularity.
      iv) To analyze system.
   b) An important aspect of coding is:
      i) Readability.
      ii) Productivity.
iii) To use as small memory space as possible.
iv) Brevity.
c) In risk analysis of spiral model, which of the following risk is included:
i) Technical.
ii) Management.
iii) Technical and management.
iv) None of the above.
d) A quantitative measure of the degree to which a system, component or process possess a given attribute:
i) Measure.
ii) Measurement.
iii) Metric.
iv) None of the above.
e) Refinement is actually a process of elaboration. TRUE/FALSE
f) When elements of modules are grouped together that are executed sequentially in order to perform a task, is called:
i) Procedural cohesion.
ii) Logical cohesion.
iii) Temporal cohesion.
iv) Co-incidental cohesion.
g) The most creative and challenging phase of system life cycle is:
i) Feasibility study.
ii) Maintenance.
iii) Design.
iv) None of above.
h) Coupling is a measure of:
i) Relative functional strength.
ii) Interdependence among module.
iii) Both of the above.
iv) None of the above.
i) A zero level DFD describes:
i) That the system design can't be split further.
ii) Fully below up system design.
iii) Overview of process input and output.
iv) None of above.
j) Testing can only be initiated:
i) when the implementation is done.
ii) from the beginning of the project when planning is done.
iii) from the design stage only.
iv) None of the above.

PART-A

Q.2  a) Justify the statements:
i) Software as a product doesn’t wear out, deform or crack.
ii) Software is not manufactured. 2½×2
b) What are the various categories of software? What are the challenges in software? 6
c) Discuss spiral model, in detail, with diagram. 9

Q.3  a) Explain in detail about requirement engineering process in requirement analysis. 6
b) Draw a DFD for a restaurant. 7
c) Draw an ER diagram for a course assuming that:
i) a course can be given multiple times during a term.
ii) each section has a single instructor.
iii) an instructor can teach multiple sections of the same course.

course (name, title, dept., instructor, section, year, semester, enrolment)

7

Q.4 Write short notes on:
a) CoCoMo model. b) Software project management. c) LOC. d) Gantt chart. 5×4

PART-B

Q.5 a) “Transforming requirement specifications into application architecture is the most crucial activity during software development”. Justify the given statement. Explain the various design concepts used in software design. 10
b) Give reason for your answer while stating the statement as true or false:
   i) The essence of any good function-oriented design technique is to map the functions performing similar activities into a module.
   ii) Traditional procedural design is carried out top-down, whereas object-oriented design is normally carried out bottom-up.
   iii) Common coupling is the worst type of coupling between two modules.
   iv) Temporal cohesion is the worst types of cohesion that a module can have.
   v) The extent to which two modules depend on each other determines the cohesion of two modules. 2×5

Q.6 a) Define the following terms:
   i) Fault.
   ii) Failure.
   iii) Bug.
   iv) Mistake. 2½×4
b) Differentiate between:
   i) Alpha testing and beta testing.
   ii) Verification and validation. 5×2

Q.7 a) What is re-engineering? Differentiate between re-engineering and new development. 10
b) Write short notes on:
   i) SCM.
   ii) Software maintenance. 5×2

End Semester Examination, Dec. 2017
BCA – Fifth Semester
DATA COMMUNICATION AND NETWORKING (BCA-501 (CB))
g) Repeater is used to ________.  
h) The address size of IPv6 is ________.  
i) A set of rules that govern all aspect of information communication is called __.  
j) The amount of data that can be carried from one point to another in a given time period is called ________.  

2×10

**PART-A**

Q.2  
a) What is topology? Explain the advantages and disadvantages of each topology in detail.  
b) What are the necessary component of data communication system?  

10

Q.3  
Why OSI model is called an open system interconnection? Explain each layer of OSI model in detail.  

20

Q.4  
a) What are the design factors for transmission media? Explain unguided media in detail.  
b) How error correction and detection is done by hamming code?  

10

**PART-B**

Q.5  
a) How handshaking is done by TCP? Explain the TCP packet format in detail.  
b) What is the need of classless addressing? Explain IPv6 in detail.  

10

Q.6  
Write short notes on:  
a) Telnet.  
b) POP.  
c) SMTP.  
d) DNS.  

5×4

Q.7  
What is bluetooth? Explain the architecture of bluetooth with the help of a suitable diagram.  

20

---

**End Semester Examination, Dec. 2017**  
BCA – Fifth Semester  
DATA COMMUNICATION AND NETWORKING (BCA-501 (CB))

Time: 3 hrs.  
Max Marks: 100  
No. of pages: 2

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory**. Attempt any **TWO** questions from **PART-A** and **TWO** questions from **PART-B**. Each question carries equal marks.

Q.1  
Answer the following:  
a) Communication between a computer and keyboard involves _______ transmission.  

i) Simplex  

ii) Half duplex  

iii) Full duplex  

iv) Automatic  
b) A cable break in a _______ typology stops all transmission.
Q.2  a) What is data communication? Identify the main component of data communication system.  
    b) In Analog transmission how analog to digital conversion takes place? Explain with the help of suitable diagram.  
    c) Write short note on: Mesh topology.

Q.3  a) Given a bit pattern 1011100001, encode the bit using the following encoding scheme: RZ, NRZ (L), NRZ (I), polar and Manchester encoding.
    b) Explain the major classes of guided media. Also, discuss how guided media differs from unguided media?

Q.4  a) How do the layers of TCP/IP protocol suite correlate to the layer of OSI model? Discuss.
    b) Write short notes on:
        i) Cyclic redundancy check in error detection.
        ii) Parity check.

Q.5  Write short notes on:
    a) Bluetooth.
    b) Virtual LAN.
    c) Frame Relay.
    d) ATM.

Q.6  a) What is the advantage of a hierarchical name space over a flat name space for a system?
    b) Write short notes on:
        i) E-mail
        ii) FTP
    c) Do you think SMTP is a suitable protocol for transforming live audio and video?

Q.7  Write short notes on:
Q.1 Multiple choice questions:
   a) How should you arrange catch blocks?
      i) Only one catch block for each try block.
      ii) Several catch blocks for a try block, arranged in order starting with exception and ending with the most specific exception.
iii) Several catch blocks within one try block, arranged starting with the most specific exception and ending with exception.
iv) The catch blocks should be used only when a finally block is not used.
b) Two methods with the same name but with different parameters.
i) Overloading
ii) Loading
iii) Multiplexing
iv) Duplexing
c) Common language runtime (CLR).
i) Is an execution engine for all .net application.
ii) Is similar to JVM as in Java.
iv) Is a compiler?
d) It is mandatory to override virtual method.
i) True
ii) False
e) What is Minimum and Maximum Size of Int32?
i) – 3,200,102,400/3,200,102,448
ii) – 2,147,483,648/2,147,483,648
iii) – 3,200,000,000/3,200,000,000
iv) – 32,768/32,768
f) What does the keyword virtual mean in the method definition?
i) The method is public
ii) The method can be derived
iii) The method must be over-ridden
iv) The method can be over-ridden

g) We Can declare a property in an interface.
i) True
ii) False
h) Are private class-level variables inherited?
i) Yes
ii) No
i) Which of the following is NOT Value type variable?
i) String
ii) System.Drawing.Point
iii) Integer
iv) Decimal
j) What is the default modifier for the class member?
i) Private
ii) Public
iii) Internal
iv) Protected

**Q.2** Write short notes on the following:
a) Garbage Collection.
b) Constructor
c) IL
d) JIT
e) Type Safety

**Q.3** What is an array? How is it defined? How many different types of arrays are there in C#? Give suitable example to support your answer.

**Q.4** What is a namespace? How is a namespace declared? How is a namespace used in other namespace? Give suitable examples.

**Q.5** Write short notes on the following:
a) ListBox
b) ComboBox
c) Date TimePicker
d) Menu

---

**PART-A**

**Q.2** Write short notes on the following:
a) Garbage Collection.
b) Constructor
c) IL
d) JIT
e) Type Safety

**Q.3** What is an array? How is it defined? How many different types of arrays are there in C#? Give suitable example to support your answer.

**Q.4** What is a namespace? How is a namespace declared? How is a namespace used in other namespace? Give suitable examples.

**PART-B**

**Q.5** Write short notes on the following:
a) ListBox
b) ComboBox
c) Date TimePicker
d) Menu
Q.6 What are the main classes involved in ADO.NET? Explain the role of each class in making a Database transaction. What is a Dataset? How is it important in making data driven application with C#?

Q.7 Write short notes on the following:
   a) Destructor
   b) Super
   c) Polymorphism
   d) Interface

End Semester Examination, Dec. 2017
BCA – Fifth Semester
RDBMS USING ORACLE (BCA-503 (CB))

Time: 3 hrs.  
Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Answer the following in brief:
   a) Define RDBMS.
   b) What is Error handling?
   c) What is transaction and concurrent transaction?
   d) Explain any two character functions in ORACLE.
e) What are locks? Explain its advantage in concurrent management of transaction.
f) What is deadlock? Give a real life example of deadlocks.
g) What is the importance of recovery procedure?
h) What is a serializability schedule?
i) Define drop table command.
j) What are the causes of failures?

**PART-A**

Q.2 Define the following, in short:
a) Relation.
b) Entity integrity and referential integrity rule.
c) Intension and extension of a relation.
d) Primary key and candidate key.

Q.3 What is exception handling? Describe the various exception used in PL/SQL. Write a suitable a code for raising zero-divide exception in PL/SQL code block.

Q.4 What is a transaction? Draw a diagram to explain the various states of a transaction. Also, describe the various properties of a transaction.

**PART-B**

Q.5 Define pessimistic and optimistic approach for concurrent execution of transactions. Define two-phase locking protocol with its advantages and disadvantages for concurrency control.

Q.6 What is meant by checkpoints? What is its importance? What are the steps performed during checkpoints?

Q.7 How external tables are used to move data in oracle database, with the help of a suitable example.

---

**End Semester Examination, Dec. 2017**

BCA – Fifth Semester

**COMPUTER GRAPHICS (BCA-503)**

Time: 3 hrs.  Max Marks: 75

Note: Attempt **FIVE** questions in all; **taking at least ONE question** from each **UNIT**.

**Q.1 is compulsory. All questions carry equal marks.**

**Q.1** Multiple choice questions:
a) Graphics output devices are:
   i) Graphics tablet, mouse
   ii) Keyboard
b) Which method are used to get and set the position of a pixel, object or text in active area of a desktop?
   i) Drugging method
   ii) Basic positioning method
   iii) Sketching method
   iv) Gravity field method

c) The center of display screen is computed as:
   i) X max, y max
   ii) Xmax/2,ymax/2
   iii) Xmax/3,ymax/3
   iv) None of these

d) The rubber band is also applicable to_____ objects.
   i) Scale
   ii) Scalar
   iii) Vector
   iv) None of these

e) The division displayed on screen into row and columns is known as:
   i) Rubber band method
   ii) Gravity field
   iii) Dragging
   iv) Grid

f) The function of a plotter is like a:
   i) Monitor
   ii) Projector
   iii) Printer
   iv) None of these

g) A plotter is capable of:
   i) Printing a map
   ii) Printing a similar images
   iii) Both i) and ii)
   iv) None of these

h) _____ ink is used in laser printer.
   i) Wet
   ii) Dry
   iii) Both i) and ii)
   iv) None of these

i) The cabinet in laser printer in which the ink is filled is called:
   i) Cartage
   ii) Toner
   iii) Both i) and ii)
   iv) None of these

j) An inkjet printer places ______ of ink onto paper to print an image:
   i) Small droplets
   ii) large droplets
   iii) Both i) and ii)
   iv) None of these

UNIT-I

Q.2 What is LCD? What is the basic method of working of LCD? List the main advantages of a LCD.  

Q.3 Write short notes on:
   a) PHIGS
   b) CUL
   c) GKS

UNIT-II

Q.4 A rectangle is scaled twice along x axis and four times along y axis. Find the transformed coordinates.  

Q.5 Explain what are the steps required to plot a line using DDA algorithm.  

UNIT-III

Q.6 a) What do you mean by projection? Explain its types, in detail.  
   b) Differentiate between cavalier and cabinet projection. Why cabinet projection is more realistic than cavalier projection?  

Q.7 Explain the following terms:
   a) Vanishing points.
UNIT-IV

Q.8  a) What do you mean by compression? Explain in detail.  
     b) Why compression is required? Explain some situation in which you will compress the image.

Q.9  a) What do you understand by multimedia? Explain its various applications.
     b) Explain different type of image formats, in detail.
c) In a bisection method if roots lie between a & b then \( f(a) \times f(b) \) is ________.
d) The root of the equation \( x^3 - 2x - 5 = 0 \) lies between ________.
e) In Newton Raphson method for finding the real root of equation \( f(x) = 0 \),
the value of x is given by ________.
f) Given \\[
\begin{align*}
y(0) = 3, &
y(1) = 12, &
y(2) = 81, &
y(3) = 200, &
y(4) = 100, &
y(5) = 8.
\end{align*}
\]
find \( \Delta^5 y(\theta) \)
g) Prove that \( (1+\Delta)(1+\nu) = 1 \)
h) The technique for computing the value of the function inside the given argument is called ________.
i) State the Euler’s general formula.
j) Given that \( \frac{dy}{dx} = y-x \) with \( y(0) = 2 \); find \( k_1 \) and \( k_2 \).
UNIT-III

Q.6  a) By method of least square, find the straight line that best fits the following data:

<table>
<thead>
<tr>
<th>x</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>y</td>
<td>14</td>
<td>27</td>
<td>40</td>
<td>55</td>
<td>68</td>
</tr>
</tbody>
</table>

b) Use Trapezoidal Rule to evaluate \( \int_0^1 x^4 \, dx \) considering five sub interval.

Q.7  Evaluate \( \int_0^6 \frac{dx}{1 + x^2} \) by using

a) Simpson’s 3rd Rule
b) Simpson’s 8th Rule
c) Trapezoidal Rule

UNIT-IV

Q.8  Define:
a) Level of significance.
b) Test of significance.
c) Errors in sampling.

Q.9  A die is tossed three times. What is the probability of:
a) No fives come.
b) 1 five come.
c) 3 fives come.
Q.1  
**Choose the correct option:**  
a) An area of the search space which is higher than the surrounding areas is a:  
   i) Ridge.  
   ii) Plateau.  
   iii) Hill.  
   iv) None of these.  
b) Uninformed search is also known as a:  
   i) Heuristic search.  
   ii) Blind search.  
   iii) Goal search.  
   iv) Beam search.  
c) Concepts, objects, nets, logic etc are the examples of:  
   i) Tacit knowledge.  
   ii) Explicit knowledge.  
   iii) Knowledge base.  
   iv) None of these.  
d) Human nervous system consists of:  
   i) \(10^{10}\) neurons.  
   ii) \(10^{11}\) neurons.  
   iii) \(10^{12}\) neurons.  
   iv) \(10^{14}\) neurons.  
e) ES uses:  
   i) Knowledge.  
   ii) Data.  
   iii) Information.  
   iv) None of these.  
f) Which algorithm will work backward from the goal to solve a problem:  
   i) Forward chaining.  
   ii) Backward chaining.  
   iii) Hill climbing algorithm.  
   iv) None of these.  
g) Which is used to construct the complex sentences:  
   i) Symbols.  
   ii) Logical connectives.  
   iii) Quantifiers.  
   iv) All of the above.  
h) Frames is:  
   i) A way of representing knowledge.  
   ii) Data structure.  
   iii) Data type.  
   iv) None of the mentioned.  
i) How many types are available in machine learning?  
   i) 1  
   ii) 2  
   iii) 3  
   iv) 4  
j) Neural networks are complex _______ with many parameters.  
   i) Linear functions.  
   ii) Non linear functions.  
   iii) Discrete functions.  
   iv) Exponential functions.  

2x10

**PART-A**

Q.2 a) Define the term Intelligence. Categorize the term and explain with the help of examples.  
   
   10  

b) Explain the concept of artificial agents with the help of a diagram.  
   
   10  

Q.3 a) For the search tree given below, show:  
   i) Breadth first search.  
   ii) Depth first search.  

![Search Tree Diagram](image)  

Write the algorithm for both also.  
   
   12  

b) “Generate and test is one of the problem solving strategies used to solve well defined problems”. Justify the statement and write the algorithm for the same.  
   
   8
Q.4  
a) Design a frame for a banking system.  
	10 
b) Write the predicate form of the following:  
   i) All indoor games are easy.  
   ii) Rajiv only likes cricket game.  
   iii) All pompeians died when volcano erupted in 79 A.D.  
   iv) All that glitters is not gold.  
   v) Gaurav loves all animals.  
	1x5 
c) Show the following statements using Modus Ponens:  
   i) A → B: If Sam was born in Canada, then he is a Canadian.  
   ii) P → Q: If the cake is made with sugar, then the cake is sweet.  
   iii) A → B: If Jack is innocent, he is not guilty.  
   iv) R → S: If an angle is inscribed in a semicircle, then it is a right angle.  
   v) A → B: If you buy today, I’ll give you a 10% discount.  
	1x5  

PART-B  

Q.5  
Write short notes on the following:  
a) Procedural vs. Declarative knowledge.  
b) Rule based deduction system.  
c) Backward and forward reasoning.  
d) Conflict Resolution.  
	5x4 

Q.6  
a) Represent the following, using semantic not with nodes and labeled arcs:  
   i) Tom is a cat.  
   ii) Tom caught a bird.  
   iii) Tom is owned by John.  
   iv) Tom is ginger in color.  
   v) Cats like cream.  
   vi) The cat sat on the mat.  
   vii) A cat is a mammal.  
   viii) A bird is an animal.  
   ix) All mammals are animals.  
   x) Mammals have fur.  
	1x10 
b) Write short notes on:  
   i) Probabilistic reasoning.  
   ii) Fuzzy logic.  
	5x2 

Q.7  
a) Describe ANN. Explain the role of perception in ANN.  
	10  
b) Explain the concept of Machine Learning.  
	10
End Semester Examination, Dec. 2017
BCA – Sixth Semester
JAVA PROGRAMMING (BCA-601A)

Time: 3 hrs.  Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.
Q.1 is compulsory. All questions carry equal marks.

Q.1 Answer the following:
   a) What is Inheritance?
   b) What is constant?
   c) What is class?
   d) What is point( )?
   e) What will be the result of an expression:
      \( (1+2) + (4/2) \)
   f) What is difference between string and string buffer?
   g) What is constructor?
   h) What is garbage collection?
   i) Give any one exception in Java.
   j) What is full form of JVM?  1½×10

UNIT-I
Q.2 
   a) Write a program in Java to find sum and reverse of three digit number.  9
   b) Discuss the rules for defining variable in Java. Give example.  6

Q.3 
   a) Discuss various data types available in Java.  9
   b) What are differences between Java and C++?  6

UNIT-II
Q.4 
   a) Discuss various types of operators in Java. Give example of each.  10
   b) Compare break and continue statement.  5

Q.5 Give the syntax, purpose and example:
   a) else-if ladder.
   b) switch.
   c) nested if.  5×3

UNIT-III
Q.6 
   a) What are Inner classes? Discuss various types of Inner classes.  10
   b) Write short note on Recursion.  5

Q.7 Explain in detail exception handling mechanism. Give suitable example. Also, discuss about finally clause.  15

UNIT-IV
Q.8 What is interface? Explain, in detail, with suitable example.  15
Q.9 Write short note on AWT.

**End Semester Examination, Dec. 2017**  
**BCA – Sixth Semester**  
**SQL, PL/SQL AND D2K (BCA-601b)**

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1

Note: Attempt **FIVE** questions in all; **taking at least ONE question** from each **UNIT**.  
Q.1 is compulsory. All questions carry equal marks.

**Q.1** Fill in the blanks:  
a) Three data models are ________, ________ and ________.  
3  
b) Three data types used in SQL are ________, ________ and ________.  
3  
c) Two conditional statements available in RL/SQL are ________ and ________.  
2  
d) Reports in D2K are saved with ________ extension.  
1  
e) Give two features of D2K.  
2  
f) Index is used to ________.  
2  
g) Structure of PL/SQL block is ________.  
2

**UNIT-I**

**Q.2**  
a) Explain the three level architecture of database in detail.  
10  
b) What is Normalization? What is its need?  
5

**Q.3** Explain the network data model in detail.  
15

**UNIT-II**

**Q.4**  
a) Explain Inner and outer join in SQL with the help of examples.  
10  
b) What is cluster? Explain its need with the help of an example.  
5

**Q.5** Explain five DML commands and two DDL commands with suitable examples and syntax.  
15

**UNIT-III**

**Q.6** Explain the Loop Statements available in PL/SQL with proper syntax and examples.  
15

**Q.7** What is the procedure or function in PL/SQL? What is its need? Explain the structure of procedure in PL/SQL.  
15

**UNIT-IV**

**Q.8** Explain all the steps of creating a report in D2K.  
15

**Q.9** Write short notes on:  
a) LOV objects.  
b) List item.  
c) Alerts.  
5×3
End Semester Examination, Dec. 2017
BCA – Sixth Semester
DATA COMMUNICATION AND NETWORKING (BCA-602)

Time: 3 hrs.  Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.
Q.1 is compulsory. All questions carry equal marks.

Q.1 State True and False:
a) Infrared is a guided media.
b) Full form of SMTP is Simple Mail Transfer Protocol.
c) There are three layers in TCP/IP model.
d) The network layer is responsible for dialog establishment.
e) Repeaters are used to regenerate the signals.

Write short notes on the following:
f) LAN.
g) Twisted pair cable.
h) UDP.
i) Static routing.
j) CSMA.

UNIT-I

Q.2 Differentiate between the following:
a) Guided Media and unguided media.  7½
b) Synchronous and Asynchronous transmission.  7½

Q.3 What do you understand by transmission impairment? Explain in detail.  15

UNIT-II

Q.4 Explain OSI reference model through a diagram.  15

Q.5 What do you understand by error detection and correction code? Explain with an example.  15

UNIT-III

Q.6 What do you mean by a ‘network’. Explain different types of networks in detail.  15

Q.7 Differentiate between the following:
a) Adaptive and Non-adaptive routing.
b) Static and Dynamic routing.
c) Bus and Mesh topologies.  5×3

UNIT-IV

Q.8 Write short notes on following:
a) CSMA/CD.  7½×2
b) Packet switching.
Q.9 Differentiate between the following:
   a) Private and public key encryption.
   b) Plain text and cipher text.  \(7\frac{1}{2} \times 2\)

**End Semester Examination, Dec. 2017**

BCA — First Semester

**FUNDAMENTALS OF IT AND PROGRAMMING TECHNIQUES (BCA-1001)**

Time: 3 hrs.  Max Marks: 75

No. of pages: 2  

Note: Attempt **FIVE** questions in all; taking at least **ONE** question from each Unit. **Q.1 is compulsory.** Each question carries equal marks.

Q.1  
   a) Which of the following needs refreshing?
      i) SRAM.
      ii) DRAM.
      iii) ROM.
      iv) All of above.  \(2\)
   b) What passes into and out from computer via ports?
      i) Data.
      ii) Bytes.
      iii) Graphics.
      iv) Pictures.  \(2\)
   c) Which of the following is not purely output device?
      i) Screen.
      ii) Printer.
      iii) Speaker.
      iv) Plotter.  \(2\)
   d) The first macintosh computer was from:
      i) First generation.
      ii) Second generation.
      iii) Third generation.
      iv) Fourth generation.  \(2\)
   e) The control unit of a micro-processor:
      i) Stores data in memory.
      ii) Accepts input data from keyboard.
      iii) Performs arithmetic/logical function.
      iv) None of above.  \(2\)
   f) Write short notes on:
      i) ALU.
      ii) CU.  \(2\frac{1}{2} \times 2\)

**UNIT-I**

Q.2 Explain important characteristics of a computer. What basic operations are performed by a computer?  \(15\)

Q.3 Draw a block diagram of computer system and discuss functions of each in detail.  \(15\)

**UNIT-II**

Q.4  
   a) Compare and contrast between ROM, RAM, PROM, and EPROM.  \(7\frac{1}{2} \times 2\)
   b) Explain advantages of compiler over interpreter in detail.
Q.5 Define “Software”. List and explain types of software. Give two examples of each category.

UNIT-III

Q.6 a) Differentiate between logical and syntax error.  
b) Draw a flow chart to add all even numbers from 0-100. Print result of calculation.

Q.7 Draw flow chart for factorial of number, Fibonacci series.

UNIT-IV

Q.8 a) Differentiate between bottom-up and top down approach.  
b) What is structured programming? Discuss.

Q.9 What is modular programming? Explain characteristics of modular programming.
Q.1 Multiple Choice Questions:

a) Which is not a loop structure?
   i) for  
   ii) do while 
   iii) while  
   iv) repeat until

b) When following piece of code is executed, what happens? $b = 3; a = b ++$;
   i) a contains 3 and b contains 4 
   ii) a contains 4 and b contains 4 
   iii) a contains 4 and b contains 3 
   iv) a contains 3 and b contains 3

c) Which of the following are unary operators in C?
   1. !
   2. sizeof
   3. ~
   4. &&
   i) 1, 2 
   ii) 1, 3 
   iii) 2, 4 
   iv) 1, 2, 3

d) In which order do the following gets evaluated?
   1. Relational 
   2. Arithmetic 
   3. Logical 
   4. Assignment 
   i) 2134 
   ii) 1234 
   iii) 4321 
   iv) 3214

e) In which header file Input/output function prototypes and macros are defined?
   i) conio.h 
   ii) stdlib.h 
   iii) stdio.h 
   iv) dos.h

f) What is stderr?
   i) standard error 
   ii) standard error types 
   iii) standard error streams 
   iv) standard error definitions

g) What is the purpose of flush() function?
   i) flushes all streams and specified streams. 
   ii) flushes only specified stream. 
   iii) flushes input/output buffer. 
   iv) flushes file buffer.

h) The result of a Relational operation is always:
   i) either True or False 
   ii) is less than or is more than 
   iii) is equal or less or more 
   iv) All of these

i) Which of the following is not a valid escape code?
   i) \t 
   ii) \v 
   iii) \f 
   iv) \w
j) To increase the value of c by one, which of the following statement is wrong?
   i) c++;  
   ii) c = c + 1;  
   iii) c + 1 => c;  
   iv) c + = 1  

UNIT-I

Q.2  a) Differentiate between:
   i) printf() and scanf()  
   ii) getch() and getche()  
   iii) putchar() and putch()  
   iv) constant and variable  
   v) identifiers and keywords  

b) Explain the importance of preprocessor in C language

Q.3 Explain the various operators available in C language, with their hierarchy and associativity.

UNIT-II

Q.4 Explain various control structures in C language with syntax and examples?

UNIT-III

Q.6 a) What do you mean by recursion? Write a program to display a Fibonacci series up to a range entered by user by using recursion.

b) What do you mean by dangling pointer? Explain with an example.

Q.7 a) What is the purpose of subroutine? What are the three important things that should be kept in mind while using a function?

b) Differentiate between structure and union.

UNIT-IV

Q.8  a) Differentiate between:
   i) fprintf() and fwrite()  
   ii) fscanf() and freadQ  
   iii) text and binary files  

b) What do you mean by file organization? Explain various file organization techniques.

Q.9 What is scope and storage allocation of auto, static, local and register variables? Explain with an example.
End Semester Examination, Dec. 2017
BCA – First Semester
BASIC MATHEMATICAL SKILLS (BCA-1004)

Time: 3 hrs. Max Marks: 75
No. of pages: 2

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.
Q.1 is compulsory. All questions carry equal marks.

Q.1 Answer the following:

a) If \( A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix} \) and \( B = \begin{bmatrix} 0 & -1 \\ 1 & 2 \end{bmatrix} \)
find \( 2A + B \)

b) Define ‘Null Matrix’.

c) If \( \cos \theta = \frac{1}{2} \), find \( \sin \theta + \tan \theta = ? \)

d) Differentiate \( 8x^2 - 7x + 10 \) w.r.t. \( x \).

\( A = \begin{bmatrix} -7 & 6 \\ 2 & 3 \end{bmatrix} \)

e) Find \( |A| \) if

f) What is binomial theorem.

\begin{bmatrix} 3n-5 \\ 6 \end{bmatrix} \)

If \( n^\text{th} \) term is \( \frac{3n-5}{6} \), write the first three terms of the sequence.

\( (a) \frac{1}{3} \times (a) \frac{5}{3} \times (a) \frac{5}{3} : \)

\( \tan^2 \theta = \frac{3x + 2}{2x} = -1. \)

\( \lim_{x \to 1} \frac{3x + 2}{2x} = \) __________.

UNIT-I

Q.2 a) Compute \( 4A + 3B \) if

\( A = \begin{bmatrix} -1 & -1 & 5 \\ 2 & 3 & 0 \end{bmatrix} \) and \( B = \begin{bmatrix} -1 & 0 & 2 \\ 1 & -2 & 3 \end{bmatrix} \)

b) Find \( A^{-1} \) where

\( A = \begin{bmatrix} -1 & 2 \\ 2 & 1 \end{bmatrix} \)

\( \begin{bmatrix} 1 & 3 \\ 2 & 4 \end{bmatrix} \)

Q.3 a) Verify Cayley-Hamilton theorem for the given matrix:
UNIT-II

Q.4 a) Find the 6\(^{th}\) term in \(\left[ \frac{x}{4} - y \right]^9\).

b) How many different words can be made out of the letters in the word ‘ALLAHABAD’?

In how many of these will the vowels occupy even places?

UNIT-III

Q.5 a) Simplify: \(\frac{2^{n+3} \times 3^{n-8} \times 5^{n+3} \times 6^{n+1}}{6^{n+1} \times 10^{n+3} \times 15^n}\).

b) How many words can be formed from the letters of the word ‘DAUGHTER’ taking all letters together?

UNIT-IV

Q.8 a) Evaluate: \(\lim_{x \to 3} \frac{x^3 - 4x - 15}{x^3 + x^2 - 6x - 18}\).

\[ f(x) = \begin{cases} \frac{x^2 - 1}{x - 1}, & \text{when } x \neq 1 \\ 2, & \text{when } x = 1 \end{cases} \]

b) If

show that \(f(x)\) is continuous at \(x = 1\).

Q.9 a) Differentiate w.r.t \((x)\):

\[ \left( 2x^3 - 3x^2 + 1 \right) \left( 3x^4 + 5x^3 + 2 \right) \]

b) Expand \(\cos(x)\) in powers of \((x)\) by Maclaurin’s series.
End Semester Examination, Dec. 2017
BCA — Second Semester
DATA STRUCTURES (BCA-2001)

Time: 3 hrs. Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. Q.1 is compulsory. Marks are indicated against each question.

Q.1 Answer the following:
   a) What are the techniques of graph traversing?
   b) What do you mean by threaded tree?
   c) What is the meaning of sorting?
   d) What is overflow and underflow condition in a linked list?
   e) Describe the structure of node in doubly linked list.

Fill in the blank:
   f) Linked list overcomes the limitations of ________.
   g) Tree traversals methods are ________ ________ ________.
   h) ________ tree can be used as an index.
   i) ________ data structure can be used to perform recursion.
   j) Methods to find minimum spanning tree are ________. 1½×10

UNIT-I

Q.2 a) Explain the use and role of time and space complexity of an algorithm with example. 7
   b) Write an algorithm to insert an element at a particular location in an array. 8

Q.3 a) What do you mean by queue? What are the problems associated with linear queue? What are the various operations that can be performed on circular queue? 10
   b) What do you mean by deque? Explain with example 5

UNIT-II

Q.4 What is linked list? What are the advantages of linked list over array? Write algorithm to insert element at the beginning, middle, and end into doubly linked list. 15

Q.5 a) Construct a tree using:

<table>
<thead>
<tr>
<th>In order</th>
<th>E</th>
<th>A</th>
<th>C</th>
<th>K</th>
<th>F</th>
<th>H</th>
<th>D</th>
<th>B</th>
<th>G</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preorder</td>
<td>F</td>
<td>A</td>
<td>E</td>
<td>K</td>
<td>C</td>
<td>D</td>
<td>H</td>
<td>G</td>
<td>B</td>
</tr>
</tbody>
</table>
b) Explain the threaded tree with all its types and example.  

**UNIT-III**

Q.6 Write an algorithm for binary search. Also, explain it with the help of an example.  

Q.7 Sort the given list using quick sort. Also, write the algorithm for the same:  

\[34 \ 45 \ 21 \ 55 \ 72 \ 11 \ 29 \ 56 \ 28\]  

**UNIT-IV**

Q.8 a) What is collision? What are various collision resolution methods available?  
   b) What are the various operations that we can perform on a file?  

Q.9 a) What are the various file organization techniques? What are their advantages and disadvantages?  
   b) What do you mean by hashing?

BCA — Second Semester  
DATABASE SYSTEMS (BCA-2002)  

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. Q.1 is compulsory. Marks are indicated against each question.

Q.1 Answer the following:  
a) DBA stands for _______.  
b) Full form of BCNF _______.  
c) The language used to writing query is:  
   i) SQL.  
   ii) DBTG.  
   iii) System R.  
   iv) None of the above.  
d) DML stands for _______.  
e) The _______ command is used to change or modify data values in a table.  
f) _______ function returns number of rows in a table.  
g) _______ function returns the maximum value of the selected list of items.  
h) _______ command withdraws all the privileges from the table.  
i) _______ normal form eliminates multivalued dependency.  
j) SQL statements are divided into following categories:  
   i) DDL and DML.  
   ii) DCL.  
   iii) TCL.  
   iv) All of the above.  

UNIT-I

Q.2 What do you mean by data independence? Discuss its types and how independence is achieved? Explain. Also, discuss the capabilities of good DBMS.  

Q.3 Explain the following:  
a) Data Dictionary.  
b) Types of Attributes.  
c) Cardinality Ratio.  

UNIT-II

Q.4 Explain the following with example:  
a) Groupby clause.  
b) Union.  
c) Check constraint.  
d) Update.  
e) Minus.  

Q.5 What do you mean by joins? Discuss all the joins with example.
UNIT-III

Q.6 What do you mean by normalization? Discuss the similarities and dissimilarities between 3NF and BCNF.

Q.7 What do you mean by two phase locking? Also discuss how inconsistency can be removed through two phase locking? Differentiate between shared and exclusive locks.

UNIT-IV

Q.8 What do you mean by recovery? Explain immediate and deferred update techniques for recovery.

Q.9 What is query processing? Explain all the phases of query processing with its diagram.

End Semester Examination, May 2017
BCA – Second Semester
LOGICAL ORGANIZATION OF COMPUTER (BCA-2003)

Time: 3 hrs. Max Marks: 75

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT. Q.1 is compulsory. Each questions carry equal marks.

Q.1 Answer the following:
   a) What is Demultiplexer?
   b) What is 2’s complement of 0011?
   c) Octal equivalent of binary number 1000 is _________.
   d) Draw the logic diagram of NOR gate.
   e) In Boolean algebra, A.A is equal to _________.
   f) What is the base of decimal number?
   g) Add: 11110 and 0011
   h) What is the full form of MIMD?
   i) Number of flip-flops required for 16-bit register are _________.
   j) What is Full Adder?

UNIT-I

Q.2 Solve the following:
   a) \((65.75)_{10} = (\_\_\_\_)_{2} = (\_\_\_\_)_{8}\)
   b) Add 1101 and 0101
   c) Subtract 65 from 75 using 2’s complement method.
   d) Find l’s complement of -46.

Q.3 Write short notes on:
   a) Binary codes.
   b) ASCII and EBCDIC.

UNIT-II

Q.4 Simplify the following using K-map:
   a) \(f(x, y, z) = \sum (0, 1, 4, 5)\)
   b) \(f(a, b, c, d) = \sum (0, 1, 2, 3, 4, 5, 6, 7)\)

Q.5 a) What do you understand by Universal Gates? Explain.
   b) \(f(a, b, c) = \bar{a}b + ac + bc\)
Q.6 Write short note on:
   a) Multiplexers.
   b) Half Adder.  

Q.7 What are flip flops? Discuss any two types of flip-flop with logic diagram and truth table.  

UNIT-IV  

Q.8 Write short notes on:
   a) Associative memory.
   b) Virtual memory.  

7½x2  

Q.9 a) Write a short note on: ‘microprocessor’.
   b) Explain processor and its types.  

7

BCA - Third Semester  
PROGRAMMING IN C++ (BCA-3001)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 2

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit.  
   Q.1 is compulsory. Each question carries equal marks.

Q.1 a) Which of following is not an OOP feature in C++?
   b) To be called object oriented, a programming language must allow:
      i) Function that return value. ii) Inheritance. iii) Library of predefined function.
      iv) Public.
   c) Which type is best suited to represent logical value?
      i) Integer. ii) Boolean. iii) Character. iv) All of these.
   d) Which of following is not a type of constructor?
   e) What is an object?
      i) A combination of message and data. ii) A combination namespace.
      iii) Combination of task to be performed. iv) A combination of array.
   f) What modifiers may be used with top level class?
      i) Public. ii) Abstract and final. iii) Both i) and ii) iv) Only ii)
   g) The data in a class also called:
      i) Attributes. ii) Instance variable. iii) Fields. iv) All of the above.
   h) The value 132.54 can be represented using which data type?
      i) Float. ii) Void. iii) Int. iv) bool.
   i) Pick out the correct object about the instantiation of output stream.
   j) Can abstract classes be inherited?
      i) Yes ii) No

Write short notes on the following:
k) Class.  
l) Strings in C++.  

**UNIT-I**

Q.2 Explain different types of specifiers available in C++.  

Q.3 Explain basic principles of object oriented language.  

**UNIT-II**

Q.4 Explain following:  
a) Static data member.  
b) Dynamic initialization of an object.  
c) Type conversion.  

Q.5 Write a program to overload (_____ ) operator.  

**UNIT-III**

Q.6 What do you mean by inheritance? Explain with an example.  

Q.7 Explain the following:  
a) Multiple inheritances.  
b) Multilevel inheritance.  
c) Hierarchal inheritance.  

**UNIT-IV**

Q.8 Write a program to showcase the use of try, catch, throw blocks.  

Q.9 Write short notes on the following:  
a) User defined classes.  
b) Generic functions.  
c) Aggregation.
**Q.1** Explain the following:

a) After rounding off the number 2.8732 to the two decimal places, we get no. ___________.

b) In Newton Raphson method for finding the real root of equation $f(x) = 0$, the value of $x$ is given by _______________.

c) Construct a backward difference table for the following values $X, Y$:

<table>
<thead>
<tr>
<th>X</th>
<th>10</th>
<th>20</th>
<th>30</th>
<th>40</th>
<th>50</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>45</td>
<td>65</td>
<td>80</td>
<td>92</td>
<td>100</td>
</tr>
</tbody>
</table>

d) State the normal equations for fitting a straight line $y = ax + b$.

e) The method of __________ is most systematic procedure to fit a unique straight line from the given data.

f) State the Fuller’s general formula for $y^1 = f(x, y)$ with $y(0) = y_0$.

g) State Runge Kutta method of 4th order.

h) Formula to calculate standardized normal random variable is __________.

i) Probability of failure in binomial distribution is denoted by __________.

j) State Lagrange’s interpolation formula.

**UNIT-I**

**Q.2** a) Find a real root of the equation $X^3 - 4X - 9 = 0$ correct up to two decimal places by bisection method.

b) Use Newton Raphson method to evaluate $\sqrt{12}$ correct up to two decimal places.

**Q.3** a) Using Euler’s method to solve $\frac{dy}{dx} = x + y, \ y(0) = 0$, find $y(1.0)$

b) Evaluate $\int_0^4 e^x \, dx$ by using:
i) Trapezoidal Rule.

ii) Simpson’s $\frac{1}{3}$ Rule.

**UNIT-II**

Q.4  
a) Fit a straight line if:

<table>
<thead>
<tr>
<th>X</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>3</td>
<td>4</td>
<td>6</td>
<td>9</td>
<td>12</td>
</tr>
</tbody>
</table>

b) Use Lagrange’s method to find the value of $f(x)$ when $X = 7$ from the given dots:

<table>
<thead>
<tr>
<th>X</th>
<th>5</th>
<th>6</th>
<th>9</th>
<th>11</th>
</tr>
</thead>
<tbody>
<tr>
<td>$f(x)$</td>
<td>12</td>
<td>13</td>
<td>14</td>
<td>16</td>
</tr>
</tbody>
</table>

Q.5  
Find the value of $f(6.5)$ and $f(2.5)$ by using the following data:

<table>
<thead>
<tr>
<th>X</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>$f(x)$</td>
<td>1</td>
<td>8</td>
<td>27</td>
<td>64</td>
<td>125</td>
<td>216</td>
<td>343</td>
<td>512</td>
</tr>
</tbody>
</table>

**UNIT-III**

Q.6  
Compute the node of the following distribution:

<table>
<thead>
<tr>
<th>Class</th>
<th>0-7</th>
<th>7-14</th>
<th>14-21</th>
<th>21-28</th>
<th>28-35</th>
<th>35-42</th>
<th>42-49</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequency</td>
<td>19</td>
<td>25</td>
<td>36</td>
<td>72</td>
<td>51</td>
<td>43</td>
<td>28</td>
</tr>
</tbody>
</table>

Q.7  
12 coins are tossed. What is the probability in a single tossing getting?

a) 9 or more heads.

b) Less than 3 heads.

c) Atleast 8 heads.

**UNIT-IV**

Q.8  
Explain the following terms:

a) Random Sampling.

b) Stratified Sampling.

c) Purposive Sampling.

Q.9  
Give the situation when you will apply:

a) Left tailed test.

b) Right tailed test.

c) Two tailed test.
End Semester Examination, Dec. 2017  
BCA - Third Semester  
SOFTWARE ENGINEERING (BCA-3004)  

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1  

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.  
Q.1 is compulsory. All questions carry equal marks.  

Q.1 a) What is software engineering?  
b) What are SDLC models available?  
c) What is the major advantage of using incremental model?  
d) What is error, mistake and fault?  
e) What is GANTT Charts?  
f) What is feasibility study?  
g) What is SRS and why it is used?  
h) What is modularization?  
i) What is cohesion?  
j) What is black box testing?  

UNIT-I  

Q.2 Explain the different goals and principles of software engineering in detail.  
15  

Q.3 What are waterfall model and spiral model? Explain them with examples.  
15  

UNIT-II  

Q.4 Explain project scheduling using PERT, GANTT Charts with suitable examples.  
15  

Q.5 Explain data structure metrics, information flow metrics and information metrics with suitable examples.  
15  

UNIT-III  

Q.6 Explain the following with suitable examples:  
a) Software design principles.  
b) Cohesion and coupling.  
c) User interface design.  
5×3
Q.7 Explain software testing, testing process, testing life cycle with suitable examples.

UNIT-IV

Q.8 Explain the following with examples:
   a) Coverage testing.
   b) Fault based testing.

Q.9 Explain software quality assurance and control with suitable examples. Also explain the ISO-9001 standards for software quality in detail.

End Semester Examination, Dec. 2017
BCA — Fourth Semester
WEB APPLICATION DEVELOPMENT (BCA-4001)

Time: 3 hrs. Max Marks: 75
No. of pages: 2

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. Q.1 is compulsory. Each question carries equal marks.

Q.1 Explain the following:
   a) Each computer connected to the internet must:
      i) be an IBM PC.
      ii) have a unique IP address.
      iii) be internet compatible.
      iv) have a modem connection.
   b) A world wide web contains web pages:
      i) residing in many computers.
      ii) created using HTML.
      iii) with links to other web pages.
      iv) residing in many computers linked together using HTML.
   c) HTML stands for:
      i) Hypertext making links.
      ii) Hypertext markup language.
      iii) Higher textual marking of links.
      iv) Hypertext mixer of links.
   d) The preferred topology for LAN is:
      i) Star.
      ii) Bus.
      iii) Ring.
      iv) Mesh.
   e) The extension of JavaScript file is:
      i) .html
      ii) .css
      iii) .js
      iv) None of these.
   f) Which JavaScript function is used to convert the string into integer? Give its syntax.
   g) Explain definition list in HTML.
h) Explain web browser.
i) Define SMTP.
j) What do you mean by protocol?  

UNIT-I

Q.2 a) Explain any three search engines, in detail with their pros and cons.  10  
b) Explain Email architecture in detail.  5

Q.3 a) What do you mean by network? What are various types of computer network?  10  
b) Explain the term Internet addressing.  5

UNIT-II

Q.4 Explain the following tags with their syntax and semantics:
a) Font.  
b) Image.  
c) UL.  
d) OL.  
e) Href.  3×5

Q.5 a) What are various types of linking? Explain with the help of example.  10  
b) Explain the structure of HTML.  5

UNIT-III

Q.6 Write the source code for the table given below:

<table>
<thead>
<tr>
<th>Category</th>
<th>height</th>
<th>weight</th>
<th></th>
<th>eyes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Males</td>
<td>1.9</td>
<td>0.003</td>
<td>40%</td>
<td></td>
</tr>
<tr>
<td>Females</td>
<td>1.7</td>
<td>0.002</td>
<td>43%</td>
<td></td>
</tr>
</tbody>
</table>

15

Q.7 Write the source code for the frame divided into 3 rows (20%, 50% remaining). Divide first row into 3 equal columns and third row into two equal columns. Every frame should have a source file.  15

UNIT-IV

Q.8 a) Differentiate between internal and external style sheets. Explain with example.  7  
b) What do you mean by a dialog box? What are the different dialog boxes in JavaScript? Explain with example.  8

Q.9 a) Differentiate between check box and radio button with example.  7  
b) What are the different data types in JavaScript? Explain.  8
End Semester Examination, Dec. 2017
BCA – Fourth Semester
OPERATING SYSTEM (BCA-4002)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each UNIT.  
Q.1 is compulsory. All questions carry equal marks.

Q.1 Fill in the blanks:
   a) A binary semaphore has valves ______ or __________.
   b) ________ condition must hold for non-sharable resources.
   c) In _______ scheme a routine is not loaded into memory until it is called.
   d) ______ is used to organize files.
   e) ________ and __________ are the examples of block oriented devices.

Answer the following:
   f) What is a critical section?
   g) What is a semaphore?
   h) What are the attributes of a file?
   i) State producer consumer problem.
   j) What do you understand by context switch?

$1\frac{1}{2} \times 10$

UNIT-I

Q.2 Discuss the following:
   a) Multi-programming.
   b) Multi-tasking.
   c) Multi-threading.  

$5 \times 3$

Q.3 How would you see operating system as an extended machine and resource manager? Discuss in detail.  

$15$

UNIT-II

Q.4 What is a process? What is the difference between process and a program?  
Discuss process control block. Also, draw the process state diagram.  

$15$
Q.5 What do you understand by a deadlock? What are the necessary conditions for a deadlock? Discuss any one deadlock detection technique.  

UNIT-III

Q.6 What is the difference between internal and external memory fragmentation? Also, explain why compaction is used in memory management?  

Q.7 Discuss concept of swapping in virtual memory. Give suitable examples.  

UNIT-IV

Q.8 Explain various methods for free space management. Illustrate it with an example.  

Q.9 Discuss the concept of disk-scheduling. Explain the disk scheduling criteria. Illustrate with example. Also discuss any one disk-scheduling algorithm.  

End Semester Examination, Dec. 2017  
BCA – Fourth Semester  
MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE (BCA-4003)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 2  
Note: Attempt FIVE questions in all; taking at least ONE question from each Unit. Q.1 is compulsory. Each question carries equal marks.

Q.1 Answer the following:
  a) What is recurrence relation?
  b) \((A \cup B)^c = \) 
  c) Write the set \(A = \{ x : x^2 = 25 \} \) in tabular form. 
  d) Define path. 
  e) What is weighted graph? 
  f) Determine the cardinality of \( P \cap Q \). 
  g) State Associatives Law. 
  h) DNF in Boolean algebra stands for _______. 
  i) Define Euler circuit. 
  j) Define complementary graph.  

UNIT-I

Q.2 a) Prove by mathematical induction: 
\[ 1 + 2 + 3 + 4 + \ldots + n = \frac{n(n+1)}{2}. \]  
b) In a survey of 200 musicians, it was found that 40 wore gloves on the left hand and 39 wore gloves on the right hand. If 160 wore no. gloves at all; then:  
  i) how many wore gloves on only right hand?
ii) how many wore gloves on both the hands?

8

Q.3  a) Show that \(10! - 8! \neq (10 - 8)!\)
     b) From 10 programmers, in how many ways can 5 be selected when.
        i) a particular programmer is included every time.
        ii) a particular programmer is not included at all.

UNIT-II

Q.4  Solve the difference equation \(a_r - 3a_{r-1} + 2a_{r-2} = 0\)
     and find particular solution such that \(a_0 = 1\) and \(a_1 = 4\).

Q.5  Prove that the statement \(\sim (p \lor q) \lor (\sim p \lor \sim q)\) is a contingency.

UNIT-III

Q.6  Verify:
      a) \((x + y + z)(x'y'z') = xy + yz + zx\) algebrically.
      b) Consider the lattice \(L = \{1, 2, 3, 4, 5\}\) as shown in figure below:

```
           5
          / \         \\
        3   4
          \ /         \
           2
```

      Determine all the sublattices with three or more elements.

Q.7  a) Draw Hasse diagram of \(D_{101}\).
     b) State De-Morgan Laws. Verify one of the Demorgan’s Law using truth table.

UNIT-IV

Q.8  a) Discuss Hamiltonian path and Hamiltonian graph along with an example.
     b) Draw a regular graph of degree 2 and 3.

Q.9  a) Determine Preorder, Post-order and In-order traversal of the binary tree:
Q.1 Multiple choice questions:
   a) Which data communication method is used to transmit the data over a serial communication link:
      i) Simplex  
      ii) Half duplex  
      iii) Full duplex  
      iv) None of these  
   b) Error detection at the data link layer is achieved by:
      i) Bit stuffing  
      ii) CRC  
      iii) Hamming code.  
      iv) None of these  
   c) Loss in signal power, as light travels down the fiber is called:
      i) Attenuation  
      ii) Propagation  
      iii) Scattering  
      iv) None of these  
   d) The topology with highest reliability is:
i) Bus topology
ii) Star topology
iii) Ring topology
iv) None of these
e) In OSI model dialogue control and token management are responsibilities of:
i) Session layer
ii) Network layer
iii) Transport layer
iv) None of these

**Fill in the blanks:**
f) The OSI model consists of _______ layers.
g) In data communications, ATM is an acronym for _______.
h) Encryption and Decryption are functions of the _______ layer.
i) _______ is a popular congestion control algorithm.
j) HTTP stands for _______.

UNIT-I

Q.2 a) What do you understand by communication? Draw the basic block diagram of communication system.  
5
b) Explain amplitude modulation and frequency modulation with suitable example.  
10

Q.3 Explain the difference between service point address, logical address and physical address in the context of OSI reference model and also explain the responsibilities of session layer and physical layer.  
15

UNIT-II

Q.4 Why a layered architecture was chosen to design network model? Explain TCP/IP model in detail.  
15

Q.5 In stop and wait flow control method, the receiver receives ACK’s for each data frame received. Explain the concept along with various cases.  
15

UNIT-III

Q.6 What are the various routing protocols used in computer networks? Differentiate between link state routing and distance vector routing with suitable examples.  
15

Q.7 Explain the following:
a) Frame format of Ethernet.  
b) Frame format of token bus.  
c) Sliding window ARQ.  
5x3

UNIT-IV

Q.8 What do you understand by cryptography? Explain different types of cryptography by stating suitable examples.  
15

Q.9 Write short notes on:
a) DNS.  
b) FTP.  
c) Firewalls.  
5x3
Q.1 a) Fill in the blanks:
   i) CUI stands for _______.
   ii) Joystick is an _______ device.
   iii) WCS stands for _______.
   iv) Circle ( ) used _______ number of parameters.
   v) There are _______ types of projections.

Q.1 b) Write short notes on the following:
   i) Output device.
   ii) Clipping.
   iii) Turbo C compiler.
   iv) Character generation.
   v) Normalized device co-ordinate system.

UNIT-I

Q.2 Explain CRT in detail.

Q.3 Explain the following:
   a) Display processor.
b) Touch Panel.  
c) Graphic standard.  

**UNIT-II**

Q.4 What do you mean by transformation? Explain, in detail.  

Q.5 Explain Cohen Sutherland algorithm for line clipping.  

**UNIT-III**

Q.6 What do you mean by projection? Explain different type of projections.  

Q.7 How 3-D is different from 2D? Explain through an example.  

**UNIT-IV**

Q.8 Explain any 5 graphics functions with their syntax and purpose.  

Q.9 Write a program in C language to draw a chess board.  

---

**End Semester Examination, Dec. 2017**

BCA – Fifth Semester

**JAVA PROGRAMMING (BCA-5002)**

Time: 3 hrs  
Max Marks: 75  
No. of pages: 1  

Note: Attempt **FIVE** questions in all; **taking at least ONE question** from each **UNIT**.  
**Q.1 is compulsory.** All questions carry equal marks.

Q.1答 the following:  
a) How many reserved keywords are currently defined in Java?  
b) Which keyword is used to define interfaces in Java?  
c) Which access specifier can be used for an interface?  
d) Decrement operator, --, decreases value of a variable by what number?  
e) Method overloading is process of defining two or more methods within same class that have same name but different parameter declaration **(True/False)**.  
f) Thrown keyword is not a part of Exception Handling **(True/False)**.  
g) Void is the return type of a method that does not return any value **(True/False)**.  
h) Define Class.  
i) _______ is a method having same name as that of its class:  
   i) Constructor  
   ii) Class  
   iii) Delete.  
j) _______ operator is used to generate an instance of an exception that can be thrown by using throw:  
   i) New  
   ii) Malloc  
   iii) None.  

**UNIT-I**
Q.1 Explain the following:
   a) Define execution time.
   b) Define compilation time.
   c) Define Interpreter.
   d) Define linker.
   e) What is the need of optimization?
   f) What is the function of Push and Pop command.
   g) Define System software.
   h) Define Application software.
   i) What are overlays?
   j) Define Macros.

UNIT-I

Q.2 Explain the following terms:
Q.3 Explain the Evolution of System Software with proper diagram.  

UNIT-II

Q.4 What are the different phases of compiler? Explain with suitable examples.  

Q.5 Explain the design of two-pass macro preprocessor.  

UNIT-III

Q.6 What are loaders? Name different loading schemes? Explain any one scheme, in detail with suitable examples.  

Q.7 Write short notes on:
   a) Binders.
   b) Relocability.  

UNIT-IV

Q.8 Explain the design of two-pass assembler with suitable examples.  

Q.9 a) Differentiate between one-pass and two-pass assembler.  
   b) What are the three types of statements used in Assembler? Explain with examples.  

End Semester Examination, Dec. 2017  
BCA / B.Sc. (IT) – Fifth Semester  
E-GOVERNANCE (BCA-5008/IT.519)

Time: 3 hrs  
Max Marks: 100

Note: Attempt FIVE questions in all; PART-A is compulsory. Attempt ANY FOUR questions from PART-B. Each question carries equal marks.

PART-A

Q.1 Multiple choice questions:
   a) Which of the following statements is/are correct about e-Pragati?
      i) ‘e-Pragati’ is a comprehensive framework for implementing e-governance and provides services to citizens of Karnataka.
      ii) It is developed in association with Infosys.
      a) Only 1  b) Only 2   c) Both  d) None  
   b) The person who is protected under data protection law is known as:
      i) Information Commissioner  ii) Data Subject  iii) Data Controller  iv) None of the above  
   c) With which Andhra Pradesh is seeking collaboration for initiatives in e-governance and cyber security?
      i) Google  ii) Microsoft  iii) Intel  iv) Apple  
   d) When did IT Act 2000 come into effect?
i) 2000 October 17  ii) 2001 October 17
iii) 2000 November 11  iv) 2001 November 11

e) The National Food Security Mission (NFSM) aims to enhance the production of:
   i) Rice    ii) Wheat    iii) Fruits    iv) Vegetable    v) Pulses

f) Which of the following schemes has an impact on women empowerment?
   i) ICDS    ii) ASIDE    iii) Swadhar    iv) Ujjawala

g) When two companies are linked together by computers and they send business transactions through these computers, they are probably using:
   i) B2C    ii) Digital Wallets    iii) Smart Cards    iv) Electronic Data Interchange

h) PRI stands for:
   i) Prime Resource Inform    ii) Panchayati Raj Institution
   iii) Post Record Information    iv) None of the above

   i) Which project had a PAN India influence:
      i) Dirty reads    ii) Phantom reads
      iii) Lost updates    iv) Unrepeatable reads

   j) G2C services are more connected to:
      i) Students    ii) Labour
      iii) Old Age People    iv) All of the above. 2x10

**PART-B**

**Q.2** What is e-governance? How it is helpful to implement the new policies of the government in an effective manner? Explain. 20

**Q.3** What are the different security concerns in the context to implementation of e-Governance? Explain all, in detail, with the help of suitable example. 20

**Q.4** Explain the difference between:
   a) G2C and G2G.
   b) B2B and B2C.
   c) e Commerce and m Commerce. 20

**Q.5** There are number of barriers or limitations while implementing the e Governance in any country. List out any five major barriers in the context to the mentioned purpose. 20

**Q.6** What kind of administrative culture is in India? Do you think that really India is facing lot of problems due to the so called “Babu Giri”? Explain with the help of any your real life experience in regard to the above mentioned purpose. 20
End Semester Examination, Dec. 2017
BCA - Sixth Semester
BASICS OF MIS AND ERP (BCA-6001)

Time: 3 hrs  Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit.
Q.1 is compulsory. All questions carry equal marks.

Q.1 Answer the following:
a) Five benefits of ERP in plant maintenance.
b) Why SAP is better than ERP? Give three reasons.
c) What is MIS?

UNIT-I

Q.2 Explain the role of MIS in better decision making for any organization. Cite an example to prove this.
Q.3  a) What are the characteristics of MIS?  
     8  
b) What are the about myths about MIS?  
     7  

UNIT-II

Q.4  What is the classification of different models of decision making? Explain different types of models.  
     15  

Q.5  Explain the components of Human Resource Information System  
     15  

UNIT-III

Q.6  a) Why SAP is better than ERP?  
     8  
b) What are the benefits of ERP for any organization?  
     7  

Q.7  Explain the different components of ERP in detail.  
     15  

UNIT-IV

Q.8  Explain the benefits of ERP in Marketing and Sales. Give an example in support of your statement.  
     15  

Q.9  a) How ERP helps in material management?  
     8  
b) What are the benefits of ERP for any manufacturing organization?  
     7  

End Semester Examination, Dec. 2017  
BCA - Sixth Semester  
PROGRAMMING IN .NET (BCA-6002)  

Time: 3 hrs  
Max Marks: 75  
No. of pages: 2  

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit.  
Q.1 is compulsory. All questions carry equal marks.  

Q.1  Answer the following:  
a) Which of the following converts the expression to Boolean data type in VB. NET?  
   i) CBool  
   ii) CByte  
   iii) Cchen  
   iv) CDate  
b) Statement is used to declare a variable:
UNIT-I

Q.2 What do you understand by IDE? How this development environment is helpful in developing the application softwares in an easy and user-friendly mode. 15

Q.3 a) What are the different data types available in VB .NET? Explain all in detail. 8
b) Explain the difference between variable and constant with the help of suitable example. 7

UNIT-II

Q.4 a) Differentiate between procedure oriented programming and object oriented programming in detail.
b) What are the different common controls in VB .NET? Explain at least five controls with their usage. 15

Q.5 What do you mean by function? What are the different types of functions available in VB .NET? Explain in detail. 15

UNIT-III

Q.6 Write short notes on:
a) Combo box control.
b) Group box control.
c) Picture box control.
Q.7 What is database connectivity? What are the different ways to get connected with database in VB .NET?

15

UNIT-IV

Q.8 What is ADO .NET? What are the different components of ADO .NET? Explain all components in detail with the help of suitable diagrams.

15

Q.9 What are the different OOPS features? Explain all the features in detail with the help of suitable example.

15

End Semester Examination, Dec. 2017
BCA - Sixth Semester
MULTIMEDIA CONCEPTS AND APPLICATIONS (BCA-6003) / MULTIMEDIA AND ANIMATION (BCA-603)

Time: 3 hrs
Max Marks: 75
No. of pages: 2

Note: Attempt FIVE questions in all; taking at least ONE question from each Unit.
Q.1 is compulsory. All questions carry equal marks.
Q.1 Choose the correct option **(any ten):**

a) A multimedia file:
   i) is same as any other regular file
   ii) must be accessed at specific rate
   iii) stored on remote server cannot be delivered to its client
   iv) none of the above.

b) A browser is used to view:
   i) Program code
   ii) Story boards
   iii) Fonts
   iv) web based pages and documents

c) Which of the following is displayable on a web page after installation of a browser plug-in?
   i) Windows 7
   ii) Adobe Flash
   iii) Mozilla
   iv) Internet explorer

v) Firefox

d) In a real-time video conference, data from the server is ________ to the client sites:
   i) Unicast
   ii) Multicast
   iii) Broadcast
   iv) None of the above

e) ________ is used to compress video.
   i) MPEG
   ii) JPEG
   iii) Either i) or ii)
   iv) None of the above

f) Which of the following is a character encoding system?
   i) Font Tab
   ii) HTML
   iii) CSS
   iv) WYSIWYG

v) Unicode

g) Vector-drawn objects are used for all of the following except:
   i) Lines
   ii) Circles
   iii) Polygons
   iv) Photographs

v) Boxes

h) A 24-bit image is capable of representing how many different colors?
   i) 2
   ii) 16
   iii) 256
   iv) 65536
   e) 16772216

i) An interface should:
   i) be "transparent" to the user
   ii) provide control to the people who use it
   iii) allow the user to move about within the project
   iv) provide access to the "media" in the project
   v) all of the above

j) In general, the animation may appear jerky and slow if each frame is displayed for more than about:
   i) 1/30 of a second
   ii) 1/15 of a second
   iii) 1/4 of a second
   iv) 1/2 of a second

k) To create a smooth transition between two images when morphing, it's important to set numerous:
   i) Layers
   ii) Keyframes
   iii) Key points
   iv) Anchor tags

v) Splines

**UNIT-I**

Q.2 a) Describe briefly the history and future of multimedia. How might multimedia be used to improve the lives of its users?

b) Describe several different environments in which multimedia might be used, and several different aspects of multimedia that provide a benefit over other forms of information presentation.
Q.3 a) Define the following:
   i) Interactive Multimedia.
   ii) Non-linear Multimedia.
   iii) HTML.
   iv) Multimedia in Medical industry.
b) What are the various areas where Multimedia is extensively used? Explain its role in Army and in Medicine.

UNIT-II

Q.4 a) Describe the difference between a typeface and a font and list at least three attributes of a font
b) Discuss the importance of text and ways text can be leveraged in multimedia presentations.

UNIT-III

Q.5 a) Describe what characteristics a block of text might have.
b) What characteristics a typeface might have?

UNIT-IV

Q.6 Write short notes on (any three):
   a) Lossy and lossless compression.
   b) Entropy encoding.
   c) Source encoding techniques.
   d) Data decompression and its advantages.

Q.7 Differentiate among bitmap, vector and 3D images and describe the capabilities and limitations of all three

Q.8 a) Define ‘animation’. Describe how it can be used in multimedia?
b) Discuss the principles of animation. What do you mean by 2D, 2.5 D and 3 D animations?

Q.9 Discuss the physical and psychological principles as to why animation works, as well as how it is usually presented.
Q.1 Answer the following:
   a) Differentiate between TCP and UDP.
   b) Name the different type of memory.
   c) What is POST?
   d) Name the layers of TCP/IP protocol suite.
   e) Differentiate between cold and hot booting.
   f) What is “power good” signal to motherboard?
   g) What is BIOS?
   h) Differentiate SATA and PATA.
   i) What are different functions available in MS-Excel? Name any four.
   j) Which operating system is secure WINDOWS10 or LINUX and why?

PART-A

Q.2 a) “BPO’s are becoming popular”. Explain its advantages and disadvantages for an organization.
   b) What are the different BPO models? Explain in detail. Also, justify the following sentence. “Now a days, KPOS are emerging at a rapid pace”.

Q.3 Explain the booting procedure of computer system. Differentiate between HOT and COLD booting. If your computer does not boot properly, what are the steps that should be followed during the troubleshooting? What is BIOS and POST?

Q.4 a) Write down the steps to troubleshoot the monitor, if it is not detected by the computer system.
   b) Now a days, due to growth of Information Technology, there are some security threats related to data. How to assess and mitigate the information security threats?

PART-B

Q.5 a) Explain the TCP/IP protocol suite. Explain the functioning of all layers.
   b) Explain different network topologies. Also, compare them with the help of table.

Q.6 a) Explain the Token Ring and Token Bus in detail with frame format, operations.
   b) What is switch, bridge, router, repeater and gateway? Explain.

Q.7 Write short notes on:
   a) Green computing.
   b) FAT V/S NTFS.
   c) RAM V/S ROM.

End Semester Examination, Dec. 2017
B. Sc. (Information Technology) — First Semester
INFORMATION TECHNOLOGY SYSTEM (7.101)
Q.1 Answer the following:
   a) A light sensitive device that converts drawing, printed text or other images into digital form is called _________.
   b) Which protocol provides e-mail facility among different hosts:
      i) FTP.
      ii) SMTP.
      iii) TELNET.
      iv) SNMP.
   c) ________ is the time during which a job is processed by the computer.
   d) MICR stands for ________.
   e) Who invented the super computer?
   f) Which of the following operating system is produced by IBM:
      i) OS-2
      ii) Windows.
      iii) DOS.
      iv) UNIX.
   g) When was the first e-mail sent:
      i) 1963.
      ii) 1969.
      iii) 1971.
      iv) 1974.
   h) Combination of two or more networks are called _________.
   i) A communication pathway that transfers data from one point to another is called _________.
   j) ________ performs modulation and demodulation. 1½×10

PART-A

Q.2 Write short notes on:
   a) Types of ports.
   b) System unit and its explanation.
   c) Internet technologies. 5×3

Q.3 a) Compare the five generations of computers on the basis of software technology used. 8
   b) Write a detailed note on internet and its importance. 7

Q.4 What are the various input-output devices available? Explain, in detail. 15

PART-B

Q.5 a) Explain computer virus. What are the various types of threats that can be faced by computer system? 10
   b) How do header and footer can be inserted in a document? Explain its steps. 5

Q.7 Write short notes on the following in Excel:
   a) Data Sorting.
   b) Pivot Table.
c) Goal Seek.  5×3

Q.7  a) How animations of various types can be applied in power point presentation? Discuss all methods, in detail.  10
b) Write the steps for creating a table in MS-Access.  5
Q.1 Choose the correct option:
a) Which of the following statements are true with respect to "Communication"?
   i) It forms the foundation for planning.
   ii) Controlling is not possible without written and oral communication.
   iii) Both i) and ii).
   iv) None of the above.
   
   b) In formal letters to have a desired effect on the reader, it should be:
   i) Free of any grammatical or spelling errors.
   ii) Polite, even if you are complaining.
   iii) Short and to the point.
   iv) All of the above.
   
   c) The goal of a negotiation process should always be:
   i) We should be able to judge and use the vulnerability of the other party.
   ii) We should be able to sell the products at our specified price.
   iii) A win-win situation wherein both the parties are satisfied.
   iv) There may/may not be any future business relationship.
   
   d) Disruptive behavior in a team means:
   i) Being overly aggressive.
   ii) Withdrawing and refusing to co-operate.
   iii) Raising irrelevant matters.
   iv) All of the above.
   
   e) The non-verbal communication displayed by attitude towards time, through punctuality and late arrival is called:
   i) Haptics.
   ii) Chronemics.
   iii) Vocalics.
   iv) Proxemics.
   
   f) State whether the following statements are TRUE or FALSE:
   i) Only 7% of what we communicate is through body language.
   ii) The entering of sound waves into our ears and striking the eardrums is called hearing.
   iii) The tone of our voice conveys our mood, interest, anger etc. to the audience.
   iv) An agenda has to be circulated in advance for meetings.
   v) While listening to a song, we do the "Empathetic" type of listening.

Q.2 What is communication? Explain the communication process in detail. Also discuss the various barriers to communication.

Q.3 "Making an effective presentation is an art which can be mastered with some preparation." Explain in detail.

Q.4. a) What are listening skills? How is listening different from hearing?
   b) Explain the various types of listening with examples.

PART-A

Q.2 What is communication? Explain the communication process in detail. Also discuss the various barriers to communication. 10

Q.3 "Making an effective presentation is an art which can be mastered with some preparation." Explain in detail. 10

Q.4. a) What are listening skills? How is listening different from hearing?
   b) Explain the various types of listening with examples. 5×2

PART-B
Q.5 What is non-verbal communication? Illustrate with suitable examples. Explain the various components of non-verbal communication in detail.

Q.6 a) Why does formal letter writing still hold its relevance in the age of telecommunication? Explain the steps in the formal letter writing process in detail.
   b) Suppose you are V. Sharma. Write a cover letter to Mr. Gaurav Gupta, Manager HR of ABC Ltd., submitting your candidature for an opening in his organization, about which an advertisement was published in a newspaper.

Q.7 Discuss the ‘advantages and disadvantages of internet usage for the youth’ in 200 words.
Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt **ANY TWO** questions from **PART-A** and **TWO** questions from **PART-B.** Each question carries equal marks.

Q.1  
   a) What is logical error?  
   b) What is a constant?  
   c) Why do we use “main method” in a C# program?  
   d) Write the syntax of do-while loop.  
   e) What is concatenation of two strings?  
   f) What is type conversion?  
   g) What is a keyword? Give an example.  
   h) What is arithmetic operator? Give an example.  
   i) How to initialize a 1-D, 2-D array?  
   j) Why to use try catch statements in C#?  

**PART-A**

Q.2  Write a pseudo code for finding largest number among 3 numbers. Also draw a flow chart for same.  

Q.3  Describe toolbox window, server explorer window, property window, design window, source code window with examples.  

Q.4  How many types of built-in functions exist in C#? Explain data types with an example of each type of data.  

**PART-B**

Q.5  Write a program to find the factorial of a number.  

Q.6  How do we create an array? Write a program to implement an array in C#.  

Q.7  Write short notes on the following:  
   a) Error handling techniques.  
   b) While and do while.
Q.1 Answer the following:
   a) BCNF stands for ____________.  
   b) Define ‘metadata’.  
   c) In DDL, we modify the ________ of the table.  
   d) Difference between data and information.  
   e) The symbols used in ER diagrams are ___________.  
   f) Give two Codd’s rules.

PART-A

Q.2 a) Explain the advantages and disadvantages of database system over file system.  
     b) Explain the following terms:
        i) Data dictionary.  
        ii) Two responsibilities of Database Administrator.  

Q.3 a) What do you mean by Data Independence?  
     b) Explain the database architecture in detail.

Q.4 a) What is Normalization? What is the need of normalization?  
     b) Explain the Second Normal Form (2NF) in detail with the help of an example.

PART-B

Q.5 a) Explain three DML (Data Manipulation Language) statements with proper syntax and examples.  
     b) Explain the purpose of primary key with the help of an example.

Q.6 Write short notes on the following:
   a) View.  
   b) Outer join.  
   c) Referential Integrity Constraint.  

Q.7 Give some applications of Business Intelligent Tools in the field of healthcare and education.
B.Sc. (Information Technology) – Second Semester
DATABASE ENGINEERING-I (7.104)

Time: 3 hrs.  
Max Marks: 50
No. of pages: 1

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt any **TWO** questions from **Part-A** and **TWO** questions from **Part-B.** Each question carries equal marks.

Q.1 Fill in the blanks:
   a) Schema is defined as _______.  
   b) 2NF states that _______.  
   c) DDL stands for _______.  
   d) Three clauses used in SQL are _______, _______ and _______.  
   e) Three types of joins available in SQL are _______, _______ and _______.

**PART-A**

Q.2 Explain the responsibilities of database administrator.  

Q.3 Write short notes on the following:
   a) Data models.  
   b) ER diagram.  

Q.4 Explain the 3NF (Third Normal Form) in detail.  

**PART-B**

Q.5 Explain two DDL (Data Definition Language) commands with proper syntax and examples.  

Q.6 Write short notes on the following:
   a) Constraints in SQL.  
   b) Keys in SQL.  

Q.7 What are Business Intelligent Tools? Give some of their applications in various business sectors.
Q.1 Fill in the blanks:
   a) The _____ layer changes bit into electro-magnetic signals.
   b) ______ is the unreliable protocol.
   c) ______ layer lies between the network layer and the session layer.
   d) A cable break in ______ topology stops all transmissions.
   e) ______ are the rules that govern a communication exchange.  

2×5

PART-A

Q.2 Discuss the various components of data communication and explain the advantages of a multipoint connection over a point to point connection.  10

Q.3 Explain the difference between service point address, logical address and physical address in the context of OSI reference model. Also, explain the responsibilities of session layer and physical layer.  10

Q.4 What is ATM? Explain its layered architecture and frame format in detail.  10

PART-B

Q.5 What do you understand by cryptography? Explain different types of cryptography by stating suitable examples.  10

Q.6 Write short notes on:
   a) TCP three way hand shake.
   b) Domain Name System.  10

Q.7 What do you understand by UDP? Explain the characteristics of UDP with its frame format.  10
Q.1 Answer the following:
a) Factors that create opportunities and threats to business units is known as __________ environment.
b) Study of human population is called as __________.
c) Indian is an example of __________ economy.
d) __________ is main motive of business enterprise.

**PART-A**

Q.2 What is business? Explain characteristics and objectives of business. 
10

Q.3 What is environment scanning? Explain need and importance of environment scanning. 
10

Q.4 What is internal environment? Explain various components of internal environment. 
10

**PART-B**

Q.5 What is external environment? Write short notes on any two components of external environment. 
10

Q.6 Compare and contrast various features of capitalist, socialist and mixed economy with their implications. 
10

Q.7 Write short notes on:
a) Government Rules. 
b) GST Analysis. 
10
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – First Semester
MATHEMATICS FOR COMPUTING (7.107)

Time: 3 hrs. Max Marks: 50
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 a) Define central tendency in statistics.
b) What do you mean by independent events in probability?
c) What do you mean by Domain of a function?
d) If \( \begin{bmatrix} 2 & 3 \\ 91 & -100 \end{bmatrix} \)
Find \( |A| \)
e) Define degree of a linear equation.

2×5

PART-A

Q.2 If \( U = \{1, 3, 5, 6, 8, 10, 13, 15, 20\} \)
\( A = \{1, 5, 8\} \), \( B \{10, 15, 20\} \)
\( C = \{5, 8, 6, 20\} \)
\( D = \{13, 20, 8, 6\} \)
Find the following:
a) \( (C \cap D) \cup D \)
b) \( (A \cup B) - (B \cap A) \)
c) \( (A' \cup D') \cap (B' \cap C') \)
d) \( (B - A) \cup (C - D) \cap (A - C) \)
e) \( (A' \cap B') \cap (C' \cup D') \)

2×5

Q.3 a) Find the Domain and Range of the given function.
\( y = 3x + 5 \)
b) If \( f \cdot g : R \rightarrow R \) are defined respectively by:
\( f(x) = 3x^2 + 2x + 2 \)
\( g(x) = 3x + 2 \)
Find
i) \( fof^2 \)
ii) \( fog \)
Q.4 Find $A^{-1}$ where
\[
A = \begin{bmatrix} 1 & 2 & -1 \\ -1 & 1 & 2 \\ 2 & -1 & 1 \end{bmatrix}
\]

**PART-B**

Q.5  
(a) Find standard deviation for the following data:

<table>
<thead>
<tr>
<th>Class Interval</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 10</td>
<td>5</td>
</tr>
<tr>
<td>10 - 20</td>
<td>15</td>
</tr>
<tr>
<td>20 - 30</td>
<td>25</td>
</tr>
<tr>
<td>30 - 40</td>
<td>35</td>
</tr>
<tr>
<td>40 - 50</td>
<td>45</td>
</tr>
</tbody>
</table>

(b) Write formula of arithmetic mean for a grouped data.  

Q.6  
A bag contains 7 red, 12 white and 4 green balls. What is the probability that  
(a) 3 balls drawn are all white.  
(b) 3 balls drawn are one of each colour.  

Q.7  
(a) Simplify:
\[
\frac{3^3 \times 27^3 \times 9^4}{3 \times (81)^4}
\]

(b) Solve:
\[
x^2 - 7x + 10
\]
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Third Semester
SYSTEM ANALYSIS AND DESIGN (7.201)

Time: 3 hrs.  Max Marks: 40
Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt **ANY TWO**
questions from **PART-A** and **TWO** questions from **PART-B.** Each question
 carries equal marks.

Q.1 Write short notes on **(ANY TWO):**
   a) UML.
   b) Prototype.
   c) SRS.
   d) BlackBox testing.  

   **PART-A**

Q.2 Write short notes on the following:
   a) Technical feasibility.
   b) Testing.  

Q.3 What do you understand by requirement gathering? What are the different
   methods of requirement gathering?  

Q.4 What is SSAD? What are the advantages and disadvantages of SSAD?  

   **PART-B**

Q.5 Write short notes on the following:
   a) Structured chart.
   b) Control design.  

Q.6 What is OOAD? How is it different from traditional system analysis and
design?  

Q.7 Write short notes on:
   a) User interface.
   b) User experience.  

   **4×2**
Q.1 Fill in the blanks:
   a) Software mistakes during coding is known as ________.
   b) For a function of an variables, robust-testing yields ________ test cases.
   c) Mutation testing is one form of ________ testing.
   d) Test suite is a ________.

Q.2 Answer the following questions:
   e) What is Beta test?
   f) What is validation?
   g) How many levels are there in CMM model? Name them.
   h) Describe any four attributes of software quality.

Q.3 Consider a program to find the roots of quadratic equation with three input integers
   \([a, b, c]\) that ranges from \([0, 100]\). Design a set of boundary value analysis test cases with one of the following messages:
   a) Not a quadratic equation.
   b) Roots are real and equal.
   c) Roots are real and unequal.
   d) Roots are imaginary.

Q.4 What is white Box Testing? Explain any one method of this testing with suitable testing example.

Q.5 What is software quality attributes? Explain McCall model of software quality.

Q.6 Explain process metrics and product metrics? Explain ISO standards for software development process.

Q.7 Explain the following terms:
   a) Quality Assurance.
   b) Test Execution.
   c) Test Environment.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Third Semester
COMPUTER ALGORITHMS AND DISCRETE MATHEMATICS (7.203)

Time: 3 hrs. Max Marks: 60
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 a) Fill in the blanks:
   i) Data structures are classified as ________ and data structure.
   ii) A ________ data structure is an ordered list with insertion and deletion done at one end of the list known as top of stack.
   iii) ________ and ________ are nonlinear data structure.
   iv) Left, root, right traversal known as ________ traversal.

b) Define the following:
   i) Tree data structure.
   ii) Stack.
   iii) Hamiltonian path.
   iv) Self loop in graph.

PART-A

Q.2 a) Explain the classification of data structure.
   b) Write a short note on quick sort with algorithm.

Q.3 a) Trace heap sort on the list:
   \( L = \{11, 34, 67, 10, 5\} \).
   \( A = \{2, 3, 4\} \) and \( B = \{a, b, c\} \) and \( f = \{(2, a), (3, b), (4, c)\} \). Find domain, co-domain and range of the function.

b) Let \( A = \{7, 8, 9\} \) and \( B = \{k, l, m, n\} \) and \( R = \{(7, k), (8, k), (8, l), (8, m), (9, m), (9, n)\} \), find \( R^{-1}, \overline{R}, DOM(R), RAN(R) \).

PART-B

Q.4 a) Consider the function \( f, g : R \to R \) defined by \( f(x) = x^2 + 3x + 1 \), \( g(x) = 2x - 3 \).
   Find the composition functions:
   i) \( fof \).
   ii) \( gof \).

b) Let \( A = \{7, 8, 9\} \) and \( B = \{k, l, m, n\} \) and \( R = \{(7, k), (8, k), (8, l), (8, m), (9, m), (9, n)\} \), find \( R^{-1}, \overline{R}, DOM(R), RAN(R) \).

Q.5 a) Create the binary tree using inorder and preorder traversal:

<table>
<thead>
<tr>
<th>Inorder</th>
<th>F</th>
<th>B</th>
<th>G</th>
<th>A</th>
<th>D</th>
<th>C</th>
<th>E</th>
<th>J</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preorder</td>
<td>A</td>
<td>B</td>
<td>F</td>
<td>G</td>
<td>C</td>
<td>D</td>
<td>E</td>
<td>J</td>
</tr>
</tbody>
</table>
b) What is spanning tree and when it is called a minimum spanning tree? Write Kruskal algorithm for minimum spanning tree.  

Q.6 a) Define the following:
   i) Forest.
   ii) Binary tree.
   iii) Degree of a vertex.  

b) A bag contains 8 blue and 4 red balls. Two balls are drawn at random with replacement. Find the probability of getting one blue and one red ball.  

Q.7 a) Solve the difference equation:
   \[ a_t - 4a_{t-1} + 4a_{t-2} = 0 \]
   and find the particular solution given that \( a_0 = 1 \) and \( a_1 = 6 \).

b) Define cryptography with an example.
Q.1  Answer the following:
   a) Give names of linear data structure.
   b) Define algorithm.
   c) Define stack.
   d) Define forest.
   e) Define tree.
   f) What is the difference between linear and binary search?
   g) What is the complexity of quick sort?
   h) If \( A = \{2, 4, 6, 8, 10\}; B = \{1, 3, 5, 7, 9\} \) find \( A \cup B \).  

\[1\times8\]

PART-A

Q.2  a) Differentiate between linear and non-linear data structure.  
     b) What is an array? Which operation can be performed on array? Explain with example.  
     
\[4\times4\]

Q.3  What is stack? Explain push and pop algorithm, with example.  

\[8\]

Q.4  Trace a heap sort on the list below:
     10, 50, 20, 30, 25, 90.  

\[8\]

PART-B

Q.5  Create binary tree, using in order and preorder traversal.

\[
\begin{align*}
\text{In order:} & \quad D \ B \ H \ E \ A \ I \ F \ J \ C \ G \\
\text{Pre order:} & \quad A \ B \ D \ E \ H \ C \ F \ I \ J \ G \\
\text{order:} & \quad 
\end{align*}
\]

\[8\]

Q.6  Find minimum spanning tree, using Kruskal’s algorithm of the following graph.
Q. 7  
a) Solve the difference equation \(a_r - 4a_{r-1} + 4a_{r-2} = 0\) and find the particular solution given that \(a_0 = 1\) and \(a_1 = 6\).

b) For the tree shown below:
   i) Which node is the root?
   ii) Which nodes are leaves?
   iii) Name the parent of each node.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – Third Semester
OBJECT ORIENTED PROGRAMMING (7.205)

Time: 3 hrs. Max Marks: 50
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Which of the following is not a member of class?
      i) Static function
      ii) Member function
      iii) Friend function
      iv) Virtual function

   b) Which symbol is used for destructor?
      i) ~
      ii) #
      iii) -
      iv) +

   c) Which of the following approach is adopted by C++?
      i) Top down
      ii) Bottom up
      iii) Right left
      iv) Left right

   d) A constructor has the same _________ as that of class.
      i) Valuable
      ii) Object
      iii) Function
      iv) Name

   e) Two methods with the same name and same parameter.
      i) Abstraction
      ii) Overloading
      iii) Multiplexing
      iv) Duplexing

\[2 \times 5\]

**PART-A**

Q.2 a) Is object oriented programming better than procedural oriented programming? Justify your answer. 5

b) Create a class of employees to store their information:
   Data member:
   Employee ID, employee name, employee salary, employee experience.
   Member function:
   i) To get the employee data.
   ii) If the employee experience is greater than 5 years, a hike of Rs. 1000 will be given in salary.
   iii) Display the employee data.

Q.3 How constructor is called in objected oriented programming? Write a program to show the use of parameterized constructor. 10

Q.4 a) What is static member function? Give an example.

b) Write a program to show the concept of function overloading. 5

**PART-B**

Q.5 What is the relationship between base class and derived class? Write a program to show the concept of multiple inheritance. 10
Q.6 What is polymorphism? Write a program to show the concept of polymorphism. 10

Q.7 How exception handling is implemented in C++? Write a suitable program to demonstrate the concept of exception handling. 10

End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – Third Semester
OBJECT ORIENTED PROGRAMMING (7.205) CBCS

Time: 3 hrs.
Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Which of the following is not a type of constructor?
      i) Copy constructor
      ii) Friend constructor
      iii) Default constructor
      iv) Parameterized constructor
   b) How many instances of an abstract class can be created:
      i) 1
      ii) 0
      iii) 5
      iv) 13
   c) Destructor is a member function whose name is same as the class name but is preceded by a:
      i) tilde
      ii) hash
      iii) dot
      iv) dollar
   d) What is the default modifier for the class member:
      i) Private
      ii) Public
      iii) Internal
      iv) Protected
   e) ______ is the process by which object of one class acquires the properties of objects of another class:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulator
   f) The wrapping of data and functions into a single unit is known as:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulation 2½×6

PART-A

Q.2 a) What are the basic features of object oriented approach? Explain with the help of suitable example. 10
   b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students. 5

Q.3 a) What is function overloading? Explain it with the help of suitable program. 8
   b) Write a program in C++ to swap two number, using pass by value concept. 7

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example. 15

PART-B
Q.5  a) Write a program to show the concept of multilevel inheritance.  b) What is the need of inheritance? Explain the various types of inheritance.

Q.6  a) What is operator overloading? Write a program to show the unary operator overloading.  b) What is polymorphism? Differentiate between compile time and run time polymorphism.

Q.7  a) What is exception handling? Write a program to handle the divide by zero error with exception handling.  b) What is array out of bound exception? Explain.
Q.1 Answer the following:
   a) Which of the following is not a type of constructor?
      i) Copy constructor
      ii) Friend constructor
      iii) Default constructor
      iv) Parameterized constructor  
   b) How many instances of an abstract class can be created:
      i) 1
      ii) 0
      iii) 5
      iv) 13  
   c) Destructor is a member function whose name is same as the class name
      but is preceded by a:
      i) tilde
      ii) hash
      iii) dot
      iv) dollar  
   d) What is the default modifier for the class member:
      i) Private
      ii) Public
      iii) Internal
      iv) Protected  
   e) __________ is the process by which object of one class acquires the
      properties of objects of another class:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulator  
   f) The wrapping of data and functions into a single unit is known as:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulation  

PART-A

Q.2 a) What are the basic features of object oriented approach? Explain with the help of suitable example.  
   b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students.  

Q.3 a) What is function overloading? Explain it with the help of suitable program.  
   b) Write a program in C++ to swap two number, using pass by value concept.  

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example.  

PART-B

Q.5 a) Write a program to show the concept of multilevel inheritance.  

b) What is the need of inheritance? Explain the various types of inheritance.

Q.6  a) What is operator overloading? Write a program to show the unary operator overloading.
     b) What is polymorphism? Differentiate between compile time and run time polymorphism.

Q.7  a) What is exception handling? Write a program to handle the divide by zero error with exception handling.
     b) What is array out of bound exception? Explain.
Q.1 Answer the following:
   a) Which of the following is not a type of constructor?
      i) Copy constructor
      ii) Friend constructor
      iii) Default constructor
      iv) Parameterized constructor
   b) How many instances of an abstract class can be created:
      i) 1
      ii) 0
      iii) 5
      iv) 13
   c) Destructor is a member function whose name is same as the class name but is preceded by a:
      i) tilde
      ii) hash
      iii) dot
      iv) dollar
   d) What is the default modifier for the class member:
      i) Private
      ii) Public
      iii) Internal
      iv) Protected
   e) ________ is the process by which object of one class acquires the properties of objects of another class:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulator
   f) The wrapping of data and functions into a single unit is known as:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulation

Q.2 a) What are the basic features of object oriented approach? Explain with the help of suitable example. 10
   b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students. 5

Q.3 a) What is function overloading? Explain it with the help of suitable program. 8
   b) Write a program in C++ to swap two number, using pass by value concept. 7

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example. 15

Q.5 a) Write a program to show the concept of multilevel inheritance. 8
b) What is the need of inheritance? Explain the various types of inheritance.

Q.6  a) What is operator overloading? Write a program to show the unary operator overloading.
     b) What is polymorphism? Differentiate between compile time and run time polymorphism.

Q.7  a) What is exception handling? Write a program to handle the divide by zero error with exception handling.
     b) What is array out of bound exception? Explain.
Q.1 Explain the following:
   a) DML.
   b) SQL.
   c) IDE.

PART-A

Q.2 Explain Data Designs Tools used in VB .net for connecting to database. 15

Q.3 Design a registration form for a student database in VB .net, taking following user controls in system:
   a) User-‘d
   b) User-name.
   c) User type.
   d) Dept.
   e) Course.
   The data entered by user in form should be stored in database using ADO .net connectivity and explain how the data would be stored in SQL server? 15

Q.4 Make a calculator in VB.net showing has VCA calculation:
   a) Subtraction.
   b) Multiplication.
   c) Addition.
   d) Division. 15

PART-B

Q.5 What is dataset in data configuration wizard? How to import database in windows form? Explain in detail. 15

Q.6 How many different types of perfects used in VB.NET? Explain at least three projects in detail. 15

Q.7 How to add classes in your VB .Net project? Add a class in user registration form in VB. Net. 15
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Fourth Semester
DESKTOP APPLICATION DEVELOPMENT (7.206)

Time: 3 hrs.  Max Marks: 50
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Explain the following:
   a) Data grid.
   b) Data set.
   c) Fill ( ).
   d) Encapsulation.
   e) List box control.  

PART-A

Q.2 What are the different advantages of VB .Net over traditional visual basic? Discuss the features in context to windows programing.  

Q.3 How .Net platform is more industry friendly in comparison to other programing approaches? Explain with the help of a suitable real life example.  

Q.4 What are the different database components in context to ADO .Net? Explain its all components in detail.  

PART-B

Q.5 Differentiate between the following:
   a) Label and textbox.
   b) Check box and radio button.  

Q.6 Explain all the features of object oriented programing in detail. How OOPS concept helps in building strong and secure programs?  

Q.7 Explain the following:
   a) Data access layer.
   b) DDL, DML in SQL.  

2×5

10

10

10

5×2

10

5×2
Q.1 Write short notes on the following:
   a) Malware v/s viruses.
   b) Role of proxy server in information security.
   c) Firewall.
   d) Honey pots and Honey nets.  

   **PART-A**

Q.2 How information security can be performed in an organization? Explain its functions of it in detail.  

Q.3 Explain the security SDLC in detail with the help of diagrams and examples.  

Q.4 What are the international laws for information security?  

   **PART-B**

Q.5 How do you classify information security across an organization? What are ASSET risk?  

Q.6 a) Explain the digital forensic methodology in detail.  
   b) Differentiate between authorization and authentication with the help of an example.  

Q.7 Write short notes on:
   a) Bull’s Eye model for information security.
   b) Information security policy, its standards and practices.
Q.1 Answer the following:
   a) Advantages of DBMS.
   b) Explain the various types of attributes.
   c) Create an E-R diagram of Library Management System.
   d) Discuss error handling and its advantages.  

   **PART-A**

Q.2 Explain the following with example:
   a) Primary key.
   b) Intersection clause.  

Q.3 Differentiate between inner and outer joins in RDBMS. Why are these used? Discuss each join with suitable example.  

Q.4 What are the integrity rules? Explain with example.  

   **PART-B**

Q.5 What is PL/SQL? Differentiate between SQL and PL/SQL. Also, discuss its architecture.  

Q.6 What do you mean by database security? Why it is important for an organization? Also, discuss data tampering.  

Q.7 How to code CLR stored procedure and function? Explain.
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) — Third Semester  
DATABASE ENGINEERING-II (7.214)

Time: 3 hrs.  
Max Marks: 60  
No. of pages: 1  

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt **ANY TWO** questions from **PART-A** and **TWO** questions from **PART-B.** Each question carries equal marks.

Q.1 a) What is DML?  
b) What is primary key?  
c) What is database?  
d) What do you mean by PL/SQL?  
e) What is locking?  
f) What is trigger?  

**PART-A**

Q.2 Design an ER-diagram for an airline reservation system.  

Q.3 What is union, intersection, minus, group by and having clause in SQL? Explain each with an example. How they are different from joins?  

Q.4 What are different types of attributes in RDBMS? What is cardinality? Explain both with suitable examples.  

**PART-B**

Q.5 Differentiate between the following:  
a) Implicit and Explicit cursors.  
b) Local and Stored procedures.  

Q.6 What is a control structure in PL/SQL? Explain it with examples.  

Q.7 What is deadlock prevention? Explain two phase locking with an suitable example.
Q.1 Explain the following (any two):
   a) Functional Requirement.
   b) Requirement Reuse.
   c) Requirement Process.  

**PART-A**

Q.2 What do you mean by information system? Discuss its purpose and characteristics.  

Q.3 Differentiate between:
   a) Management information system and decision support system.
   b) Computer based system and manmade system.  

Q.4 Discuss the various methods of system design with example.  

**PART-B**

Q.5 Under what circumstances iterative models is used? Discuss its merits and demerits.  

Q.6 What do you mean by business strategy? Discuss the various scenarios to understand the real problem.  

Q.7 What do you mean by dataflow diagram? Explain context level DFD with example.
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) - Second Semester  
REQUIREMENT MODELING (7.217)

Time: 3 hrs.  
Max Marks: 60  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Explain the following (any two):  
a) Discuss iterative model with its merits and demerits.  
b) Differentiate between use case diagram and sequence diagram.  
c) Discuss the scope and objective of a business to control the business problem.  

6×2

PART-A

Q.2 Do you think that analysis by a stakeholder is a must in the successful implementation of system? Justify this statement with example.  

12

Q.3 What do you mean by requirement discovery? Explain all fact-finding techniques for requirement discovery.  

12

Q.4 Explain the following with example:  
a) Primary key.  
b) Foreign key.  
c) Composite key.  
d) Super key.  

3×4

PART-B

Q.5 “Communicating the right requirements leads to a successful system”. Justify this statement with the help of example.  

12

Q.6 Data analysis is becoming the need of industry now a days; explain the need of data analysis in education sector.  

12

Q.7 Explain the following:  
a) Requirement Reuse.  
b) Requirement Completeness.  

6×2
Q.1  a) Fill in the blanks:
   i) A program in execution is called as _________.
   ii) Banker’s algorithm is used for _________.
   iii) The time from submission to completion of a process is called _________.
   iv) Swapping needs ________ to store the swapped out programs.  1×4

  b) Answer the following:
   i) Define operation system.
   ii) Differentiate hard-real-time and soft-real-time operating systems.
   iii) Name two types of fragmentations and their solutions.
   iv) Define directory structure in brief.  1×4

PART-A

Q.2  Consider the following set of process:

<table>
<thead>
<tr>
<th>Process</th>
<th>Burst time</th>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>10</td>
<td>3</td>
</tr>
<tr>
<td>B</td>
<td>29</td>
<td>1</td>
</tr>
<tr>
<td>C</td>
<td>3</td>
<td>3</td>
</tr>
<tr>
<td>D</td>
<td>7</td>
<td>4</td>
</tr>
<tr>
<td>E</td>
<td>12</td>
<td>2</td>
</tr>
</tbody>
</table>

Calculate average turn-around time and average wait time for FCFS, SJF and priority algorithms. Also draw neat Gantt charts for the same.  8

Q.3  ‘The layered approach of O.S. operating system acts as a resource manager’, what resources does it manage? Discuss.  8

Q.4  Define the characteristics of the operating systems given below:
   a) Batch operating system.
   b) Real time operating system.  4×2

PART-B

Q.5  Consider the following system snapshot using data structure in the Banker’s algorithm:

<table>
<thead>
<tr>
<th>Allocatio</th>
<th>Max</th>
<th>Availabl</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>n</td>
<td>e</td>
<td></td>
</tr>
<tr>
<td>----</td>
<td>----</td>
<td></td>
</tr>
<tr>
<td>A</td>
<td>B</td>
<td>C</td>
</tr>
<tr>
<td>P₀</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>P₁</td>
<td>1</td>
<td>0</td>
</tr>
<tr>
<td>P₂</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td>P₃</td>
<td>0</td>
<td>6</td>
</tr>
<tr>
<td>P₄</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

Answer the following questions:

a) What are the contents of Need matrix?

b) Find out the safe sequence for the system.

Q.6 Give memory management with the help of paging. How paging is implemented with the help of page table? Explain with an example.

Q.7 What is directory? Explain the concept of disk scheduling with the help of an example.
End Semester Examination, Dec. 2017

WEB APPLICATION DEVELOPMENT (7.303)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1  

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Write short notes on:  
a) Website security.  
b) Singular v/s paired tags.  
c) Ordered list.  
d) Grid view control.  
e) Hyperlinks in HTML.  

**PART-A**

Q.2 What are the various server controls in ASP .net? How to use them?  

Q.3 What do you mean by:  
a) Ajax Extension.  
b) Web Application.  
c) Site navigation.  

Q.5 What is ASP .net? What are the components of .net framework?  

**PART-B**

Q.5 a) Create a MRIU registration form in HTML.  
b) What is CSS? Explain internal CSS with example.  

Q.6 a) Explain frame and frameset tag in HTML with the help of an example.  
b) Explain list view control with an example.  

Q.7 a) Differentiate ordered and unordered list.  
b) Explain three layer architecture of ASP .net.
Q.1 Answer the following:

a) What is the percentage of customers who visit a website and actually buy something called:
   i) Affiliate programs  ii) Click-through  iii) Spam  iv) Conversion rate

b) Which is not a function of E-commerce:
   i) Marketing  ii) Advertising  iii) Warehousing  iv) None of these

c) Which of the following describes e-commerce?
   i) Doing business electronically  ii) Doing business
   iii) Sale of goods  iv) All of the above

d) Which of the following is part of the four main types for e-commerce:
   i) B2B  ii) B2C  iii) C2B  iv) All of these

e) Which segment do eBay, Amazon.com belong?

f) Which type of e-commerce focuses on consumers dealing with each other:

g) Which products are people most likely to be comfortable buying on the Internet:
   i) Books  ii) PCs  iii) CDs  iv) All of these.

h) Most individuals are familiar with which form of e-commerce:

i) Which of the following is a useful security mechanism when considering business strategy and IT:
   i) Encryption  ii) Decryption  iii) Firewall  iv) All of these

j) Which of the following is not related to security mechanism:
   i) Encryption  ii) Decryption  iii) E-cash  iv) All of these

2x10

PART-A
Q.2  a) “The flourishing of e-commerce business have changed the Indian shopping pattern.” List five advantages of e-commerce for an individual.

10

b) Explain the different types of e-commerce.

10

Q.3  What are 4 C’s of e-commerce? Explain in detail.

20

Q.4  a) What is digital signature and what is its utility?

10

b) Write a case study on the latest cyber-attack, giving the source of origin, purpose and impact caused by the attack.

10

PART-B

Q.5  a) What is ERP and its scope?

10

b) What is Supply Chain Management? What is its utility for an organization?

10

Q.6  Discuss the case study of “Amazon” as a successful e-commerce portal.

20

Q.7  a) Write five advantages and five disadvantages of ERP.

10

b) What is electronic marketing?

10

INTELLIGENT AGENTS (BSCA-501)

Time: 3 hrs.  Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1  Answer the following:

a) Define Robotics.

4

b) What is commonly used programming language for AI ________?

2

c) What is a state space?

4

d) Which search method takes less memory?

2

e) A heuristic is way of ________.

4

f) Which predicate logic is applied on “All dogs have fails.”

4

PART-A

Q.2  What kind of techniques will be used for solving AI problems?

20

Q.3  a) Differentiate between blind search techniques and heuristic search techniques.

10

b) Solve cryptarithmetic puzzle:
Q.4  a) Why it is appropriate to use predicate logic than propositional calculus?
    b) Explain the unification algorithm. Trace operation of unification algorithm:
       i) \( f (\text{Marcus}) \) and \( f (\text{Caesar}) \).
       ii) \( f (x) \) and \( f (g(y)) \).

\[ \text{PART-B} \]

Q.5  a) Differentiate between forward and backward reasoning.
    b) Define and explain Conflict Resolution.

Q.6  Explain Bayesian probability network. Discuss Bayes theorem with an example.

Q.7  With the help of a diagram, explain expert system architecture. List and discuss applications of expert system.

\[ \text{Q.1} \]

Answer the following in brief:

a) Define JPEG.

b) Describe the definition of computer graphics.

c) Explain PHIGS.

d) Name three algorithms of scan conversion line drawing.

e) Define point, pixel and circle.

f) Discuss the use of computer graphics in education and training.

g) What is translation? Define its homogenous co-ordinates.

h) What is projection? Name the two types of projections.

i) Define window to viewport mapping.

j) Define various polygon fill algorithm.

\[ \text{PART-A} \]

Q.2  a) What is computer graphics? What is the difference between computer graphics and image processing?
Q.3 a) Draw a line from (0, 0) to (6, 6) and another line from (0, 0) to (20, 10), using the DDA line drawing algorithm. 

b) Plot a line with end points (20, 10) and (30, 18), using Bresenham line drawing algorithm.

Q.4 Find out the pixel location of a circle having centre at (0, 0) and radius is 8, using Bresenham’s circle drawing algorithm.

PART-B

Q.5 Write down the geometric representation in homogenous co-ordinates in all basic transformations. Translate a triangle with vertices A (2, 2), B (5, 2) and C (5, 5) by 3 units in x-axis and 2 units in y-axis.

Q.6 What is projection? Explain its different types. Compare parallel and perspective projections with reference to real world.

Q.7 Define terms viewplane and window. Describe Cohen-Sutherland algorithm for line clipping.
i) Predictive.  
ii) Perceptual.  
iii) both i) and ii)  
iv) none of the above  
g) ________ is used to compress images:  
i) MPEG  
ii) JPEG  
iii) either i) or ii)  
iv) none of the above  
h) MIDI stands for:  
iii) MP3 Instrument Digital Interface.  
i) Space between lines is called:  
i) Leading.  
ii) Kerning.  
iii) Extrude.  
iv) Expanded  
v) Font Mapping.  
j) Which of these is not likely to be the responsibility of a multimedia project?  
i) Create interfaces.  
ii) Ensure the visual consistency of the project.  
iii) Structure content.  
iv) Create budgets and timelines for the project.  
v) Select media types for content.  

**UNIT-I**

Q.2 a) Define Multimedia. Mention the various applications and need of Multimedia in current IT scenario.  

b) What is a Multimedia project and what are the roles of different team members.  

Q.3 a) Which basic Tools and software of multimedia are commonly used?  
b) How is plain text different from formatted text?  

Q.4 Write short notes on (any two) of the following:  
a) Bitmap graphics vs. Vector graphics.  
b) GIF vs. JPEG.  
c) Graphics image sources.  
d) Graphics on internet.  

**UNIT-II**

Q.5 a) Compression of data has made storage comfortable and economic. Elaborate.  
b) Differentiate between lossy and lossless compression with their application in real life situation.  

Q.6 a) How is Hoffman coding different from Arithmetic coding? Explain with proper diagrams.  
b) When and why do we use Differential Encoding in compression?  

Q.7 a) Mention the various principles of animation in multimedia.  
b) Name the different softwares used for 2 D animation and 3D animation.

Note: All questions are compulsory:

Q.1 Read the passage and answer the following questions:

Is Science Dangerous?

The idea that scientific knowledge is dangerous is deeply embedded in our culture. Adam and Eve were forbidden to eat from the Tree of Knowledge, and in Milton's Paradise Lost the serpent addresses the tree as the 'Mother of Science'. Indeed the whole of western literature has not been kind to scientists and is filled with images of them meddling with nature with disastrous results. Just consider Shelley's Frankenstein, Goethe's Faust and Huxley's Brave New World. One will search with very little success for a novel in which scientists come out well - the persistent image is that of scientists as a soulless group unconcerned with ethical issues. And where is there a film sympathetic to science?

Part of the problem is the conflation of science and technology. The distinction between science and technology, between knowledge and understanding on the one hand and the application of that knowledge to making something, or using it in some practical way, is fundamental.
Science produces ideas about how the world works, whereas the ideas in technology result in usable objects. Technology is much older than anything one could regard as science and unaided by any science. Technology gave rise to the crafts of early humans, like agriculture and metalworking. It is technology that carries with it ethical issues, from motorcar production to cloning a human.

By contrast, reliable scientific knowledge is value-free and has no moral or ethical value. Science merely tells us how the world is. That we are not at the centre of the universe is neither good nor bad, nor is the possibility that genes can influence our intelligence or our behaviour.

The social obligations that scientists have as distinct from those responsibilities they share with all citizens comes from them having access to specialised knowledge of how the world works, not easily accessible to others. Their obligation is to both make public any social implications of their work and its possible applications and to give some assessment of its reliability.

It is not easy to find examples of scientists as a group behaving immorally or in a dangerous manner, the classic paradigm being the eugenics movement. The scientific assumptions behind this proposal are crucial; the assumption is that most desirable and undesirable human attributes are inherited. Not only was talent perceived of as being inherited, but so too were insanity and any kind of so-called feeblemindedness. They completely failed to give an assessment of the reliability of their ideas. Quite the contrary, and even more blameworthy, their conclusions seem to have been driven by what they saw as the desirable social implications. By contrast, in relation to the building of the atomic bomb, scientists behaved morally and fulfilled their social obligations by informing their governments about the implications of atomic theory. It was an enormous engineering feat to build the bomb but the decision to do this was taken by politicians, not scientists.

The moralists have been out in force telling us of the horrors of cloning. Many others, national leaders included, have joined in a chorus of horror. But what horrors? What ethical issues? In all the righteous indignation not a single relevant new ethical issue has been spelled out.

Those who propose to clone a human are medical technologists not scientists. It is not, as the bio-moralists claim, that scientific innovation has outstripped our social and moral codes. Just the opposite is the case. Their obsession with the life of the embryo has deflected our attention away from the real issue, which is how children are raised and nurtured. The ills in our society have nothing to do with assisting or preventing reproduction but are profoundly affected by how children are treated.

So what danger does genetics pose? Gene therapy, introducing genes to cure a genetic disease like cystic fibrosis, carries risks, as do all new medical treatments. There may well be problems with the testing of new treatments, but are these difficulties any different from those related to trying out new drugs for AIDS? Anxieties about creating designer babies are at present premature as it is too risky, and we may have, in the first instance, to accept what has been called procreative autonomy, a couple's right to control their own role in reproduction unless the state has a compelling reason for denying them that control. Should the ethical issues relating to the applications of genetics, for example, lead to stopping research in this field? The individual scientist cannot decide, for science, like genetics, is a collective activity with no single individual controlling the process of
discovery. It is ethically unacceptable and impractical to censor any aspect of trying to understand the nature of our world.

Do the following statements agree with the information given in the passage?

In boxes 1-5 on your answer sheet, write

**TRUE** if the statement is true according to the passage

**FALSE** if the statement is false according to the passage

**NOT GIVEN** if the information is not given in the passage

1) The film industry does not make films about science.

2) Scientists do not work in unison when deciding what needs to be researched.

3) Parents want to have cloned children now.

4) Technology was important before the development of science.

5) Many people consider cloning to be undesirable.

Q.2 Read the passage and answer the following questions:

**Advice for Employees**

Most people suffer no ill-effects from using VDUs (Visual Display Units) as they don’t give out harmful levels of radiation and rarely cause any kind of skin complaint. If you do suffer ill-effects, it may be because of the way you’re using the computer and this can be avoided by well-designed workstations. When working at a VDU, make sure you keep a good posture and that your eyes are level with the screen.

Under health and safety regulations your employer should look at VDU workstations, and reduce any risks by supplying any equipment considered necessary (e.g. a wrist rest). They should also provide health and safety training. This also applies if you’re working at home as an employee and using a VDU for a long period of time. There is no legal limit to how long you should work at a VDU, but under health and safety regulations you have the right to breaks from work using a VDU. This doesn’t have to be a rest break, just a different type of work. Guidance from the Health and Safety Executive (HSE) suggests it’s better to take frequent short breaks but if your job means spending long periods at a VDU, for example as in the case of data input, then longer breaks from your workstation should be introduced.

If you’re disabled, your employer’s duty to make reasonable adjustments for you may mean that they will provide you with special computer equipment.
You can also get advice and maybe help with paying for equipment from the local job centre. Studies haven't shown a link between VDU use and damage to eyesight, but if you feel that using a VDU screen is making your eyes tired, tell your employee safety representative. You have the right to a free eyesight test if you use a VDU a lot during work hours. If you’re prescribed glasses your company must pay for them, provided they’re required in your job.

If you have any health problems you think may be caused by your VDU, contact your line manager. He/she has a duty to consult you on health and safety issues that affect you, and should welcome early reporting of any issue.

Complete the sentences below.

Choose NOT MORE THAN THREE WORDS from the passage for each answer.
Write your answers in boxes 1-5 on your answer sheet.

1) It is unusual to get a __________ as a result of using computers.

2) Employers may be required to provide you with items such as a ________ to use while at work.

3) If your job involves tasks such as __________, the advice from the HSE may not apply.

4) Financial assistance in the case of special requirements may be available from the ______________.

5) The company is obliged to cover the cost of __________ if you need them while working.

Q.3 Writing Task 1:

Write at least 150 words about the following topic:

In some countries young people have little leisure time and are under a lot of pressure to work hard in their studies.

What do you think are the causes of this?

What solutions can you suggest?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

15

Q.4 Writing Task 2:

You are studying a short course in another country. Your accommodation was arranged by the course provider. There is a major problem with the
accommodation.

Write a letter (at least 150 words.) to the course provider. In your letter:

- Say what the problem is.
- Describe the accommodation you thought you were getting.
- Ask the provider to solve the problem.

End Semester Examination, Dec. 2017

ENGLISH FOR ACADEMIC PURPOSES-II (EAP-IIIB)

Q.1 Read the passage and answer the questions that follow:

Do the following statements agree with the information given in the passage?
Write:
TRUE if the statement is true according to the passage.
FALSE if the statement is false according to the passage.
NOT GIVEN if the information is not given in the passage.

a. The club has long-term dormitory accommodation.
b. There’s no accommodation for married members.
c. The club provides subsidized restaurant meals.
d. The club is open to non-members on Tuesday evenings.
e. STA Travel helps finance the Students’ Adviser.
f. The services of the Students’ Adviser are free to all club members.
g. You must make an appointment to see the Students’ Adviser.
h. There will be a surcharge for accommodation over the Christmas period. 1x8

INTERNATIONAL STUDENTS’ HOUSE

International Students House is a unique club and accommodation centre for British and overseas students in London. It is located in the heart of London's West End and is close to all public transport facilities.

ACCOMMODATION

» Comfortable accommodation for up to 450 people in single, twin, 3/4 bedded and multi-bedded rooms
» 44 self-contained flats for married students and families
» Long and short stays welcomed

MEMBERSHIP

Club membership is open to all full-time students, professional trainees, student nurses and au pairs. Membership costs are kept to an absolute minimum to enable the widest possible access. You can join for as little as one month and for up to one year at a time. Membership entitles you to use the various facilities of the House. It has:

• Restaurants
• Student bars and coffee shop
• Study rooms
• Clubs and societies
• Aerobics and fitness training
• Discos, dance, jazz and cinema
• Travel and excursions and much more!

The best way to check out all we have on offer is to drop in any Tuesday evening between 7.15 pm and 8.30 pm for Open House in the Club Room. This is an opportunity for you to meet the staff and other club members, enjoy a free cup of coffee and find out all about what's going on. You can take advantage of special membership offers. (Useful tip: bring along 3 passport size photographs if you wish to take out membership.)

ADVICE SERVICE

Thanks to the support of STA Travel and in association with LCOS (the London Conference on Overseas Students), International Students House now provides the service of an International Students Adviser. This new welfare service is open to all students at London's bona-fide academic institutions. It aims to provide welfare support to help students overcome any personal or practical difficulties they may be experiencing whilst studying in Britain. One of the key features of the Advice Service is that the Adviser can be seen during the evenings until about 8 pm, Monday to Thursday.

CHRISTMAS & NEW YEAR

Unable to get home for Christmas? How about joining in the fun at International Students House! Check out our special programme of activity taking place over the Christmas period. Even come and stay - the House will be offering reduced accommodation rates for students wishing to spend a few days in London over Christmas. We'll also have an exciting New Year's Eve party so come and join us and ring in the new year in the spirit of internationalism.

Q.2 Read the passage and answer the questions that follow it:

Part A

To make political decisions about the extent and type of forestry in a region, it is important to understand the consequences of those decisions. One tool for assessing the impact of forestry on the ecosystem is population viability analysis (PVA). This is a tool for predicting the probability that a species will become extinct in a particular region over a specific period. It has been
successfully used in the United States to provide input into resource exploitation decisions and assist wildlife managers and there is now enormous potential for using population viability to assist wildlife management in Australia’s forests. A species becomes extinct when the last individual dies. This observation is a useful starting point for any discussion of extinction as it highlights the role of luck and chance in the extinction process. To make a prediction about extinction we need to understand the processes that can contribute to it and these fall into four broad categories which are discussed below.

**Part B**

A) Early attempts to predict population viability were based on demographic uncertainty whether an individual survives from one year to the next will largely be a matter of chance. Some pairs may produce several young in a single year while others may produce none in that same year. Small populations will fluctuate enormously because of the random nature of birth and death and these chance fluctuations can cause species extinctions even if, on average, the population size should increase. Taking only this uncertainty of ability to reproduce into account, extinction is unlikely if the number of individuals in a population is above about 50 and the population is growing.

B) Small populations cannot avoid a certain amount of inbreeding. This is particularly true if there is a very small number of one sex. For example, if there are only 20 individuals of a species and only one is a male, all future individuals in the species must be descended from that one male. For most animal species such individuals are less likely to survive and reproduce. Inbreeding increases the chance of extinction.

C) Variation within a species is the raw material upon which natural selection acts. Without genetic variability, a species lacks the capacity to evolve and cannot adapt to changes in its environment or to new predators and new diseases. The loss of genetic diversity associated with reductions in population size will contribute to the likelihood of extinction.

D) Recent research has shown that other factors need to be considered. Australia’s environment fluctuates enormously from year to year. These fluctuations add yet another degree of uncertainty to the survival of many species. Catastrophes such as fire, flood, drought or epidemic may reduce population sizes to a small fraction of their average level. When allowance is made for these two additional elements of uncertainty the population size necessary to be confident of persistence for a few hundred years may increase to several thousand.

**Part C**

Besides these processes, we need to bear in mind the distribution of a population. A species that occurs in five isolated places each containing 20 individuals will not have the same probability of extinction as a species with a single population of 100 individuals in a single locality. Where logging occurs (that is, the cutting down of forests for timber), forest-dependent creatures in that area will be forced to leave. Ground-dwelling herbivores may return within a decade. However, arboreal marsupials (that is animals which live in trees) may not recover to pre-logging densities for over a century. As more forests are logged, animal population sizes will be reduced further. Regardless of the theory or model that we choose, a reduction in population size decreases the genetic diversity of a population and increases
the probability of extinction because of any or all of the processes listed above. It is therefore, a scientific fact that increasing the area that is loaded in any region will increase the probability that forest-dependent animals will become extinct.

Questions (i) – (iv)

Do the following statements agree with the views of the writer in Part A of Reading Passage? Write

YES if the statement agrees with the writer
NO if the statement contradicts the writer
NOT GIVEN if it is impossible to say what the writer thinks about this

i. Scientists are interested in the effect of forestry on native animals.
ii. PVA has been used in Australia for many years.
iii. A species is said to be extinct when only one individual exists.
iv. Extinction is a naturally occurring phenomenon.

Questions (v) – (viii)

This relates to Part B of the reading passage. In paragraphs A to D, the author describes four processes which may contribute to the extinction of a species. Match the list of processes (a-f) to the paragraphs. There are more processes given below as compared to the number of paragraphs so you will not use all of them.

v. Paragraph A
vi. Paragraph B
vii. Paragraph C
viii. Paragraph D

a. Loss of ability to adapt
b. Natural disasters
c. An imbalance of the sexes
d. Human disasters
e. Evolution
f. The haphazard nature of reproduction

Questions (ix) – (xi)

Based on your reading of Part C, fill in the below with words appearing in the passage. Use NO MORE THAN THREE WORDS for each answer.

While the population of a species may be on the increase, there is always a chance that small isolated groups .......... (ix) .......... Survival of a species depends on a balance between the size of a population and its .......... (x) .......... The likelihood that animals which live in forests will become extinct is increased when .......... (xi) ..........

An alternative heading for the passage could be:
a. The protection of native flora and fauna.
b. Influential factors in assessing survival probability.
c. An economic rationale for the logging of forests.
Q.3 Match the following words with their antonyms:

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. abundant</td>
<td>a. deny</td>
</tr>
<tr>
<td>2. admit</td>
<td>b. cowardly</td>
</tr>
<tr>
<td>3. antonym</td>
<td>c. ajar</td>
</tr>
<tr>
<td>4. artificial</td>
<td>d. discouraged, dreary</td>
</tr>
<tr>
<td>5. attractive</td>
<td>e. limited</td>
</tr>
<tr>
<td>6. brave</td>
<td>f. repulsive</td>
</tr>
<tr>
<td>7. boundless</td>
<td>g. voluntary</td>
</tr>
<tr>
<td>8. cheerful</td>
<td>h. synonym</td>
</tr>
<tr>
<td>9. closed</td>
<td>i. scarce</td>
</tr>
<tr>
<td>10. compulsory</td>
<td>j. natural</td>
</tr>
</tbody>
</table>

Q.4 Writing Task-1

Write about the following topic
“The Central Board of Secondary Education (CBSE) has decided to go back to its once criticized compulsory three language formula. According to this system, which will be levied on students appearing board exams of class X after the year 2020, they will have to study three Indian languages. English can be one of the languages and the other two will be chosen from the list of regional Indian languages. Foreign language will be an alternate subject which can be learnt vocationally but will not be subject to being counted in their final grades”

To what extent do you agree or disagree with this opinion?
Write at least 250 words.

Q.5 Writing Task 2

You are an avid reader and have subscribed to various newspapers and weekly magazines. You have realized that you have always paid proper subscription amount but for the past couple of months, the vendor has been missing out on delivering one or the other magazine repetitively. Write a letter to your newspaper agency, complaining about their improper services.
Write a letter and in the letter
• Describe the situation
• Explain why is it a problem
• Say what action would you take if the issue is not resolved
Write at least 200 words and use proper format for the letter.
Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Answer the following:
   a) A light sensitive device that converts drawing, printed text or other images into digital form is called _________.
   b) Which protocol provides e-mail facility among different hosts:
      i) FTP.
      ii) SMTP.
      iii) TELNET.
      iv) SNMP.
   c) ________ is the time during which a job is processed by the computer.
   d) MICR stands for ________.
   e) Who invented the super computer?
   f) Which of the following operating system is produced by IBM:
      i) OS-2
ii) Windows.
iii) DOS.
iv) UNIX.
g) When was the first e-mail sent:
i) 1963.
ii) 1969.
iii) 1971.
iv) 1974.
h) Combination of two or more networks are called _________.
i) A communication pathway that transfers data from one point to another is called _________.
j) ________ performs modulation and demodulation.  

**PART-A**

Q.2 Write short notes on:
a) Types of ports.
b) System unit and its explanation.
c) Internet technologies.  

Q.3 a) Compare the five generations of computers on the basis of software technology used.  
b) Write a detailed note on internet and its importance.  

Q.4 What are the various input-output devices available? Explain, in detail.  

**PART-B**

Q.5 a) Explain computer virus. What are the various types of threats that can be faced by computer system? 

b) How do header and footer can be inserted in a document? Explain its steps.  

Q.7 Write short notes on the following in Excel:
a) Data Sorting.
b) Pivot Table.
c) Goal Seek.  

Q.7 a) How animations of various types can be applied in power point presentation? Discuss all methods, in detail. 
b) Write the steps for creating a table in MS-Access.

E-COMMERCE (BSCA-002)

Time: 3 hrs  Max Marks: 100
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:

a) What is the percentage of customers who visit a website and actually buy something called:
   i) Affiliate programs  ii) Click-through  iii) Spam  iv) Conversion rate

b) Which is not a function of E-commerce:
   i) Marketing  ii) Advertising  iii) Warehousing  iv) None of these

c) Which of the following describes e-commerce?
   i) Doing business electronically  ii) Doing business
   iii) Sale of goods  iv) All of the above

d) Which of the following is part of the four main types for e-commerce:
   i) B2B  ii) B2C  iii) C2B  iv) All of these

e) Which segment do eBay, Amazon.com belong?
f) Which type of e-commerce focuses on consumers dealing with each other:

g) Which products are people most likely to be comfortable buying on the Internet:
   i) Books  ii) PCs  iii) CDs  iv) All of these.

h) Most individuals are familiar with which form of e-commerce:

i) Which of the following is a useful security mechanism when considering business strategy and IT:
   i) Encryption  ii) Decryption  iii) Firewall  iv) All of these

j) Which of the following is not related to security mechanism:
   i) Encryption  ii) Decryption  iii) E-cash  iv) All of these

2x10

**PART-A**

Q.2  

a) “The flourishing of e-commerce business have changed the Indian shopping pattern.” List five advantages of e-commerce for an individual.  
10

b) Explain the different types of e-commerce.  
10

Q.3  

What are 4 C’s of e-commerce? Explain in detail.  
20

Q.4  

a) What is digital signature and what is its utility?  
10

b) Write a case study on the latest cyber-attack, giving the source of origin, purpose and impact caused by the attack.  
10

**PART-B**

Q.5  

a) What is ERP and its scope?  
10

b) What is Supply Chain Management? What is its utility for an organization?  
10

Q.6  

Discuss the case study of “Amazon” as a successful e-commerce portal.  
20

Q.7  

a) Write five advantages and five disadvantages of ERP.  
10

b) What is electronic marketing?

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory**. Attempt any **TWO** questions from **Unit-I** and **TWO** questions from **Unit-II**. All questions carry equal marks.

**Q.1** Choose the correct option:

a) ______ audio/video refers to the use of the Internet for interactive audio/video applications:
   i) Interactive.  
   ii) Streaming live.  
   iii) Streaming stored.  
   iv) None of the above.

b) According to the Nyquist theorem, we need to sample an analog signal ________ times the highest frequency:
   i) three.  
   ii) two.  
   iii) four.  
   iv) none of the above.

c) ______ is an application protocol that establishes, manages, and terminates a multimedia session:
   i) RIP  
   ii) SIP  
   iii) DIP  
   iv) none of the above.

d) A ________ shows the time a packet was produced relative to the first or previous packet.
   i) timestamp  
   ii) playback buffer  
   iii) sequence number  
   iv) none of the above.

e) The first phase of JPEG is:
   i) DCT transformation  
   ii) quantization.  
   iii) data compression  
   iv) none of the above.

f) ________ encoding is based on the science of psychoacoustics, which is the study of how people perceive sound:
   i) Predictive.  
   ii) Perceptual.  
   iii) both i) and ii)  
   iv) none of the above.

g) ________ is used to compress images:
   i) MPEG  
   ii) JPEG  
   iii) either i) or ii)  
   iv) none of the above.

h) MIDI stands for:
   iii) MP3 Instrument Digital Interface.  

i) Space between lines is called:
   i) Leading.  
   ii) Kerning.  
   iii) Extrude.  
   iv) Expanded  
   v) Font Mapping.

j) Which of these is not likely to be the responsibility of a multimedia project?
   i) Create interfaces.  
   ii) Ensure the visual consistency of the project.  
   iii) Structure content.  
   iv) Create budgets and timelines for the project.  
   v) Select media types for content.  

**UNIT-I**

**Q.2**

a) Define Multimedia. Mention the various applications and need of Multimedia in current IT scenario.  

b) What is a Multimedia project and what are the roles of different team members.  

**Q.3**

a) Which basic Tools and software of multimedia are commonly used?  

b) How is plain text different from formatted text?  

**Q.4**

Write short notes on *any two* of the following:

a) Bitmap graphics vs. Vector graphics.  

b) GIF vs. JPEG.  

c) Graphics image sources.  

d) Graphics on internet.  

**UNIT-II**

**Q.5**

a) Compression of data has made storage comfortable and economic. Elaborate.  

b) Differentiate between lossy and lossless compression with their application in real life situation.
Q. 6 a) How is Huffman coding different from Arithmetic coding? Explain with proper diagrams. 10

b) When and why do we use Differential Encoding in compression? 10

Q. 7 a) Mention the various principles of animation in multimedia. 10

b) Name the different softwares used for 2D animation and 3D animation. 10
Q.1 Write short notes on the following:
   a) Significance of forecasting.
   b) Entrepreneurial Qualities.
   c) Creating value proposition for customer.
   d) Difference between Team and Group.
   e) Sources of finance.  

Q.2 Describe the different forms of business and state the importance of generating new business idea.

Q.3 How do you safeguard your business by undertaking following analysis?
   a) Market Research
   b) Industry and competitor analysis.

Q.4 Explain the process of management. Why control is vital function?

Q.5 What sort of risks any start up faces and what are the methods to assess it?

Q.6 Describe the various sources of finance available for any business enterprise. Which will be most appropriate source of funding for new venture and why?
Q.1 Read the passage and answer the following questions:

Is Science Dangerous?

The idea that scientific knowledge is dangerous is deeply embedded in our culture. Adam and Eve were forbidden to eat from the Tree of Knowledge, and in Milton's Paradise Lost the serpent addresses the tree as the 'Mother of Science'. Indeed the whole of western literature has not been kind to scientists and is filled with images of them meddling with nature with disastrous results. Just consider Shelley's Frankenstein, Goethe's Faust and Huxley's Brave New World. One will search with very little success for a novel in which scientists come out well - the persistent image is that of scientists as a soulless group unconcerned with ethical issues. And where is there a film sympathetic to science?

Part of the problem is the conflation of science and technology. The distinction between science and technology, between knowledge and understanding on the one hand and the application of that knowledge to making something, or using it in some practical way, is fundamental.

Science produces ideas about how the world works, whereas the ideas in technology result in usable objects. Technology is much older than anything one could regard as science and unaided by any science. Technology gave rise to the crafts of early humans, like agriculture and metalworking. It is technology that carries with it ethical issues, from motorcar production to cloning a human.

By contrast, reliable scientific knowledge is value-free and has no moral or ethical value. Science merely tells us how the world is. That we are not at the centre of the universe is neither good nor bad, nor is the possibility that genes can influence our intelligence or our behaviour.

The social obligations that scientists have as distinct from those responsibilities they share with all citizens comes from them having access to specialised knowledge of how the world works, not easily accessible to others. Their obligation is to both make public any social implications of their work and its possible applications and to give some assessment of its reliability.

It is not easy to find examples of scientists as a group behaving immorally or in a dangerous manner, the classic paradigm being the eugenics movement. The scientific assumptions behind this proposal are crucial; the assumption is that most desirable and undesirable human attributes are inherited. Not only was talent perceived of as being inherited, but so too were insanity and any kind of so-called feeblemindedness. They completely failed to give an assessment of the reliability of their ideas. Quite the contrary, and even more blameworthy, their conclusions seem to have been driven by what they saw as the desirable social implications. By contrast, in relation to the building of the atomic bomb, scientists behaved morally and fulfilled their social obligations by informing their governments about the implications of atomic theory. It was an enormous engineering feat to build the bomb but the decision to do this was taken by politicians, not scientists. The moralists have been out in force telling us of the horrors of cloning. Many others, national leaders included, have joined in a chorus of horror.
what horrors? What ethical issues? In all the righteous indignation not a single relevant new ethical issue has been spelled out.

Those who propose to clone a human are medical technologists not scientists. It is not, as the bio-moralists claim, that scientific innovation has outstripped our social and moral codes. Just the opposite is the case. Their obsession with the life of the embryo has deflected our attention away from the real issue, which is how children are raised and nurtured. The ills in our society have nothing to do with assisting or preventing reproduction but are profoundly affected by how children are treated.

So what danger does genetics pose? Gene therapy, introducing genes to cure a genetic disease like cystic fibrosis, carries risks, as do all new medical treatments. There may well be problems with the testing of new treatments, but are these difficulties any different from those related to trying out new drugs for AIDS? Anxieties about creating designer babies are at present premature as it is too risky, and we may have, in the first instance, to accept what has been called procreative autonomy, a couple's right to control their own role in reproduction unless the state has a compelling reason for denying them that control. Should the ethical issues relating to the applications of genetics, for example, lead to stopping research in this field? The individual scientist cannot decide, for science, like genetics, is a collective activity with no single individual controlling the process of discovery. It is ethically unacceptable and impractical to censor any aspect of trying to understand the nature of our world.

Do the following statements agree with the information given in the passage?

In boxes 1-5 on your answer sheet, write

TRUE if the statement is true according to the passage

FALSE if the statement is false according to the passage

NOT GIVEN if the information is not given in the passage

6) The film industry does not make films about science.
7) Scientists do not work in unison when deciding what needs to be researched.
8) Parents want to have cloned children now.
9) Technology was important before the development of science.
10) Many people consider cloning to be undesirable.

Q.2 Read the passage and answer the following questions:
Advice for Employees

Most people suffer no ill-effects from using VDUs (Visual Display Units) as they don't give out harmful levels of radiation and rarely cause any kind of skin complaint. If you do suffer ill-effects, it may be because of the way you’re using the computer and this can be avoided by well-designed workstations. When working at a VDU, make sure you keep a good posture and that your eyes are level with the screen.

Under health and safety regulations your employer should look at VDU workstations, and reduce any risks by supplying any equipment considered necessary (e.g. a wrist rest). They should also provide health and safety training. This also applies if you’re working at home as an employee and using a VDU for a long period of time. There is no legal limit to how long you should work at a VDU, but under health and safety regulations you have the right to breaks from work using a VDU. This doesn’t have to be a rest break, just a different type of work. Guidance from the Health and Safety Executive (HSE) suggests it’s better to take frequent short breaks but if your job means spending long periods at a VDU, for example as in the case of data input, then longer breaks from your workstation should be introduced.

If you’re disabled, your employer's duty to make reasonable adjustments for you may mean that they will provide you with special computer equipment. You can also get advice and maybe help with paying for equipment from the local job centre. Studies haven't shown a link between VDU use and damage to eyesight, but if you feel that using a VDU screen is making your eyes tired, tell your employee safety representative. You have the right to a free eyesight test if you use a VDU a lot during work hours. If you’re prescribed glasses your company must pay for them, provided they’re required in your job.

If you have any health problems you think may be caused by your VDU, contact your line manager. He/she has a duty to consult you on health and safety issues that affect you, and should welcome early reporting of any issue.

Complete the sentences below.

Choose NOT MORE THAN THREE WORDS from the passage for each answer.
Write your answers in boxes 1-5 on your answer sheet.

6) It is unusual to get a ____________ as a result of using computers.

7) Employers may be required to provide you with items such as a ________ to use while at work.

8) If your job involves tasks such as ___________, the advice from the HSE may not apply.

9) Financial assistance in the case of special requirements may be available from the ________________.

10) The company is obliged to cover the cost of ____________ if you need them while working.
Q.3 **Writing Task 1:**

Write at least 150 words about the following topic:

In some countries young people have little leisure time and are under a lot of pressure to work hard in their studies.

What do you think are the causes of this?

What solutions can you suggest?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Q.4 **Writing Task 2:**

You are studying a short course in another country. Your accommodation was arranged by the course provider. There is a major problem with the accommodation.

Write a letter (at least 150 words.) to the course provider. In your letter:

- Say what the problem is.
- Describe the accommodation you thought you were getting.
- Ask the provider to solve the problem.
Q.1 Read the passage and answer the questions that follow:

Do the following statements agree with the information given in the passage?
Write:

TRUE if the statement is true according to the passage.
FALSE if the statement is false according to the passage.
NOT GIVEN if the information is not given in the passage.

i. The club has long-term dormitory accommodation.

j. There’s no accommodation for married members.

k. The club provides subsidized restaurant meals.

l. The club is open to non-members on Tuesday evenings.

m. STA Travel helps finance the Students’ Adviser.

n. The services of the Students’ Adviser are free to all club members.

o. You must make an appointment to see the Students’ Adviser.

p. There will be a surcharge for accommodation over the Christmas period. 1x8

INTERNATIONAL STUDENTS’ HOUSE

International Students House is a unique club and accommodation centre for British and overseas students in London. It is located in the heart of London's West End and is close to all public transport facilities.

ACCOMMODATION
» Comfortable accommodation for up to 450 people in single, twin, 3/4 bedded and multi-bedded rooms

» 44 self-contained flats for married students and families

» Long and short stays welcomed

MEMBERSHIP

Club membership is open to all full-time students, professional trainees, student nurses and au pairs. Membership costs are kept to an absolute minimum to enable the widest possible access. You can join for as little as one month and for up to one year at a time. Membership entitles you to use the various facilities of the House. It has:

• Restaurants
• Student bars and coffee shop
• Study rooms
• Clubs and societies
• Aerobics and fitness training
• Discos, dance, jazz and cinema
• Travel and excursions and much more!

The best way to check out all we have on offer is to drop in any Tuesday evening between 7.15 pm and 8.30 pm for Open House in the Club Room. This is an opportunity for you to meet the staff and other club members, enjoy a free cup of coffee and find out all about what's going on. You can take advantage of special membership offers. (Useful tip: bring along 3 passport size photographs if you wish to take out membership.)

ADVICE SERVICE

Thanks to the support of STA Travel and in association with LCOS (the London Conference on Overseas Students), International Students House now provides the service of an International Students Adviser. This new welfare service is open to all students at London's bona-fide academic institutions. It aims to provide welfare support to help students overcome any personal or practical difficulties they may be experiencing whilst studying in Britain. One
of the key features of the Advice Service is that the Adviser can be seen during the evenings until about 8 pm, Monday to Thursday.

CHRISTMAS & NEW YEAR

Unable to get home for Christmas? How about joining in the fun at International Students House! Check out our special programme of activity taking place over the Christmas period. Even come and stay - the House will be offering reduced accommodation rates for students wishing to spend a few days in London over Christmas. We'll also have an exciting New Year's Eve party so come and join us and ring in the new year in the spirit of internationalism.

Q.2  Read the passage and answer the questions that follow it:

Part A

To make political decisions about the extent and type of forestry in a region, it is important to understand the consequences of those decisions. One tool for assessing the impact of forestry on the ecosystem is population viability analysis (PVA). This is a tool for predicting the probability that a species will become extinct in a particular region over a specific period. It has been successfully used in the United States to provide input into resource exploitation decisions and assist wildlife managers and there is now enormous potential for using population viability to assist wildlife management in Australia’s forests. A species becomes extinct when the last individual dies. This observation is a useful starting point for any discussion of extinction as it highlights the role of luck and chance in the extinction process. To make a prediction about extinction we need to understand the processes that can contribute to it and these fall into four broad categories which are discussed below.

Part B

A) Early attempts to predict population viability were based on demographic uncertainty whether an individual survives from one year to the next will largely be a matter of chance. Some pairs may produce several young in a single year while others may produce none in that same year. Small populations will fluctuate enormously because of the random nature of birth and death and these chance fluctuations can cause species extinctions even if, on average, the population size should increase. Taking only this uncertainty of ability to reproduce into account, extinction is unlikely if the number of individuals in a population is above about 50 and the population is growing.

B) Small populations cannot avoid a certain amount of inbreeding. This is particularly true if there is a very small number of one sex. For example, if there are only 20 individuals of a species and only one is a male, all future individuals in the species must be descended from that one male. For most animal species such individuals are less likely to survive and reproduce. Inbreeding increases the chance of extinction.

C) Variation within a species is the raw material upon which natural selection acts. Without genetic variability, a species lacks the capacity to evolve and cannot adapt to changes in its environment or to new predators and new diseases. The loss of genetic diversity associated with reductions in population size will contribute to the likelihood of extinction.
D) Recent research has shown that other factors need to be considered. Australia’s environment fluctuates enormously from year to year. These fluctuations add yet another degree of uncertainty to the survival of many species. Catastrophes such as fire, flood, drought or epidemic may reduce population sizes to a small fraction of their average level. When allowance is made for these two additional elements of uncertainty the population size necessary to be confident of persistence for a few hundred years may increase to several thousand.

**Part C**

Besides these processes, we need to bear in mind the distribution of a population. A species that occurs in five isolated places each containing 20 individuals will not have the same probability of extinction as a species with a single population of 100 individuals in a single locality. Where logging occurs (that is, the cutting down of forests for timber), forest-dependent creatures in that area will be forced to leave. Ground-dwelling herbivores may return within a decade. However, arboreal marsupials (that is animals which live in trees) may not recover to pre-logging densities for over a century. As more forests are logged, animal population sizes will be reduced further. Regardless of the theory or model that we choose, a reduction in population size decreases the genetic diversity of a population and increases the probability of extinction because of any or all of the processes listed above. It is therefore, a scientific fact that increasing the area that is loaded in any region will increase the probability that forest-dependent animals will become extinct.

**Questions (i) – (iv)**

Do the following statements agree with the views of the writer in Part A of Reading Passage? Write

**YES** if the statement agrees with the writer
**NO** if the statement contradicts the writer
**NOT GIVEN** if it is impossible to say what the writer thinks about this

ix. Scientists are interested in the effect of forestry on native animals.

x. PVA has been used in Australia for many years.

xi. A species is said to be extinct when only one individual exists.

xii. Extinction is a naturally occurring phenomenon.

**Questions (v) – (viii)**

This relates to Part B of the reading passage. In paragraphs A to D, the author describes four processes which may contribute to the extinction of a species. Match the list of processes (a-f) to the paragraphs. There are more processes given below as compared to the number of paragraphs so you will not use all of them.

| xiii. | Paragraph |  | g. Loss of ability to adapt |
|      | A         |  | h. Natural disasters |

Questions (ix) – (xi)

Based on your reading of Part C, fill in the below with words appearing in the passage. Use **NO MORE THAN THREE WORDS** for each answer.

While the population of a species may be on the increase, there is always a chance that small isolated groups .......... **(ix) ..........** Survival of a species depends on a balance between the size of a population and its .......... **(x) ..........** The likelihood that animals which live in forests will become extinct is increased when .......... **(xi) ..........**

1x3

**Question (xii)**

An alternative heading for the passage could be:

d. The protection of native flora and fauna.

e. Influential factors in assessing survival probability.

f. An economic rationale for the logging of forests.

d. Preventive measures for the extinction of a species. 1x1

Q.3 Match the following words with their antonyms:

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>11. abundant</td>
<td>k. deny</td>
</tr>
<tr>
<td>12. admit</td>

</tr>
<tr>
<td>13. antonym</td>
<td>m. ajar</td>
</tr>
<tr>
<td>14. artificial</td>
<td>n. discouraged, dreary</td>
</tr>
<tr>
<td>15. attractive</td>
<td>o. limited</td>
</tr>
<tr>
<td>16. brave</td>
<td>p. repulsive</td>
</tr>
<tr>
<td>17. boundless</td>
<td>q. voluntary</td>
</tr>
<tr>
<td>18. cheerful</td>
<td>r. synonym</td>
</tr>
<tr>
<td>19. closed</td>
<td>s. scarce</td>
</tr>
<tr>
<td>20. compulsory</td>
<td>t. natural</td>
</tr>
</tbody>
</table>

10

Q.4 **Writing Task-1**

Write about the following topic

“The Central Board of Secondary Education (CBSE) has decided to go back to its once criticized compulsory three language formula. According to this system, which will be levied on students appearing board exams of class X after the year 2020, they will have to study three Indian languages. English can be one of the languages and the other two will be chosen from the list of regional Indian languages. Foreign language will be an alternate subject which can be learnt vocationally but will not be subject to being counted in their final grades”

To what extent do you agree or disagree with this opinion?

Write at least 250 words. 10
Q.5  **Writing Task 2**

You are an avid reader and have subscribed to various newspapers and weekly magazines. You have realized that you have always paid proper subscription amount but for the past couple of months, the vendor has been missing out on delivering one or the other magazine repetitively. Write a letter to your newspaper agency, complaining about their improper services. Write a letter and in the letter

- Describe the situation
- Explain why is it a problem
- Say what action would you take if the issue is not resolved

Write at least 200 words and use proper format for the letter.
End Semester Examination, Dec. 2017
B. Sc. (Information Technology) — First Semester
INFORMATION TECHNOLOGY SYSTEM (7.101)

Time: 3 hrs. Max Marks: 75
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO
questions from PART-A and TWO questions from PART-B. Each question
carries equal marks.

Q.1 Answer the following:
a) A light sensitive device that converts drawing, printed text or other
images into digital form is called _________.
b) Which protocol provides e-mail facility among different hosts:
   i) FTP.
   ii) SMTP.
   iii) TELNET.
   iv) SNMP.
c) ________ is the time during which a job is processed by the computer.
d) MICR stands for _________.
e) Who invented the super computer?
f) Which of the following operating system is produced by IBM:
   i) OS-2
   ii) Windows.
   iii) DOS.
   iv) UNIX.
g) When was the first e-mail sent:
   i) 1963.
   ii) 1969.
   iii) 1971.
   iv) 1974.
h) Combination of two or more networks are called _________.
i) A communication pathway that transfers data from one point to another is
called _________.
j) ________ performs modulation and demodulation. 1½×10

PART-A

Q.2 Write short notes on:
a) Types of ports.
b) System unit and its explanation.
c) Internet technologies. 5×3

Q.3 a) Compare the five generations of computers on the basis of software
technology used. 8
b) Write a detailed note on internet and its importance. 7

Q.4 What are the various input-output devices available? Explain, in detail. 15

PART-B

Q.5 a) Explain computer virus. What are the various types of threats that can be
faced by computer system? 10

b) How do header and footer can be inserted in a document? Explain its steps. 5
Q.7 Write short notes on the following in Excel:
   a) Data Sorting.
   b) Pivot Table.
   c) Goal Seek.

Q.7 a) How animations of various types can be applied in power point presentation? Discuss all methods, in detail.
   b) Write the steps for creating a table in MS-Access.
Q.1 Choose the correct option:
   a) Which of the following statements are true with respect to "Communication"?
      i) It forms the foundation for planning.
      ii) Controlling is not possible without written and oral communication.
      iii) Both i) and ii).
      iv) None of the above.

   b) In formal letters to have a desired effect on the reader, it should be:
      i) Free of any grammatical or spelling errors.
      ii) Polite, even if you are complaining.
      iii) Short and to the point.
      iv) All of the above.

   c) The goal of a negotiation process should always be:
      i) We should be able to judge and use the vulnerability of the other party.
      ii) We should be able to sell the products at our specified price.
      iii) A win-win situation wherein both the parties are satisfied.
      iv) There may/may not be any future business relationship.

   d) Disruptive behavior in a team means:
      i) Being overly aggressive.
      ii) Withdrawing and refusing to co-operate.
      iii) Raising irrelevant matters.
      iv) All of the above.

   e) The non-verbal communication displayed by attitude towards time, through punctuality and late arrival is called:
      i) Haptics.
      ii) Chronemics.
      iii) Vocalics.
      iv) Proxemics.

   f) State whether the following statements are TRUE or FALSE:
      i) Only 7% of what we communicate is through body language.
      ii) The entering of sound waves into our ears and striking the eardrums is called hearing.
      iii) The tone of our voice conveys our mood, interest, anger etc. to the audience.
      iv) An agenda has to be circulated in advance for meetings.
      v) While listening to a song, we do the "Empathetic" type of listening.

   \[1\times5\]

**PART-A**

Q.2 What is communication? Explain the communication process in detail. Also discuss the various barriers to communication. \[10\]

Q.3 "Making an effective presentation is an art which can be mastered with some preparation." Explain in detail. \[10\]

Q.4 a) What are listening skills? How is listening different from hearing?
b) Explain the various types of listening with examples.

PART-B

Q.5 What is non-verbal communication? Illustrate with suitable examples. Explain the various components of non-verbal communication in detail.

Q.6 a) Why does formal letter writing still hold its relevance in the age of telecommunication? Explain the steps in the formal letter writing process in detail.

b) Suppose you are V. Sharma. Write a cover letter to Mr. Gaurav Gupta, Manager HR of ABC Ltd., submitting your candidature for an opening in his organization, about which an advertisement was published in a newspaper.

Q.7 Discuss the ‘advantages and disadvantages of internet usage for the youth’ in 200 words.
Q.1  a) What is logical error?
    b) What is a constant?
    c) Why do we use “main method” in a C# program?
    d) Write the syntax of do-while loop.
    e) What is concatenation of two strings?
    f) What is type conversion?
    g) What is a keyword? Give an example.
    h) What is arithmetic operator? Give an example.
    i) How to initialize a 1-D, 2-D array?
    j) Why to use try catch statements in C#?

Q.2  Write a pseudo code for finding largest number among 3 numbers. Also draw a flow chart for same.

Q.3  Describe toolbox window, server explorer window, property window, design window, source code window with examples.

Q.4  How many types of built-in functions exist in C#? Explain data types with an example of each type of data.

Q.5  Write a program to find the factorial of a number.

Q.6  How do we create an array? Write a program to implement an array in C#.

Q.7  Write short notes on the following:
    a) Error handling techniques.
    b) While and do while.
Q.1 Answer the following:
   a) BCNF stands for ____________.
   b) Define ‘metadata’.
   c) In DDL, we modify the _________ of the table.
   d) Difference between data and information.
   e) The symbols used in ER diagrams are ___________.
   f) Give two Codd’s rules.

PART-A

Q.2 a) Explain the advantages and disadvantages of database system over file system.  
   b) Explain the following terms:
      i) Data dictionary.
      ii) Two responsibilities of Database Administrator.

Q.3 a) What do you mean by Data Independence?
   b) Explain the database architecture in detail.

Q.4 a) What is Normalization? What is the need of normalization?
   b) Explain the Second Normal Form (2NF) in detail with the help of an example.

PART-B

Q.5 a) Explain three DML (Data Manipulation Language) statements with proper syntax and examples.
   b) Explain the purpose of primary key with the help of an example.

Q.6 Write short notes on the following:
   a) View.
   b) Outer join.
   c) Referential Integrity Constraint.

Q.7 Give some applications of Business Intelligent Tools in the field of healthcare and education.
Q.1 Fill in the blanks:
   a) Schema is defined as _______. 
   b) 2NF states that _______. 
   c) DDL stands for _______. 
   d) Three clauses used in SQL are _______, _______ and _______. 
   e) Three types of joins available in SQL are ______, ______ and _______. 

**PART-A**

Q.2 Explain the responsibilities of database administrator. 

Q.3 Write short notes on the following:
   a) Data models. 
   b) ER diagram. 

Q.4 Explain the 3NF (Third Normal Form) in detail. 

**PART-B**

Q.5 Explain two DDL (Data Definition Language) commands with proper syntax and examples. 

Q.6 Write short notes on the following:
   a) Constraints in SQL. 
   b) Keys in SQL. 

Q.7 What are Business Intelligent Tools? Give some of their applications in various business sectors.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – Second Semester
COMPUTER NETWORKS-I (7.105)

Time: 3 hrs.                  Max Marks: 50
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Fill in the blanks:
   a) The ______ layer changes bit into electro-magnetic signals.
   b) ______ is the unreliable protocol.
   c) ______ layer lies between the network layer and the session layer.
   d) A cable break in ______ topology stops all transmissions.
   e) ______ are the rules that govern a communication exchange. 2×5

PART-A

Q.2 Discuss the various components of data communication and explain the advantages of a multipoint connection over a point to point connection. 10

Q.3 Explain the difference between service point address, logical address and physical address in the context of OSI reference model. Also, explain the responsibilities of session layer and physical layer. 10

Q.4 What is ATM? Explain its layered architecture and frame format in detail. 10

PART-B

Q.5 What do you understand by cryptography? Explain different types of cryptography by stating suitable examples. 10

Q.6 Write short notes on:
   a) TCP three way hand shake.
   b) Domain Name System. 10

Q.7 What do you understand by UDP? Explain the characteristics of UDP with its frame format. 10
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – First Semester
BUSINESS ENVIRONMENT (7.106)

Time: 3 hrs.  Max Marks: 50
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Factors that create opportunities and threats to business units is known as __________ environment.
   b) Study of human population is called as __________.
   c) Indian is an example of ___________ economy.
   d) __________ is main motive of business enterprise.

2½x4

PART-A

Q.2 What is business? Explain characteristics and objectives of business. 10

Q.3 What is environment scanning? Explain need and importance of environment scanning. 10

Q.4 What is internal environment? Explain various components of internal environment. 10

PART-B

Q.5 What is external environment? Write short notes on any two components of external environment. 10

Q.6 Compare and contrast various features of capitalist, socialist and mixed economy with their implications. 10

Q.7 Write short notes on:
   a) Government Rules.
   b) GST Analysis. 10
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – First Semester
MATHEMATICS FOR COMPUTING (7.107)

Time: 3 hrs.  
Max Marks: 50
No. of pages: 2

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt any **TWO** questions from **Part-A** and **TWO** questions from **Part-B.** Each question carries equal marks.

Q.1  
a) Define central tendency in statistics.
b) What do you mean by independent events in probability?
c) What do you mean by Domain of a function?
d) If 
\[
A = \begin{bmatrix} 2 & 3 \\ 91 & -100 \end{bmatrix}
\]
Find \(|A|\)
e) Define degree of a linear equation.

2×5

PART-A

Q.2  
If \(U = \{1, 3, 5, 6, 8, 10, 13, 15, 20\}\)
\(A = \{1, 5, 8\}\), \(B = \{10, 15, 20\}\)
\(C = \{5, 8, 6, 20\}\)
\(D = \{13, 20, 8, 6\}\)
Find the following:
a) \((C \cap D) \cup D\)
b) \((A \cup B) - (B \cap A)\)
c) \((A' \cup D') \cap (B' \cap C')\)
d) \((B - A) \cup (C - D) \cap (A - C)\)
e) \((A' \cap B') \cap (C' \cup D')\)

2×5

Q.3  
a) Find the Domain and Range of the given function.
\[y = 3x + 5\]
b) If \(f, g : R \rightarrow R\) are defined respectively by:
\[f(x) = 3x^2 + 2x + 2\]
\[g(x) = 3x + 2\]
Find
i) \( fof^2 \)
ii) \( fof \)

\[ \begin{bmatrix}
1 & 2 & -1 \\
-1 & 1 & 2 \\
2 & -1 & 1
\end{bmatrix} \]

Q.4 Find \( A^{-1} \) where

\[ A = \begin{bmatrix}
1 & 2 & -1 \\
-1 & 1 & 2 \\
2 & -1 & 1
\end{bmatrix} \]

**PART-B**

Q.5 a) Find standard deviation for the following data:

<table>
<thead>
<tr>
<th>Class Interval</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 10</td>
<td>5</td>
</tr>
<tr>
<td>10 - 20</td>
<td>15</td>
</tr>
<tr>
<td>20 - 30</td>
<td>25</td>
</tr>
<tr>
<td>30 - 40</td>
<td>35</td>
</tr>
<tr>
<td>40 - 50</td>
<td>45</td>
</tr>
</tbody>
</table>

b) Write formula of arithmetic mean for a grouped data.

Q.6 A bag contains 7 red, 12 white and 4 green balls. What is the probability that
a) 3 balls drawn are all white.
b) 3 balls drawn are one of each colour.

Q.7 a) Simplify:
\[
\frac{3^3 \times 27^3 \times 9^4}{3 \times (81)^4}
\]
b) Solve:
\[ x^2 - 7x + 10 \]
End Semester Examination, Dec. 2017

SYSTEM ANALYSIS AND DESIGN (7.201)

Time: 3 hrs.  
Max Marks: 40  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Write short notes on (ANY TWO):
   a) UML.
   b) Prototype.
   c) SRS.
   d) BlackBox testing.  

   PART-A  

Q.2 Write short notes on the following:
   a) Technical feasibility.
   b) Testing.  

Q.3 What do you understand by requirement gathering? What are the different methods of requirement gathering?  

Q.4 What is SSAD? What are the advantages and disadvantages of SSAD?  

   PART-B  

Q.5 Write short notes on the following:
   a) Structured chart.
   b) Control design.  

Q.6 What is OOAD? How is it different from traditional system analysis and design?  

Q.7 Write short notes on:
   a) User interface.
   b) User experience.  

   4×2
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – Second Semester
SYSTEM TESTING (7.202)

Time: 3 hrs.  
Max Marks: 40  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Fill in the blanks:
   a) Software mistakes during coding is known as ________.
   b) For a function of an variables, robust-testing yields ________ test cases.
   c) Mutation testing is one form of ________ testing.
   d) Test suite is a ________.

Answer the following questions:
   e) What is Beta test?
   f) What is validation?
   g) How many levels are there in CMM model? Name them.
   h) Describe any four attributes of software quality.

1×8

PART-A

Q.2 What is testing? Explain software testing life cycle process, with the help of a suitable diagram.

Q.3 Consider a program to find the roots of quadratic equation with three input integers [a, b, c] that ranges from [0, 100]. Design a set of boundary value analysis test cases with one of the following messages:
   a) Not a quadratic equation.
   b) Roots are real and equal.
   c) Roots are real and unequal.
   d) Roots are imaginary.

2×4

Q.4 What is white Box Testing? Explain any one method of this testing with suitable testing example.

8

PART-B

Q.5 What is software quality attributes? Explain McCall model of software quality.

8

Q.6 Explain process metrics and product metrics? Explain ISO standards for software development process.

8
Q.7 Explain the following terms:
   a) Quality Assurance.
   b) Test Execution.
   c) Test Environment.
   d) Test Team Organization.

End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Third Semester
COMPUTER ALGORITHMS AND DISCRETE MATHEMATICS (7.203)

Time: 3 hrs.  
Max Marks: 60

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1  a) Fill in the blanks:
   i) Data structures are classified as ______ and data structure.
   ii) A ______ data structure is an ordered list with insertion and deletion done at one end of the list known as top of stack.
   iii) ______ and ______ are nonlinear data structure.
   iv) Left, root, right traversal known as ______ traversal.

b) Define the following:
   i) Tree data structure.
   ii) Stack.
   iii) Hamiltonian path.
   iv) Self loop in graph.

PART-A

Q.2  a) Explain the classification of data structure.
   b) Write a short note on quick sort with algorithm.

Q.3  a) Trace heap sort on the list:
     \[ L = \{11, 34, 67, 10, 5\} \]

b) Let \( A = \{2, 3, 4\} \) and \( B = \{a, b, c\} \) and \( f = \{(2, a), (3, b), (4, c)\} \). Find domain, co-
     domain and range of the function.

Q.4  a) Consider the function \( f, g : R \rightarrow R \) defined by \( f(x) = x^2 + 3x + 1 \), \( g(x) = 2x - 3 \).
     Find the composition functions:
     i) \( fof \).
     ii) \( gof \).

b) Let \( A = \{7, 8, 9\} \) and \( B = \{k, l, m, n\} \) and \( R \) is the relation from A to B:
     \( R = \{(7, k), (8, k), (8, l), (8, m), (9, m), (9, n)\} \), find \( R^{-1}, \overline{R}, DOM(R), RAN(R) \).

PART-B

Q.5  a) Create the binary tree using inorder and preorder traversal:
b) What is spanning tree and when it is called a minimum spanning tree? Write Kruskal algorithm for minimum spanning tree.  

Q.6  
a) Define the following:  
   i) Forest.  
   ii) Binary tree.  
   iii) Degree of a vertex.  

b) A bag contains 8 blue and 4 red balls. Two balls are drawn at random with replacement. Find the probability of getting one blue and one red ball.  

Q.7  
a) Solve the difference equation: 
\[ a_r - 4a_{r-1} + 4a_{r-2} = 0 \]  
and find the particular solution given that \( a_0 = 1 \) and \( a_1 = 6 \).  
b) Define cryptography with an example.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) - Third Semester
COMPUTER ALGORITHM AND DISCRETE MATHEMATICS (7.203)

Time: 3 hrs. 
Max Marks: 40
No. of pages: 2

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Give names of linear data structure.
   b) Define algorithm.
   c) Define stack.
   d) Define forest.
   e) Define tree.
   f) What is the difference between linear and binary search?
   g) What is the complexity of quick sort?
   h) If \( A = \{2, 4, 6, 8, 10\} \); \( B = \{1, 3, 5, 7, 9\} \) find \( A \cup B \).

PART-A

Q.2 a) Differentiate between linear and non-linear data structure. 4
   b) What is an array? Which operation can be performed on array? Explain with example. 4

Q.3 What is stack? Explain push and pop algorithm, with example. 8

Q.4 Trace a heap sort on the list below:
   10, 50, 20, 30, 25, 90. 8

PART-B

Q.5 Create binary tree, using in order and preorder traversal.
   In order : D B H E A I F J C G
   Pre order : A B D E H C F I J G

Q.6 Find minimum spanning tree, using Kruskal’s algorithm of the following graph.
Q.7  a) Solve the difference equation $a_r - 4a_{r-1} + 4a_{r-2} = 0$ and find the particular solution given that $a_0 = 1$ and $a_1 = 6$.

b) For the tree shown below:
   i) Which node is the root?
   ii) Which nodes are leaves?
   iii) Name the parent of each node.
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) – Third Semester  
OBJECT ORIENTED PROGRAMMING (7.205)

Time: 3 hrs.  
Max Marks: 50  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Which of the following is not a member of class?
      i) Static function  
      ii) Member function  
      iii) Friend function  
      iv) Virtual function
   b) Which symbol is used for destructor?
      i) ~  
      ii) #  
      iii) -  
      iv) +
   c) Which of the following approach is adopted by C++?
      i) Top down  
      ii) Bottom up  
      iii) Right left  
      iv) Left right
   d) A constructor has the same ______ as that of class.
      i) Valuable  
      ii) Object  
      iii) Function  
      iv) Name
   e) Two methods with the same name and same parameter.
      i) Abstraction  
      ii) Overloading  
      iii) Multiplexing  
      iv) Duplexing

   2×5

PART-A

Q.2 a) Is object oriented programming better than procedural oriented programming? Justify your answer.  
   b) Create a class of employees to store their information:
      Data member:
      Employee ID, employee name, employee salary, employee experience.
      Member function:
      i) To get the employee data.
         ii) If the employee experience is greater than 5 years, a hike of Rs. 1000 will be given in salary.
         iii) Display the employee data.

   5

Q.3 How constructor is called in objected oriented programming? Write a program to show the use of parameterized constructor.

   10

Q.4 a) What is static member function? Give an example.  
   b) Write a program to show the concept of function overloading.

   5

PART-B

Q.5 What is the relationship between base class and derived class? Write a program to show the concept of multiple inheritance.

   10
Q.6 What is polymorphism? Write a program to show the concept of polymorphism.

Q.7 How exception handling is implemented in C++? Write a suitable program to demonstrate the concept of exception handling.

End Semester Examination, Dec. 2017
B.Sc. (Information Technology) – Third Semester
OBJECT ORIENTED PROGRAMMING (7.205) CBCS

Time: 3 hrs.
Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Which of the following is not a type of constructor?
      i) Copy constructor
      ii) Friend constructor
      iii) Default constructor
      iv) Parameterized constructor
   b) How many instances of an abstract class can be created:
      i) 1
      ii) 0
      iii) 5
      iv) 13
   c) Destructor is a member function whose name is same as the class name but is preceded by a:
      i) tilde
      ii) hash
      iii) dot
      iv) dollar
   d) What is the default modifier for the class member:
      i) Private
      ii) Public
      iii) Internal
      iv) Protected
   e) ________ is the process by which object of one class acquires the properties of objects of another class:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulator
   f) The wrapping of data and functions into a single unit is known as:
      i) Abstraction
      ii) Inheritance
      iii) Polymorphism
      iv) Encapsulation

PART-A

Q.2 a) What are the basic features of object oriented approach? Explain with the help of suitable example.
   b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students.

Q.3 a) What is function overloading? Explain it with the help of suitable program.
   b) Write a program in C++ to swap two number, using pass by value concept.

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example.
PART-B

Q.5  a) Write a program to show the concept of multilevel inheritance.  
     b) What is the need of inheritance? Explain the various types of inheritance.

Q.6  a) What is operator overloading? Write a program to show the unary 
     operator overloading. 
     b) What is polymorphism? Differentiate between compile time and run time 
     polymorphism.

Q.7  a) What is exception handling? Write a program to handle the divide by zero 
     error with exception handling. 
     b) What is array out of bound exception? Explain.
Q.1_answer the following:

a) Which of the following is not a type of constructor?
   i) Copy constructor
   ii) Friend constructor
   iii) Default constructor
   iv) Parameterized constructor

b) How many instances of an abstract class can be created:
   i) 1
   ii) 0
   iii) 5
   iv) 13

c) Destructor is a member function whose name is same as the class name but is preceded by a:
   i) tilde
   ii) hash
   iii) dot
   iv) dollar

d) What is the default modifier for the class member:
   i) Private
   ii) Public
   iii) Internal
   iv) Protected

e) ______ is the process by which object of one class acquires the properties of objects of another class:
   i) Abstraction
   ii) Inheritance
   iii) Polymorphism
   iv) Encapsulator

f) The wrapping of data and functions into a single unit is known as:
   i) Abstraction
   ii) Inheritance
   iii) Polymorphism
   iv) Encapsulation

PART-A

Q.2_a) What are the basic features of object oriented approach? Explain with the help of suitable example.
   b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students.

Q.3_a) What is function overloading? Explain it with the help of suitable program.
   b) Write a program in C++ to swap two number, using pass by value concept.

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example.
Q.5  a) Write a program to show the concept of multilevel inheritance.  
      b) What is the need of inheritance? Explain the various types of inheritance.  

Q.6  a) What is operator overloading? Write a program to show the unary 
      operator overloading.  
      b) What is polymorphism? Differentiate between compile time and run time 
      polymorphism.  

Q.7  a) What is exception handling? Write a program to handle the divide by zero 
      error with exception handling.  
      b) What is array out of bound exception? Explain.
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) – Third Semester  
OBJECT ORIENTED PROGRAMMING (7.205)

Time: 3 hrs.  
Max Marks: 75  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Answer the following:  
a) Which of the following is not a type of constructor?  
i) Copy constructor  
ii) Friend constructor  
iii) Default constructor  
iv) Parameterized constructor  
b) How many instances of an abstract class can be created:  
i) 1  
ii) 0  
iii) 5  
iv) 13  
c) Destructor is a member function whose name is same as the class name but is preceded by a:  
i) tilde  
ii) hash  
iii) dot  
iv) dollar  
d) What is the default modifier for the class member:  
i) Private  
ii) Public  
iii) Internal  
iv) Protected  
e) _______ is the process by which object of one class acquires the properties of objects of another class:  
i) Abstraction  
ii) Inheritance  
iii) Polymorphism  
v) Encapsulator  
f) The wrapping of data and functions into a single unit is known as:  
i) Abstraction  
ii) Inheritance  
iii) Polymorphism  
v) Encapsulation

PART-A

Q.2 a) What are the basic features of object oriented approach? Explain with the help of suitable example.  
10  
b) Create a class of student having data member: roll no, student name and address, member function: Get data and display data. Write a program to input and display the details of 5 students.  
5

Q.3 a) What is function overloading? Explain it with the help of suitable program.  
8  
b) Write a program in C++ to swap two number, using pass by value concept.  
7

Q.4 What is the foundation of object model? What are the elements of object model? Explain with the help of example.  
15

PART-B

Q.5 a) Write a program to show the concept of multilevel inheritance.  
8
b) What is the need of inheritance? Explain the various types of inheritance.

Q.6  a) What is operator overloading? Write a program to show the unary operator overloading.
     b) What is polymorphism? Differentiate between compile time and run time polymorphism.

Q.7  a) What is exception handling? Write a program to handle the divide by zero error with exception handling.
     b) What is array out of bound exception? Explain.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Fourth Semester
DESKTOP APPLICATION DEVELOPMENT (7.206)

Time: 3 hrs.  
Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Explain the following:
   a) DML.
   b) SQL.
   c) IDE.  
   3×5

PART-A

Q.2 Explain Data Designs Tools used in VB .net for connecting to database.  
15

Q.3 Design a registration form for a student database in VB .net, taking following user controls in system:
   a) User-‘d
   b) User-name.
   c) User type.
   d) Dept.
   e) Course.
   The data entered by user in form should be stored in database using ADO .net connectivity and explain how the data would be stored in SQL server?  
15

Q.4 Make a calculator in VB.net showing has VCA calculation:
   a) Subtraction.
   b) Multiplication.
   c) Addition.
   d) Division.  
   15

PART-B

Q.5 What is dataset in data configuration wizard? How to import database in windows form? Explain in detail.  
15

Q.6 How many different types of perfects used in VB.NET? Explain at least three projects in detail.  
15

Q.7 How to add classes in your VB .Net project? Add a class in user registration form in VB. Net.  
15
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Fourth Semester
DESKTOP APPLICATION DEVELOPMENT (7.206)

Time: 3 hrs.  
Max Marks: 50
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Explain the following:
a) Data grid.
b) Data set.
c) Fill ( ).
d) Encapsulation.
e) List box control.

PART-A

Q.2 What are the different advantages of VB .Net over traditional visual basic? Discuss the features in context to windows programing.  

Q.3 How .Net platform is more industry friendly in comparison to other programing approaches? Explain with the help of a suitable real life example.

Q.4 What are the different database components in context to ADO .Net? Explain its all components in detail.

PART-B

Q.5 Differentiate between the following:
a) Label and textbox. 
b) Check box and radio button.

Q.6 Explain all the features of object oriented programing in detail. How OOPS concept helps in building strong and secure programs?

Q.7 Explain the following: 
a) Data access layer. 
b) DDL, DML in SQL.
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Fourth Semester
INFORMATION SYSTEM SECURITY (7.209)

Time: 3 hrs.  
Max Marks: 40
No. of pages: 1

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory.** Attempt **ANY TWO** questions from **PART-A** and **TWO** questions from **PART-B.** Each question carries equal marks.

Q.1 Write short notes on the following:
   a) Malware v/s viruses.
   b) Role of proxy server in information security.
   c) Firewall.
   d) Honey pots and Honey nets.  

**PART-A**

Q.2 How information security can be performed in an organization? Explain its functions of it in detail.  

Q.3 Explain the security SDLC in detail with the help of diagrams and examples.  

Q.4 What are the international laws for information security?  

**PART-B**

Q.5 How do you classify information security across an organization? What are ASSET risk?  

Q.6 a) Explain the digital forensic methodology in detail.  
   b) Differentiate between authorization and authentication with the help of an example.  

Q.7 Write short notes on:
   a) Bull’s Eye model for information security.  
   b) Information security policy, its standards and practices.  
End Semester Examination, Dec. 2017
B.Sc. (Information Technology) — Third Semester
DATABASE ENGINEERING-II (7.214)

Time: 3 hrs.  
Max Marks: 40  
No. of pages: 1  

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Answer the following:
   a) Advantages of DBMS.
   b) Explain the various types of attributes.
   c) Create an E-R diagram of Library Management System.
   d) Discuss error handling and its advantages. 2×4

PART-A

Q.2 Explain the following with example:
   a) Primary key.
   b) Intersection clause. 4×2

Q.3 Differentiate between inner and outer joins in RDBMS. Why are these used? Discuss each join with suitable example. 8

Q.4 What are the integrity rules? Explain with example. 8

PART-B

Q.5 What is PL/SQL? Differentiate between SQL and PL/SQL. Also, discuss its architecture. 8

Q.6 What do you mean by database security? Why it is important for an organization? Also, discuss data tampering. 8

Q.7 How to code CLR stored procedure and function? Explain. 8
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) — Third Semester  
DATABASE ENGINEERING-II (7.214)

Time: 3 hrs.  
Max Marks: 60  
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1  
a) What is DML?  
b) What is primary key?  
c) What is database?  
d) What do you mean by PL/SQL?  
e) What is locking?  
f) What is trigger?  

2×6

PART-A

Q.2  
Design an ER-diagram for an airline reservation system.  

12

Q.3  
What is union, intersection, minus, group by and having clause in SQL? Explain each with an example. How they are different from joins?  

12

Q.4  
What are different types of attributes in RDBMS? What is cardinality? Explain both with suitable examples.  

12

PART-B

Q.5  
Differentiate between the following:  
a) Implicit and Explicit cursors.  
b) Local and Stored procedures.  

6×2

Q.6  
What is a control structure in PL/SQL? Explain it with examples.  

12

Q.7  
What is deadlock prevention? Explain two phase locking with an suitable example.  

12
End Semester Examination, Dec. 2017

REQUIREMENT MODELING (7.217)

Time: 3 hrs.                                Max Marks: 40
No. of pages: 1                             

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt any TWO questions from Part-A and TWO questions from Part-B. Each question carries equal marks.

Q.1 Explain the following (any two):
   a) Functional Requirement.
   b) Requirement Reuse.
   c) Requirement Process.                      4×2

   PART-A

Q.2 What do you mean by information system? Discuss its purpose and characteristics.       8

Q.3 Differentiate between:
   a) Management information system and decision support system.
   b) Computer based system and manmade system.                                          4×2

Q.4 Discuss the various methods of system design with example.                             8

   PART-B

Q.5 Under what circumstances iterative models is used? Discuss its merits and demerits.   8

Q.6 What do you mean by business strategy? Discuss the various scenarios to understand the real problem.  8

Q.7 What do you mean by dataflow diagram? Explain context level DFD with example.          8
End Semester Examination, Dec. 2017  
B.Sc. (Information Technology) – Second Semester  
REQUIREMENT MODELING (7.217) 

Time: 3 hrs.  
Max Marks: 60  
No. of pages: 1

Note: Attempt **FIVE** questions in all; **Q.1 is compulsory**. Attempt any **TWO** questions from **Part-A** and **TWO** questions from **Part-B**. Each question carries equal marks.

Q.1 Explain the following (any two):  
   a) Discuss iterative model with its merits and demerits.  
   b) Differentiate between use case diagram and sequence diagram.  
   c) Discuss the scope and objective of a business to control the business problem.  
   6×2

**PART-A**

Q.2 Do you think that analysis by a stakeholder is a must in the successful implementation of system? Justify this statement with example.  
   12

Q.3 What do you mean by requirement discovery? Explain all fact-finding techniques for requirement discovery.  
   12

Q.4 Explain the following with example:  
   a) Primary key.  
   b) Foreign key.  
   c) Composite key.  
   d) Super key.  
   3×4

**PART-B**

Q.5 “Communicating the right requirements leads to a successful system”. Justify this statement with the help of example.  
   12

Q.6 Data analysis is becoming the need of industry now a days; explain the need of data analysis in education sector.  
   12

Q.7 Explain the following:  
   a) Requirement Reuse.  
   b) Requirement Completeness.  
   6×2
Q.1  **a) Fill in the blanks:**
   i) A program in execution is called as _______.
   ii) Banker’s algorithm is used for _______.
   iii) The time from submission to completion of a process is called _______.
   iv) Swapping needs _______ to store the swapped out programs.  

   **b) Answer the following:**
   i) Define operation system.
   ii) Differentiate hard-real-time and soft-real-time operating systems.
   iii) Name two types of fragmentations and their solutions.

Q.2  Consider the following set of process:

<table>
<thead>
<tr>
<th>Process</th>
<th>Burst time</th>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>10</td>
<td>3</td>
</tr>
<tr>
<td>B</td>
<td>29</td>
<td>1</td>
</tr>
<tr>
<td>C</td>
<td>3</td>
<td>3</td>
</tr>
<tr>
<td>D</td>
<td>7</td>
<td>4</td>
</tr>
<tr>
<td>E</td>
<td>12</td>
<td>2</td>
</tr>
</tbody>
</table>

Calculate average turn-around time and average wait time for FCFS, SJF and priority algorithms. Also draw neat Gantt charts for the same.  

Q.3 ‘The layered approach of O.S. operating system acts as a resource manager’, what resources does it manage? Discuss.  

Q.4 Define the characteristics of the operating systems given below:
   a) Batch operating system.
   b) Real time operating system.  

Q.5 Consider the following system snapshot using data structure in the Banker’s algorithm:

<p>| Allocatio | Max | Availabl |</p>
<table>
<thead>
<tr>
<th>n</th>
<th>e</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A B C D A B C D AB CD</td>
</tr>
<tr>
<td>P₀</td>
<td>0 0 1 2 0 0 1 2 15 20</td>
</tr>
<tr>
<td>P₁</td>
<td>1 0 0 0 1 7 5 0</td>
</tr>
<tr>
<td>P₂</td>
<td>1 3 5 4 2 3 5 6</td>
</tr>
<tr>
<td>P₃</td>
<td>0 6 3 2 0 6 5 2</td>
</tr>
<tr>
<td>P₄</td>
<td>0 0 1 4 0 6 5 6</td>
</tr>
</tbody>
</table>

Answer the following questions:

a) What are the contents of Need matrix?

b) Find out the safe sequence for the system.

Q.6 Give memory management with the help of paging. How paging is implemented with the help of page table? Explain with an example.

Q.7 What is directory? Explain the concept of disk scheduling with the help of an example.
Q.1 Write short notes on:
   a) HTML.
   b) ASP.Net programming.  

**PART-A**

Q.2 What are links in HTML? Differentiate external and internal links with suitable examples.  

Q.3 Using suitable examples, write down any five manipulation commands in MySQL.  

Q.4 Explain various validation controls in ASP.Net.  

**PART-B**

Q.5 How website can be secured? Explain the process of authorization and authentication.  

Q.6 Write a short notes on:
   a) Grid view control.
   b) Check box in ASP.Net.  

Q.7 Explain how calendar is inserted in ASP.Net, using different attributes?
End Semester Examination, Dec. 2017
B. Sc. (Information Technology) – Fourth Semester
WEB APPLICATION DEVELOPMENT (7.303)

Time: 3 hrs. Max Marks: 75
No. of pages: 1

Note: Attempt FIVE questions in all; Q.1 is compulsory. Attempt ANY TWO questions from PART-A and TWO questions from PART-B. Each question carries equal marks.

Q.1 Write short notes on:
   a) Website security.
   b) Singular v/s paired tags.
   c) Ordered list.
   d) Grid view control.
   e) Hyperlinks in HTML.

PART-A

Q.2 What are the various server controls in ASP .NET? How to use them? 15

Q.3 What do you mean by:
   a) Ajax Extension.
   b) Web Application.
   c) Site navigation.

Q.5 What is ASP .NET? What are the components of .NET framework? 15

PART-B

Q.5 a) Create a MRIU registration form in HTML. 10
   b) What is CSS? Explain internal CSS with example. 5

Q.6 a) Explain frame and frameset tag in HTML with the help of an example. 10
   b) Explain list view control with an example. 5

Q.7 a) Differentiate ordered and unordered list. 7
   b) Explain three layer architecture of ASP .NET.
